**Not so long ago, being reasonably trustworthy was good enough. But soon only the extremely trustworthy will thrive. In the age of smartphones and social networks, every action an organization takes can be exposed and critiqued in real time. Nothing is local or secret anymore. If you treat one customer unfairly, produce one shoddy product, or try to gouge one price, the whole world may find out in hours, if not minutes. The users of Twitter, Yelp, and similar outlets show little mercy for bad behavior. The bar for trustworthiness is higher than ever and continues to rise. Bestselling authors Don Peppers and Martha Rogers, Ph.D., argue that the only sane response to these rising levels of transparency is to protect the interests of customers proactively—even if that requires spending extra money in the short run to preserve your brand reputation in the long run. The payoff of generating extreme trust will be worth it. With a wealth of fascinating research as well as practical applications, this book will show you how to earn—and keep—the extreme trust of everyone your company interacts with.**

**In a recent survey of executives, two-thirds of the respondents said they didn't think their organization could execute the company's defined strategy. Why is the strategy-execution gap so pervasive? And what can executives do to close it? In Strategy that Works, Paul Leinwand and Cesare Mainardi share their latest research into how the best companies in the world connect strategy to execution. Having the right capabilities in place is essential; but subsequent research by the authors' firm, Strategy&, shows that capabilities alone don't close the gap between what companies aspire to do and what they can actually accomplish. The authors identify, in all, five fundamental principles for connecting strategy and execution, and show how the best companies in the world use these principles to out-execute and out-compete their opponents. **All high performance organizations have one thing in common: execution. The men and women who work there sustain performance at seemingly otherworldly levels of precision, accuracy, and consistency. In the fifth and final book of Mark Miller's High Performance series, he uses his trademark business fable format to show how any organization can cultivate the kind of everyday habits that yield extraordinary results. Miller tells the story of Blake Brown, a CEO who learns how to help his team to consistently excel at execution from a perhaps unlikely source: his son's high school football coach. The story is fictional, but the principles and practices are very real, derived from years of research led by a team from Stanford University. Miller and his team interviewed leaders and employees from numerous world-class organizations,**

Critical Steps happen every day at work and at home, purposefully. Work does not happen otherwise. If an operation has the capacity to do work, then it has the capacity to do harm. Work is energy directed by human beings to create value. But people are imperfect—we make mistakes, and sometimes we lose control of the work. Therefore, work is the use of force under conditions of uncertainty. A Critical Step is a human

Whether the human action involves clicking on a link attached to an e-mail message, walking down a flight of stairs with a newborn baby in arms, engaging the clutch on a gasoline-driven chain saw, or administering a medication to a patient in a hospital, these all satisfy the definition of what constitutes critical risks in our daily lives, professionally or personally. The overarching goal of managing Critical Steps is to maximize the success (safety, reliability, productivity, quality, profitability, etc.) of people's performance in the workplace, to create value for the organization without losing control of built-in hazards necessary to create that value.**

**Your business can take a lesson from the American military's fighter pilots. At Mach 2, the instrument panel of an F-15 is screaming out information, the horizon is a blur, the wingman is occupied, the jet is hanging on the edge -- and yet fighter pilots routinely handle the stress. It's not much different in today's unforgiving business world. One slipup and your company is bankrupt before your employees know what hit them. What works on the squadron level for F-15 pilots will also work for your marketing team, sales force, or research and development group. By analyzing the work environment and attacking its centers of gravity in parallel, you'll begin to utilize the Plan-Brief-Execute-Debrief-Win cycle that will rapidly impact your business's future success. U.S. fighter squadrons have been using this program for nearly fifty years to reduce their mistake rate, cut casualties and equipment losses, and rack up an envious victory record. Now, with Flawless Execution, your business can too.**

Today, red teams are used widely in both the public and the private sector by those seeking to better understand the interests, intentions, and capabilities of institutional rivals. Drawing on a fascinating range of case studies, Red Team shows not only how to create and empower red teams, but also what to do with the information they produce. In this vivid, deeply-informed account, national security expert Micah Zenko provides the definitive book on this important strategy -- full of vital insights for decision makers of all kinds. Society at large tends to misunderstand what safety is all about. It is not just the absence of harm. When nothing bad happens over a period of time, how do you know you are safe? In reality, safety is what you and your people do moment by moment, day by day to protect assets from harm and to control the hazards inherent in your operations. This is the purpose of risk-based thinking, the key element of the six building blocks of Human and Organizational Performance (H&OP). Generally, H&OP provides a risk-based approach to managing human performance in operations. But, specifically, risk-based thinking enables foresight and flexibility—even when surprised—to do what is necessary to protect assets from harm but also achieve mission*

This book provides a coherent perspective on what executives and line managers within operational environments need to focus on to efficiently and effectively control, learn, and adapt. Red Teaming is a revolutionary new way to make critical and contrarian thinking part of the planning process of any organization, allowing companies to stress-test their strategies, flush out hidden threats and missed opportunities and avoid being sandbagged by competitors. Today, most — if not all — established corporations live with the gnawing fear that there is another Uber out there just waiting to disrupt their industry. Red Teaming is the cure for this anxiety. The term was coined by the U.S. Army, which has developed the most comprehensive and effective approach to Red Teaming in the world today in response to the debacles of its recent wars in Iraq and Afghanistan. However, the roots of Red Teaming run very deep: to the Roman Catholic Church's "Office of the Devil's Advocate," to the Kriegsspiel of the Prussian General Staff and to the secretive AMAN organization, Israel's Directorate of Military Intelligence. In this book, author Bryce Hoffman shows business how to use the same techniques to better plan for the

uncertainties of today's rapidly changing economy. Red Teaming is both a set of analytical tools and a mindset. It is designed to overcome the mental blind spots and cognitive biases that all of us fall victim to when we try to address complex problems. The same heuristics that allow us to successfully navigate life and business also cause us to miss or ignore important information. It is a simple and provable fact that we do not know what we do not know. The good news is that, through Red Teaming, we can find out. In this book, Hoffman shows how the most innovative and disruptive companies, such as Google and Toyota, already employ some of these techniques organically. He also shows how many high-profile business failures, including those that sparked the Great Recession, could easily have been averted by using these approaches. Most importantly, he teaches leaders how to make Red Teaming part of their own planning process, laying the foundation for a movement that will change the way America does business.
