The Urban Street Stormwater Guide begins from the principle that street

design can support--or degrade--the urban area's overall environmental health. By incorporating Green Stormwater Infrastructure (GSI) into the right-of-way, cities can manage stormwater and reap the public health, environmental, and

aesthetic benefits of street trees, planters, and greenery in the public realm. Building on the successful NACTO urban street guides, the Urban Street Stormwater Guide provides the best practices for the design of GSI along transportation

*Abstract: Transit-Oriented
Development (TOD) is a
management strategy that
offers sustainable answers
to urban development at*

Access PDF Study Guide For Metro Transit Police

different levels and reduces the heavy automobile dependence. In dealing with transport-related issues, TOD encourages the use of transit for better sustainability. The number

Acces PDF Study Guide For Metro Transit Police

of railway patronage is the best index used to measure the success of TOD.

However, TOD may also generate many short local car trips within the neighbourhood. The main

Acces PDF Study Guide For Metro Transit Police

research objective of the thesis is to investigate the factors that influence the three major transit modes of transportation within the neighbourhood. The ultimate goal of this thesis is to guide

Access PDF Study Guide For Metro Transit Police

development policies that create more sustainable transport. Although many studies have looked at TOD residents' travel behaviour at a regional or city level, most of them were based on

Acces PDF Study Guide For Metro Transit Police

North American cities. TOD neighbourhoods are assumed to have similar impacts on travel behaviour as they are generalized. Local trips within the TOD are less understood. A

Acces PDF Study Guide For Metro Transit Police

*neighbourhood level
analysis is used to explore
residents' travel behaviours
in 60 neighbourhoods of
Hong Kong delimited by a
five-hundred-meters buffer
area around each MTR*

Access PDF Study Guide For Metro Transit Police

station. An in-depth statistical analysis of the transit shares of 60 TOD and non-TOD neighbourhoods is made. This research design highlights the influence of TOD neighbourhoods in the

Acces PDF Study Guide For Metro Transit Police

use of transit for trips in different local communities, but most importantly it also identifies variability within the TOD neighbourhoods. Built environment's variables, which may

Acces PDF Study Guide For Metro Transit Police

influence the modes of transportation, are selected. Principal component analysis is used to reduce the number of variables to 5 latent factors. Those factors are identified as specific

Acces PDF Study Guide For Metro Transit Police

characteristics of the built environment. In order to understand the relationship between the extracted factors and the use of transit modes, regressions are conducted. The results

Acces PDF Study Guide For Metro Transit Police

confirm that a dense economic urban area and the station integration to other transportation networks could explain residents' travel behaviour for metro by 32%. It also

Acces PDF Study Guide For Metro Transit Police

shows that those two factors together with a mostly residential area with large families also explained 47% of the residents' travel behaviour for walking.

Variability of the bus' modal

Acces PDF Study Guide For Metro Transit Police

shares is not explained by any factor of the built environment used in the regression model. Buses have been identified as being more important in non-TOD neighbourhoods and a

Access PDF Study Guide For Metro Transit Police

less sustainable mode of transportation than walking and metro. This study provides important guidelines for TOD development to further promote walking and the

Acces PDF Study Guide For Metro Transit Police

use of metro. The variability of TOD neighbourhoods in Hong Kong and, ultimately, its influence on people's choice of sustainable transportation mode is demonstrated. This study

Access PDF Study Guide For Metro Transit Police

brings a better understanding of TOD in the Asian context and how to increase its sustainable aspect through transportation. The findings of this study can be used by

Transit-oriented Development in the United States

*This book aims to help
governments and public

light rail-light metro transit*

(LRMT) systems, and focuses on use of Public Private Participation (PPP) arrangements. Rather than identify a single approach, we present options and discuss practical issues related to

Acces PDF Study Guide For Metro Transit Police

preparing and implementing new LRMT PPP schemes. The approach is focused on providing information that can be used to make informed decisions, adapted to local policy and objectives. The

Access PDF Study Guide For Metro Transit Police

material presented is intended as a practical guide to developing LRMT PPPs in both developed and developing countries. This work endeavors to provide answers to readers questions regarding how to

Access PDF Study Guide For Metro Transit Police

successfully incorporate private sector participation in LRMT with a lesser emphasis on why LRMT and the private sector may be beneficial. The primary focus of this text is guiding the reader from design through to

Access PDF Study Guide For Metro Transit Police

project implementation. It starts from the premise that underlying transport policy decisions will have already been made and that LRMT has already been identified as the appropriate transport solution.

Access PDF Study Guide For Metro Transit Police

We have included some limited discussion of policy and technical issues where these directly impact the LRMT PPP approach. The approach is presented in nine sections, and in preparing it the author drew
