As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and

This thesis consists of three essays on the economics of sleep time and work stress. The first essay, zthe impact of economic factors

File Type PDF

on sleep: the role of insomnia, discusses the role played by insomnia on the link between economic variables and sleep time.

Insomnia is a common phenomenon experienced by

File Type PDF

many Canadians.  
This paper uses  
the Canadian  
General Social  
Survey (GSS)  
2005 to  
investigate the  
effect of economic  
factors on the  
sleep time of the  
labour force. It  
replicates  
previous work by

File Type PDF  
Stress Report  
Paper

Biddle and Hamermesh (1990) and then extends this work to look at the role played by insomnia on the link between economic variables and sleep time. The paper concludes that the presence

File Type PDF  
Stress Report  
Paper

of sleep problems can significantly change the impact of economic determinants such as wage and education on sleep time. This paper finds that a 10 percent increase in the wage rate decreases sleep time by almost 20

File Type PDF

minutes per week  
for non-  
insomniacs while  
an increase in the  
wage rate does  
not have any  
impact on sleep  
time for  
insomniacs. In  
fact, the link  
between wage and  
sleep time  
appears to be

File Type PDF  
Stress Report  
Paper

broken for  
insomniacs as  
they do not want  
to, or cannot,  
sacrifice their  
sleep time in  
order to have  
more money in  
their pockets. The  
second essay,  
zsleep time and  
wages: the role of  
chronic diseases

Whereas Biddle and Hamermesh (1990) report that individuals sleep 14 minutes less per week as a result of a 10% increase in the wage rate, I find that this number increases to 30 minutes for individuals without

File Type PDF  
Stress Report  
Paper

sleep problems while it is zero for insomniacs.

Moreover, the impact of wages on sleep time is even more pronounced

--more than 60 minutes per week  
- once account is taken of health conditions and of

File Type PDF

the work environment. Interestingly, these health and environmental effects are in addition to their impact on insomnia: in other words, individuals with chronic health problems who are not

File Type PDF

insomniacs do not respond to an increase in the wage rate by reducing their sleep time. This means that the actual impact of wages on sleep time for those who do not suffer from these conditions is much

Psychological health problems including stress at workplace are an important issue in Canada. Using nine cycles spanning twelve years of the Canadian Community Health

File Type PDF

Survey (CCHS), I find that the level of work stress in Qu é bec is much higher than in any other province. In Qu é bec, 40% of the population report having quite a bit or extremely stressful jobs. In the other

File Type PDF  
Stress Report  
Paper

provinces, this number is much smaller, in the order of 30% in Ontario, Alberta, Manitoba and British Columbia, and even lower in the Atlantic Provinces. I find that Qu é bec still has a higher level of reported work

File Type PDF

stress even after controlling for the main determinants of work stress: income, education, health, age, gender, marital status, children and work environment. Unionization rate and unemployment

File Type PDF

rate in the province do not seem to matter. However, I find that immigrants in Qu é bec have less work stress than native-born Francophones. Also, Francophones in Qu é bec and elsewhere have

File Type PDF  
Stress Report  
Paper

higher levels of work stress than Anglophones and Allophones. A body of literature has examined the subject of work stress, and while it has been noted by a few authors (Bordeleau and Traor é , 2007 and Lesage et al.,

2010) that  
Qu é bec is  
different; a  
thorough analysis  
of the causes of  
this phenomenon  
needs to be done.  
This paper  
estimates  
regression models  
that include a  
large number of  
factors such as

work stress is still higher in Qu é bec. This study suggests that differences in the legal systems and in cultures may be some of the reasons of the differences between Qu é bec and the rest of Canada.
