**me, ¿Speak only English / or die?¿** Lavieria deftly combines English and Spanish in this poetic celebration of his own bilingual, bicultural existence and the ever-increasing use of both languages in all fields, from music to technology. In his poem entitled *Spanglish*, he writes: *¿pues estoy creando spanglish / bicultural systems / scientific lexicographical / inter-textual integrations / two expressions / existentially wired / two dominant languages / continentally abrazándose* **¿** Divided into sections that examine borders, women, men, neighborhoods, and folklore, Lavieria continues his life-long poetic exploration of his Afro-Puerto Rican roots planted in the urban cacophony of New York City. In *¿Nideaquinedeall¿* (*¿Neither from Here nor from There¿*), he writes about the sense of alienation that all immigrants face when they are considered foreigners in both their native and adopted lands. The poems of Tato Lavieria are complex and engaging, and through his words, his spirit, his bilingualism, and his dual identity, he offers the reader poems that are a celebration of life and identity.

"Spain in the Heart is a book that comes back to haunt us every time that the pentagons of the world start the motors of their death machines and proceed to invade, massacre and burn an innocent people. Now we open it once again, and discover that it hasn't changed, that it is still unyielding, ample, made of multiple voices gloriously singing as the milicianos march on". -- Fernanco Alegria

"My book, Spain in the Heart was printed (during the Spanish Civil War) in a unique way. I believe few books, in the extraordinary history of so many books, have had such a curious birth and destiny. The soldiers learned to set type. But there was no paper. They found an old paper mill and decided to make it there. A strange mixture was concocted, in the midst of falling bombs, in the midst of battle. They threw everything they could get their hands on into the mill, from an enemy flag to a bloody tunic of a Moorish soldier. And in spite of the unusual materials used and the total inexperience of its manufacturers, the paper turned out to be very beautiful...My book was the pride of those men who had worked to bring out my poetry in defiance of death, and I learned that many carried copies of the book in their knapsacks, instead of their own food and clothing. With their knapsacks over their shoulders, they set out on the long march to France. The endless column walking to exile was bombed hundreds of times. Soldiers fell and the books were strewn over the road...The last copies of this impassioned book that was born and perished in the midst of fierce fighting were burned in a bonfire". -- Pablo Neruda, from *Memoirs*

Highly polysynthetic languages tend to have fully nominalized relative clauses and no relative pronouns, while other typologically diverse languages tend to have relative clauses which are similar to main or independent clauses. Languages of the Americas, with their rich genetic diversity, have all been under the influence of European languages, whether Spanish, English or Portuguese, a situation that may be expected to have influenced their grammatical patterns. The present volume focuses on two tasks: The first deals with the discussion of functional principles related to relative clause formation: diachrony and paths of grammaticalization, simplicity vs. complexity, and formalization of rules to capture semantic-syntactic correlations. The second provides a typological overview of relative clauses in nine different languages going from north to south in the Americas.**

This book is about linguistic diversity and language revitalisation in Galicia, one of the autochthonous regions of Spain. By means of historical, linguistic and sociolinguistic perspectives, it examines societal language use and institutional support in order to determine the role of the Galician language and loyalty and prestige factors, in expressions of Galician ethnic identity.

A state-of-the-art, in-depth survey of the topics, approaches and theories in Spanish linguistics today. The language is researched from a number of different perspectives. This Handbook surveys the major advances and findings, with a special focus on recent accomplishments in the field. It provides an accurate and complete overview of research, as well as facilitating future directions. It encourages the reader to make connections between chapters and units, and promotes cross-theoretical dialogue. The contributions are by a wide range of specialists, writing on topics including corpus linguistics, phonology and phonetics, morphosyntax, pragmatics, the role of the speaker and speech context, language acquisition and grammaticalization. This is a must-have volume for researchers looking to contextualize their own research and for students seeking a one-stop resource on Spanish linguistics.

Materials development has become much more important in the field of TESOL in the last twenty years: modules on materials development are now commonplace on MA TESOL courses around the world. The overall aim of the book is to introduce readers to a wide range of theoretical and practical issues in materials development to enable them to make informed and principled choices in the selection, evaluation, adaptation and production of materials. The book aims to show how these choices need to be informed by an awareness of culture, context and purpose.

El subjuntivo 1 introduces the Spanish subjunctive and the contexts in which it appears. This volume concentrates on practical application, and will help students gain a quick competence and confidence with this difficult mood. The grammar books of Colección Paso a paso are appropriate for both the self-directed student who wants to focus on grammar outside of the classroom, and the teacher who is looking for new techniques in grammar instruction. Topics are presented intuitively and in manageable segments, and language skills are arranged by level of difficulty.

**The series builds an extensive collection of high quality descriptions of languages around the world. Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and, if appropriate, a word list and other relevant information which is available on the language in question. There are no restrictions as to language family or area, and although special attention is paid to hitherto undescribed languages, new and valuable treatments of better known languages are also included. No theoretical model is imposed on the authors; the only criterion is a high standard of scientific quality.**

**This book addresses contemporary discourses on a wide variety of topics related to the ideological and epistemological changes of the 19th, 20th and 21st centuries, and the ways in which they have shaped the Spanish language and cultural manifestations in both Spain and Hispanic America. The majority of the chapters are concerned with 'otherness'**

in its various dimensions; the alien Other - foreign, immigrant, ethnically different, disempowered, female or minor - as well as the Other of different sexual orientation and/or ideology. Following Octavio Paz, otherness is expressed as the attempt to find the lost object of desire, the frustrating endeavour of the androgynous Plato wishing to embrace the other half of Zeus, who in his wrath, tore off from him. Otherness compels human beings to search for the complement from which they were severed. Thus a male joins a female, his other half, the only half that not only fills him but which allows him to return to the unity and reconciliation which is restored in its own perfection, formerly altered by divine will. As a result of this transformation, one can annul the distance that keeps us away from that which, not being our own, turns into a source of anguish. The clashing diversity of all things requires the human predisposition to accept that which is different. Such a predisposition is an expression of epistemological, ethical and political aperture. The disposition to co-exist with the different is imagined in the de-anthropocentricization of the bonds with all living realms. And otherness is, in some way, the reflection of sameness (mismidad). The other is closely related to the self, because the vision of the other implies a reflection about the self; it implies, consciously or not, a relationship with the self. These

El subjuntivo 2 provides insight into the more complex functions of the subjunctive in Spanish. Each lesson is presented in context, allowing students to discover grammar functions organically. The grammar books of Colección Paso a paso are appropriate for both the self-directed student who wants to focus on grammar outside of the classroom, and the teacher who is looking for new techniques in grammar instruction. Topics are presented intuitively and in manageable segments, and language skills are arranged by level of difficulty.

Traditional dialects have been encroached upon by the increasing mobility of their speakers and by the onslaught of national languages in education and mass media. Typically, older dialects are "leveling" to become more like national languages. This is regrettable when the last articulate traces of a culture are lost, but it also promotes a complex dynamics of interaction as speakers shift from dialect to standard and to intermediate compromises between the two in their forms of speech. Varieties of speech thus live on in modern communities, where they still function to mark provenance, but increasingly cultural and social provenance as opposed to pure geography. They arise at times from the need to function throughout the different groups in society, but they also may have roots in immigrants' speech, and just as certainly from the ineluctable dynamics of groups wishing to express their identity to themselves

and to the world. The future of dialects is a selection of the papers presented at Methods in Dialectology XV, held in Groningen, the Netherlands, 11-15 August 2014. While the focus is on methodology, the volume also includes specialized studies on varieties of Catalan, Breton, Croatian, (Belgian) Dutch, English (in the US, the UK and in Japan), German (including Swiss German), Italian (including Tyrolean Italian), Japanese, and Spanish as well as on heritage languages in Canada.
