Provides the final report of the 9/11 Commission detailing their findings on the September 11 terrorist attacks.

This volume reports on Athenian pottery found in the Athenian Agora up to 1960 that can be dated from about the middle of the 8th century B.C., when the appearance of a painter of sufficient personal distinction to enliven the whole craft marks a real break from the earlier Geometric style, through the third quarter of the 7th century B.C. when Protoattic gives way to black-figure and black wares. A sampling of contemporary imported ware is included. The material is treated first by shape and then, more extensively, by painting styles. Some 650 characteristic pieces are selected for cataloguing. The introduction discusses the development of the various shapes and styles, characterizing the special techniques and innovations of the period. The topographical features of the Agora that are indicated by the places of discovery of deposits of late Geometric and Protoattic pottery are summarized under wells, houses, workshops, sanctuaries, cemeteries, and roads.

Navy fighter pilot Tim Johnson returns home to South Florida from Vietnam in 1973 with a plan. In order to execute it he will need the help of his younger brother Tommy and his less than scrupulous friends but trying to keep things a secret and off the radar of law enforcement may be harder than he thinks. Based on events and accounts, A Time to Hustle is a gripping pulse pounding ride into the illegal and dangerous underworld of the narcotics trade in the 1970's. This story is fiction. It is loosely based on actual events that happened a long time ago. All of the names and locations have been altered. Please do not try anything described or depicted in the following pages. Personal injury or death may result. Drug use, organized crime, and smuggling are illegal and not encouraged by the author. Any similarity to persons living or dead is coincidental and not intended by the author. Reader discretion is definitely advised. In this book we look at the history of the South African Nuclear Weapons Program, long denied but always winked about, an open secret to many although the details were always vague with rumours of Israeli assistance in designing the bombs. In fact, the Israeli input was negligible as the South African nuclear weapons worked in an entirely unique way, yielding about what the Hiroshima bomb did and considered "sufficient" as a deterrent against a Soviet Union originated and supported conventional attack. This attack almost came to be in 1988 - 1989 via Angola into what was then South West Africa and today Namibia. Masses of conventional forces were gathered, and plans were made - in history the same as the attack on South Vietnam by North Vietnamese Forces the decade before. History always repeats itself. A brilliant South African "Maskirovka" from the Chief of Staff in Pretoria stopped the planned invasion as well as the very public mobilising order of 400,000 men from the Army Reserves.South Africa also had the means to deliver nuclear bombs accurately, all discussed in this book and may even have done so, although, we don't know. It is one of the big "ifs" in history. As said, the invasion never took place and in no small way due to the Battle of Cuito Cuanavale which is often written about in GMJ Books. It was the largest tank battle in Africa since the Second World War and South African Forces won hands down.It is beyond maddening to the author that no Western "Expert" today knows that in 1978, South Africa produced working nuclear weapons. They either don't know, forgot history, or are incompetent, or more probably, both.Just before Mr. Mandela took office as the newly democratically elected president, the atomic devices were handed over to the US Government for dismantling. That act was until now the only time in the world where a country willingly got rid of its nuclear arsenal. Everyone applauded. Yet, the means to manufacture such weapons did not disappear with the weapons, something no one in the West realises. If a place like Iran wants a nuclear weapon, they merely need to ask the South Africans that have the know-how and proven capability to produce them in record time. It is old technology. In Code Name Angel we deal with nuclear weapons and the risk of such weapons in the hands of terrorists using them against the West. You should not doubt that terrorists will use nuclear devices if they have them - they stated their intentions to do so many times in the past. The normal rules of MAD, retaliation, do not apply to them. There is no reason to doubt that they would flatten a Western city if given the opportunity and such opportunities can be created easily enough as this book explains. Description: Spymaster extraordinaire, Angelique Dawson and her team must recover lost or rogery manufactured South African nukes on their way to Iran or Al-Qaeda or both for all we know. The warheads are escorted by Zimbabwean Intelligence operatives in cahoots with Iranian Intelligence. This was one of the spy major Egg Breaker operations that never made the newspapers and took place mostly in southern Mozambique, the chosen exfiltration point for the weapons. Major Geoffrey Foxtrot, under command of his handler, Angelique Dawson, later his wife and soul, tracks the weapons down in a combined operation with Mossad Agents but that is only the first step. Disarming the devices is another story as Angelique insists on doing so herself, plus the Zimbabweans are also around to prevent the bombs from being intercepted in the first place. A clash between the two groups is unavoidable. If you wish to read about Covert and Special Forces Operations in sub-Saharan Africa, the GMJ Books are the place to start. You will learn about covert operations, Special Forces techniques, and military history not known outside the select few. Code Name Angel is the 7th book of the popular GMJ Series.

This important addition to the literature is the first overall study of the architecture of Norman England since Sir Alfred Clapham's English Romanesque Architecture after the Conquest (1934). Eric Fernie, a recognized authority on the subject, begins with an overview of the architecture of the period, paying special attention to the importance of the architectural evidence for an understanding of the Norman Conquest. The second part, the core of the book, is an examination of the buildings defined by their function, as castles, halls, and chamber blocks, cathedrals, abbeys, and collegiate churches, monastic buildings, parish churches, and palace chapels. The third part is a reference guide to the elements which make up the buildings, such as apses, passages, vaults, galleries, and decorative features, and the fourth offers an account of the processes by which they were planned and constructed. This book contains powerful new ideas that will affect the way in which we look at and analyze these buildings.
