The 21st century business environment demands more analysis and rigor in marketing decision making. Increasingly, marketing decision making resembles design engineering-putting together concepts, data, analyses, and simulations to learn about the marketplace and to design effective marketing plans. While many view traditional marketing as art and some view it as science, the new marketing increasingly looks like engineering (that is, combining art and science to solve specific problems). Marketing Engineering is the systematic approach to harness data and knowledge to drive effective marketing decision making and implementation through a technology-enabled and model-supported decision process. (For more information on Excel-based models that support these concepts, visit DecisionPro.biz.) We have designed this book primarily for the business school student or marketing manager, who, with minimal background and technical training, must understand and employ the basic tools and models associated with Marketing Engineering. We offer an accessible overview of the most widely used marketing engineering concepts and tools and show how they drive the collection of the right data and information to perform the right analyses to make better marketing plans, better product designs, and better marketing decisions. What's New In the 2nd Edition While much has changed in the nearly five years since the first edition of Principles of Marketing Engineering was published, much has remained the same. Hence, we have not changed the basic structure or contents of the book. We have, however Updated the examples and references. Added new content on customer lifetime value and customer lifetime value-based pricing models. Added new material on "reverse perceptual mapping" to describe some exciting enhancements to our Marketing Engineering for Excel software. Provided better alignment between the content of the text and both the software and cases available with Marketing Engineering for Excel 2.0.

Brands are one of the company's most valuable assets. Brands benefit customers by creating value that goes beyond the product and service aspects of the offering. By bolstering customer demand, brands enable the company to capture greater value from its customers while at the same time strengthening the impact of the other marketing tactics, ensuring greater collaborator support, and facilitating the hiring and retaining of skilled employees. The key aspects of creating and managing brands are the focus of this note. The discussion of brand management is complemented by an in-depth overview of two additional topics: the role of brands as a means of self-expression and luxury branding. This note is an excerpt (Chapter 11) from Strategic Marketing Management: Theory and Practice by Alexander Chernev (Cerebellum Press, 2019).

"The art of building sales is, to a large extent, the art of building brands. After reading Kapferer's book, you'll never again think of a brand as just a name. Several exciting new ideas and perspectives on brand building are offered that have been absent from our literature"....-Philip Kotler".An invaluable reference for designers, marketing managers and brand managers alike".--Design magazine.
