A groundbreaking exploration of what it means to be a late bloomer in a culture obsessed with SAT scores and early success, and how finding one’s way later in life can be an advantage to long-term achievement and happiness. We live in a society where kids and parents are obsessed with early achievement, from getting perfect scores on SATs to getting into Ivy League colleges to landing an amazing job at Google or Facebook--or even better, creating a startup with the potential to be the next Google or Facebook or Uber. We see software coders becoming millionaires or even billionaires before age 30 and feel we are failing if we are not one of them. But there is good news. A lot of us--most of us--do not explode out of the gates in life. That was true for author Rich Karlgaard, who had a mediocre academic career at Stanford (which he got into by a fluke), and after graduating, worked as a dishwasher, nightwatchman, and typing temp before finally finding the inner motivation and drive that ultimately led him to start up a high-tech magazine in Silicon Valley, and eventually to become the publisher of Forbes magazine. There is a scientific explanation for why so many of us bloom later in life. The executive function of our brains doesn’t mature until age 25--and later for some. In fact our brain’s capabilities peak at different ages. We actually enjoy multiple periods of blooming in our lives. Based on several years of research, personal experience, and interviews with neuroscientists and psychologists, and countless people at different stages of their careers, Bloom reveals how and when we achieve full potential--and why an algorithmic acuity in math is such an anomaly in terms of career success.

The Mises Institute is thrilled to bring back this popular guide to ridiculous economic policy from the ancient world to modern times. This outstanding history illustrates the utter futility of fighting the market process through legislation. It always uses despotic measures to yield socially catastrophic results. It covers the ancient world, the Roman Republic and Empire, Medieval Europe, the first centuries of the U.S. and Canada, the French Revolution, the 19th century, World Wars I and II, the Nazis, the Soviets, postwar rent control, and the 1970s. It also includes a very helpful conclusion spelling out the theory of wage and price controls. This book is a treasure, and super entertaining!

Expanded and updated, Charles Eisenstein’s classic treatise on capitalism, currency, and the gift economy. This revised version traces the history of money, from ancient gift economies to modern capitalism, and includes new material on cryptocurrencies and emerging research that has come out since the book’s original publication. Charles Eisenstein shows how capitalism contributes to alienation, competition, and scarcity; destroys community; and necessitates endless growth at the cost of social and environmental devastation. Today, these trends have reached their extreme--and their collapse presents a golden opportunity to transition to a more connected, ecological, and sustainable way of being. Eisenstein describes the deeper narratives beneath our economic system, and how we can reimagine it to align with a new story. Applying a broadly integrated synthesis of theory, policy, and practice, he explores avant-garde concepts of the New Economics, including negative-interest currencies, local economies, gift economics, cryptocurrencies, and the restoration of the commons. Tapping into a rich lineage of conventional and unconventional economic thought, Eisenstein presents a vision that is original yet commonsense, radical yet gentle, and increasingly relevant as the crises of our civilization deepen.

Presents an expose of international corruption activities as reported by some of the world’s top assassins, journalists, and activists, in a cautionary report that makes recommendations for safeguarding the world.

Review and Analysis of John Perkins's Book

A gifted musician's decision to navigate society as a white man causes an internal debate about anti-blackness and the explicit nature of intent versus impact. James Weldon Johnson presents a distinct conflict driven by a person's desires and overwhelming fear. The Autobiography of an Ex-Colored Man follows the story of an unnamed narrator and his unique experience as a fair-skinned Black person. As a child, he is initially unaware of his race, but his mother soon clarifies their family's ancestry. The young man's ability to pass for white allows him to negate the harsh and discriminatory treatment most Black people face. This leads to a series of events that significantly shape the way he views his place in society. James Weldon Johnson delivers a captivating tale of identity politics in the U.S. and abroad. The main character is living a life of omission that provides public gain at a personal cost. This story maintains its relevance as a critical examination of race in society. With an eye-catching new cover, and professionally typeset manuscript, this edition of The Autobiography of an Ex-Colored Man is both modern and readable.

Bestselling author Sherman Alexie tells the story of Junior, a budding cartoonist growing up on the Spokane Indian Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot. Heartbreaking, funny, and beautifully written, The Absolutely True Diary of a Part-Time Indian, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live. With a forward by Markus Zusak, interviews with Sherman Alexie and Ellen Forney, and four-color interior art throughout, this edition is perfect for fans and collectors alike.

For over forty years in more than sixty countries, Raymond Baker has witnessed the free-market system operating illicitly and corruptly, with devastating consequences. In Capitalism's Achilles Heel, Baker takes readers on a fascinating journey through the global free-market system and reveals how dirty money, poverty, and inequality are inextricably intertwined. Readers will discover how small illicit transactions lead to massive illegalities and how staggering global income disparities are worsened by the illegalities that permeate international capitalism. Drawing on his experiences, Baker shows how Western banks and businesses use secret transactions and ignore laws while handling some \$1 trillion in illicit proceeds each year. He also illustrates how businesspeople, criminals, and kleptocrats perfect the same techniques to shift funds and how these tactics negatively affect individuals, institutions, and countries.

First published in 1938 this Routledge Revival is a reissue of the autobiography of influential economist J. A. Hobson. Doing well with money isn’t necessarily about what you know. It’s about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don’t make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life’s most important topics.

Over the past twenty years more citizens in China and India have raised themselves out of poverty than anywhere else at any time in history. They accomplished this through the local business sector the leading source of prosperity for all rich countries. In most of Africa and other poor regions the business sector is weak, but foreign aid continues to fund government and NGOs. Switching aid to the local business sector in order to cultivate a middle class is the oldest, surest, and only way to eliminate poverty in poor countries. A bold fusion of ethics and smart business, The Aid Trap shows how the same energy, goodwill, and money that we devote to charity can help local business thrive. R. Glenn Hubbard and William Duggan, two leading scholars in business and finance, demonstrate that by diverting a major share of charitable aid into the local business sector of poor countries, citizens can take the lead in the growth of their own economies. Although the aid system supports noble goals, a local well-digging company cannot compete with a foreign charity that digs wells for free. By investing in that local company a sustainable system of development can take root.

A Finnish journalist, now a naturalized American citizen, asks Americans to draw on elements of the Nordic way of life to nurture a fairer, happier, more secure, and less stressful society for themselves and their children Moving to America in 2008, Finnish journalist Anu Partanen quickly went from confident, successful professional to wary, self-doubting mess. She found that navigating the basics of everyday life—from buying a cell phone and filing taxes to education and childcare—was much more complicated and stressful than anything she encountered in her homeland. At first, she attributed her crippling anxiety to the difficulty of adapting to a freewheeling new culture. But as she got to know Americans better, she discovered they shared her deep apprehension. To understand why life is so different in the U.S. and Finland, Partanen began to look closely at both. In The Nordic Theory of Everything, Partanen compares and contrasts life in the United States with life in the Nordic region, focusing on four key relationships—parents and children, men and women, employees and employers, and government and citizens. She debunks criticism that Nordic countries are socialist “nanny states,” revealing instead that it is we Americans who are far more emmeshed in unhealthy dependencies than we realize. As Partanen explains step by step, the Nordic approach allows citizens to enjoy more individual freedom and independence than we do. Partanen wants to open Americans’ eyes to how much better things can be—to show her beloved new country what it can learn from her homeland to reinvigorate and fulfill the promise of the American dream—to provide the opportunity to live a healthy, safe, economically secure, upwardly mobile life for everyone. Offering insights, advice, and solutions, The Nordic Theory of Everything makes a convincing argument that we can rebuild our society, rekindle our optimism, and restore true freedom to our relationships and lives.

The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term "disaster capitalism." Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most dominant ideology of our time, Milton Friedman’s free market economic revolution. In contrast to the popular myth of this movement’s peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.

The cult classic that predicted the rise of fake news—revised and updated for the post-Trump, post-Gawker age. Hailed as "astonishing and disturbing" by the Financial Times and "essential reading" by TechCrunch at its original publication, former American Apparel marketing director Ryan Holiday ’ s first book sounded a prescient alarm about the dangers of fake news. It’s all the more relevant today. Trust Me, I ’ m Lying was the first book to blow the lid off the speed and force at which rumors travel online—and get "traded up" the media ecosystem until they become real headlines and generate real responses in the real world. The culprit? Marketers and professional media manipulators, encouraged by the toxic economics of the news business. Whenever you see a malicious online rumor costs a company millions, politically motivated fake news driving elections, a product or celebrity zooming from total obscurity to viral sensation, or anonymously sourced articles becoming national conversation, someone is behind it. Often someone like Ryan Holiday. As he explains, “ I wrote this book to explain how media manipulators work, how to spot their fingerprints, how to fight them, and how (if you must) to emulate their tactics. Why am I giving away these secrets? Because I ’ m tired of a world where trolls hijack debates, marketers help write the news, opinion masquerades as fact, algorithms drive everything to extremes, and no one is accountable for any of it. I ’ m pulling back the curtain because it ’ s time the public understands how things really work. What you choose to do with this information is up to you. ”

Perkins, a former chief economist at a Boston strategic-consulting firm, confesses he was an "economic hit man" for 10 years, helping U.S. intelligence agencies and multinationals cajole and blackmail foreign leaders into serving U.S. foreign policy and awarding lucrative contracts to American business.

The establishment of South Africa’s Truth and Reconciliation Commission was a pioneering international event. Never had any country sought to move forward from despotism to democracy both by exposing the atrocities committed in the past and achieving reconciliation with its former oppressors. At the center of this unprecedented attempt at healing a nation has been Archbishop Desmond Tutu, whom President Nelson Mandela named as Chairman of the Truth and Reconciliation Commission. With the final report of the Commission just published, Archbishop Tutu offers his reflections on the profound wisdom he has gained by helping usher South Africa through this painful experience. In No Future Without Forgiveness, Tutu argues that true reconciliation cannot be achieved by denying the past. But nor is it easy to reconcile when a nation "looks the beast in the eye." Rather than repeat platitudes about forgiveness, he presents a bold spirituality that recognizes the horrors people can inflict upon one another, and yet retains a sense of idealism about reconciliation. With a clarity of pitch born out of decades of experience, Tutu shows readers how to move forward with honesty and compassion to build a newer and more humane world.

"America's greenest CEO" and the hero from the award-winning documentary "The Corporation" makes the urgent, compelling case that sustainable business pays. His story is now legend. In 1994, after reading The Ecology of Commerce by Paul Hawken, Ray Anderson felt a "spear in the chest" the founder of Interface, Inc., a billion-dollar carpeting manufacturer, realized that his company was plundering the environment and he needed to steer it on a new course. Since then, Interface has cut its greenhouse gas emissions by 82%, and the goal is to reach zero environmental footprint by 2020. Thoughtful and winning, Confessions of a Radical Industrialist shows how Anderson revolutionized his company, in the process bringing costs down, improving quality, making it one of "Fortune"'s "100 Best Companies to Work For" -- and driving up profits. "The publisher has aimed for sustainability in all aspects of this book's production, from the inks and glues to the trim size. The interior paper is 100% post-consumer recycled, certified by the Forest Stewardship Council, and ancient-forest friendly. Instead of a jacket, the cover boards are wrapped in 100% recycled paper stock coated in a biodegradable varnish - and these are just two examples among many." "From the Hardcover edition."

"A deeply insightful book that connects the dots of the hidden systems that have subverted democracy and caused the type of desperation and anger that result in a 9/11. A book that opens our awareness."--John Perkins, author of The New York Times bestseller Confessions Of An Economic Hit Man "Anyone interested in global economic crime should read this book."--Charman Gooch, a founding director of Global Witness "Global Outlaws is a revealing book about a global trend whose importance is still far from being fully recognized."--Moises Naim, Editor in Chief of Foreign Policy Magazine and author of Illicit: How Smugglers Traffickers and Copycats are Hijacking the Global Economy "Carolyn Nordstrom's important new book takes us on a dark journey through war-torn landscapes riddled with corruption, violence, and gross inequalities. It is a compelling study--one guided by the norms of scholarly research but also written out of deeply felt experience. A book infused by anger, compassion, but also hope."--Andrew Mack, University of British Columbia "This is a fascinating, insightful, and important ethnographic study of the intersection of crime, finance, and power in the illegal, 'informal', or underground economy. I have read all of Carolyn Nordstrom's books, and this is the best one yet."--Jeff Sluka, Massey University "Carolyn Nordstrom's Global Outlaws is a rare and remarkable fusion of economic anthropology and travel writing. The prose is highly engaging without being sensationalistic. This is a timely and fascinating read for anyone looking for an on-the-ground account of the clandestine underside of globalization."--Peter Andreas, co-author of Policing the Globe: Criminalization and Crime Control in International Relations "Carolyn Nordstrom is the best fieldworker in anthropology, bar none. Yet again she has pioneered new fieldsites and new forms of ethnography in this book, as well as presented a new framework for viewing economics and economic power. This is undoubtedly a highly important work that sets new frontiers for anthropology."--Monique Skidmore, Australian National University

"This eloquent book inspires us to create a new reality of what it means to be human on this magnificent planet." --Deepak Chopra When New York Times bestselling author John Perkins was a young Peace Corps volunteer, his life was saved by an Amazonian shaman who taught him to "touch the jaguar"--to transform his fears into positive action. He went on to become an "economic hit man" (EHM), convincing developing countries to build huge infrastructure projects that put them perpetually in debt to the World Bank and other US-controlled institutions. Although he sincerely believed this was the best model for economic development, he came to realize it was really a new form of colonialism. Returning to the Amazon, he saw the destructive impact of his EHM work. But he also was inspired by a previously uncontacted tribe that touched its jaguar by uniting with its enemies to defend its territory against invading oil and mining companies. For the first time, Perkins details how his experiences in the Amazon converted him from an EHM to a crusader for transforming our failing Death Economy that destroys its own resources and nature itself into a flourishing Life Economy that renews itself. He provides a strategy for each of us to change our lives and defend our territory--the earth--against destructive policies and systems.

Augustine and the Disciplines takes its cue from Augustine's theory of the liberal arts to explore the larger question of how the Bible became the focus of medieval culture in the West. Augustine himself became increasingly aware that an ambivalent attitude towards knowledge and learning was inherent in Christianity. By facing the intellectual challenge posed by this tension he arrived at a new theory of how to interpret the Bible correctly. The topics investigated hereinclude: Augustine's changing relationship with the 'disciplines', as he moved from an attempt at their Christianization (in the philosophical dialogues of Cassiciacum) to a radical reshaping of them within a Christian world-view (in the De Doctrina Christiana and Confessiones); the factors that prompted andfacilitated his change of perspective; and the ways in which Augustine's evolving theory reflected contemporary trends in Christian pedagogy.

War Is a Racket is a speech and a 1935 short book, by Smedley D. Butler, a retired United States Marine Corps Major General and two-time Medal of Honor recipient. Based on his career military experience, Butler frankly discusses how business interests commercially benefit (including war profiteering) from warfare.

He had been appointed commanding officer of the Gendarmerie during the United States occupation of Haiti, which lasted from 1915 to 1934.

Previous editions of Affluenza described the early symptoms of the disease that led to a nearly fatal shutdown of all our financial systems in 2008. This new edition puts more focus on the behavior changes we need to make to be certain that the Great Recession does not become a prelude to something worse.

"The most consistent and courageous--and unapologetic--liberal partisan in American journalism." --Michael Tomasky, New York Review of Books In this "clear, provocative" (Boston Globe) New York Times bestseller, Paul Krugman, today's most widely read economist, examines the past eighty years of American history, from the reforms that tamed the harsh inequality of the Gilded Age and the 1920s to the unraveling of that achievement and the reemergence of immense economic and political inequality since the 1970s. Seeking to understand both what happened to middle-class America and what it will take to achieve a "new New Deal," Krugman has created his finest book to date, a "stimulating manifesto" offering "a compelling historical defense of liberalism and a clarion call for Americans to retake control of their economic destiny" (Publishers Weekly). "As Democrats seek a rationale not merely for returning to power, but for fundamentally changing--or changing back--the relationship between America's government and its citizens, Mr. Krugman's arguments will prove vital in the months and years ahead." --Peter Beinart, New York Times

How serious are the threats to our environment? Here is one measure of the problem: if we continue to do exactly what we are doing, with no growth in the human population or the world economy, the world in the latter part of this century will be unfit to live in. Of course human activities are not holding at current levels—they are accelerating, dramatically—and so, too, is the pace of climate disruption, biotic impoverishment, and toxification. In this book Gus Speth, author of Red Sky at Morning and a widely respected environmentalist, begins with the observation that the environmental community has grown in strength and sophistication, but the environment has continued to decline, to the point that we are now at the edge of catastrophe. Speth contends that this situation is a severe indictment of the economic and political system we call modern capitalism. Our vital task is now to change the operating instructions for today's destructive world economy before it is too late. The book is about how to do that.

A lively, inviting account of the history of economics, told through events from ancient to modern times and the ideas of great thinkers in the field What causes poverty? Are economic crises inevitable under capitalism? Is government intervention in an economy a helpful approach or a disastrous idea? The answers to such basic economic questions matter to everyone, yet the unfamiliar jargon and math of economics can seem daunting. This clear, accessible, and even humorous book is ideal for young readers new to economics and for all readers who seek a better understanding of the full sweep of economic history and ideas. Economic historian Niall Kishtainy organizes short, chronological chapters that center on big ideas and events. He recounts the contributions of key thinkers including Adam Smith, David Ricardo, Karl Marx, John Maynard Keynes, and others, while examining topics ranging from the invention of money and the rise of agrarianism to the Great Depression, entrepreneurship, environmental destruction, inequality, and behavioral economics. The result is a uniquely enjoyable volume that succeeds in illuminating the economic ideas and forces that shape our world.

Like tentacles on a vast octopus, the firsthand investigations in The Blood Bankers all lead to one core. A financial detective of sorts, investigative journalist Jim Henry analyzes a range of scandals, including the looting of the Philippines by the Marcos family and the financial collapse of nations throughout the developing world. A rogues' gallery of international criminals owes its existence to the dramatic growth of the underground global economy over the last two decades. Our world is being reshaped, often in sinister fashion, by wide open capital markets and an international banking network that exists to launder hundreds of billions of dollars in ill-gotten gains. Here is an inside look at globalization's dark side—the new high growth global markets for influence-peddling, capital flight, money laundering, weapons, drugs, tax evasion, child labor, illegal immigration, and other forms of transnational crime. The world's foremost expert on pricing strategy shows how this mysterious process works and how to maximize value through pricing to company and customer. In all walks of life, we constantly make decisions about whether something is worth our money or our time, or try to convince others to part with their money or their time. Price is the place where value and money meet. From the global release of the latest electronic gadget to the bewildering gyrations of oil futures to markdowns at the bargain store, price is the most powerful and pervasive economic force in our day-to-day lives and one of the least understood. The recipe for successful pricing often sounds like an exotic cocktail, with equal parts psychology, economics, strategy, tools and incentives stirred up together, usually with just enough math to sour the taste. That leads managers to water down the drink with hunches and rules of thumb, or leave out the parts with which they don't feel comfortable. While this makes for a sweeter drink, it often lacks the punch to have an impact on the customer or on the business. It doesn't have to be that way, though, as Hermann Simon illustrates through dozens of stories collected over four decades in the trenches and behind the scenes. A world-renowned speaker on pricing and a trusted advisor to Fortune 500 executives, Simon's lifelong journey has taken him from rural farmers' markets, to a distinguished academic career, to a long second career as an entrepreneur and management consultant to companies large and small throughout the world. Along the way, he has learned from Nobel Prize winners and leading management gurus, and helped countless managers and executives use pricing as a way to create new markets, grow their businesses and gain a sustained competitive advantage. He also learned some tough personal lessons about value, how people perceive it, and how people profit from it. In this engaging and practical narrative, Simon leaves nothing out of the pricing cocktail, but still makes it go down smoothly and leaves you wanting to learn more and do more—as a consumer or as a business person. You will never look at pricing the same way again.

The Shock Doctrine

How and Why Our Economy Works (and Doesn't Work), in Words and Pictures

Featuring 15 explosive new chapters, this new edition of the New York Times bestseller brings the story of Economic Hit Men up-to-date and, chillingly, home to the U.S.—but it also gives us hope and the tools to fight back. Former economic hit man John Perkins shares new details about the ways he and others cheated countries around the globe out of trillions of dollars. Then he reveals how the deadly EHM cancer he helped create has spread far more widely and deeply than ever in the US and everywhere else—to become the dominant system of business, government, and society today. Finally, he gives an insider view of what we each can do to change it. Economic hit men are the shock troops of what Perkins calls the corporatocracy, a vast network of corporations, banks, colluding governments, and the rich and powerful people tied to them. If the EHMs can't maintain the corrupt status quo through nonviolent coercion, the jackal assassins swoop in. The heart of this book is a completely new section, over 100 pages long, that exposes the fact that all the EHM and jackal tools—false economics, false promises, threats, bribes, extortion, debt, deception, coups, assassinations, unbridled military power—are used around the world today exponentially more than during the era Perkins exposed over a decade ago. As dark as the story gets, this reformed EHM also provides hope. Perkins offers specific actions each of us can take to transform what he calls a failing Death Economy into a Life Economy that provides sustainable abundance for all.

Sample Book Insights: #1 I was a twenty-three-year-old volunteer assigned to develop credit and savings cooperatives in communities deep in the Amazon rain forest in Ecuador in 1968. I was shocked by the hovels along the runway. #2 I was assigned to help a group of campesino brick makers in the high Andes. I was told that the brick makers needed to improve the efficiency of their archaic ovens, but they came to me complaining about the men who owned the trucks and warehouses down in the city. #3 I had grown up feeling poor in my boarding school in New Hampshire, but suddenly I was making a great deal of money, traveling first class, and meeting with heads of state. I had it made. #4 I had become so used to my life of luxury that I had begun to take on debt to support it. I had become miserable, and I was operating out of fear - the fear of communism, losing my job, and not having the material things that everyone told me I needed.
