Consigliato ad un pubblico 16+ Nell'era in cui il cyberterrorismo imperversa nelle reti e nei sistemi di tutti i governi ed enti governativi mondiali, le persone occidentali sembrano ormai aver sviluppato un inconscio stato di quasi totale indifferenza verso i drammatici eventi terroristici che avvengono sempre più di frequente in ogni angolo del globo. Fanatismi religiosi e disagio sociale, fanno da copertina alle reali motivazioni che inducono gli esponenti dei maggiori gruppi terroristici mondiali a compiere atti scellerati, largamente foraggiati dalle potenze governative arabe, asiatiche e occidentali, in netta contrapposizione con la piccola Israele e il suo strapotere economico sociale. Due amici d'infanzia trascorrono la loro giovinezza e adolescenza in una Roma dei primissimi anni Novanta, perseguendo ognuno la propria strada che li allontanerà fisicamente ma l'affetto che li lega li manterrà comunque uniti, per poi ritrovarsi in età matura a fondare e gestire un'innovativa azienda di cybersecurity compartecipata dal governo israeliano. Aaron, ebreo appartenente all'Idd e Zeev, ateo dalle radici cristiane, si ritrovano così a dover fronteggiare intrighi politici e perversi giochi di potere che finiranno inesorabilmente a invadere e contaminare le loro vite private, sino a sfociare in un disrompette vortice di passioni e situazioni estreme, sotto l'occhio vigile e attento dello Stato di Israele.

The original idea for a conference on the “shapes of knowledge” dates back over ten years to conversations with the late Charles Schmitt of the Warburg Institute. What happened to the classifications of the sciences between the time of the medieval Studium and that of the French Encyclopedie is a complex and highly abstract question, but posing it is an effective way of mapping and evaluating long term intellectual changes, especially those arising from the impact of humanist scholarship, the new science of the seventeenth century, and attempts to evaluate, to apply, to reconcile, and to institutionalize these rival and interacting traditions. Yet such patterns and transformations cannot be well understood from the heights of the general history of ideas. Within the –eneral framework of the organization of knowledge the map must be filled in by particular explorations and soundings, and our project called for a conference that would combine some encyclopedic (as well as interdisciplinary and inter national) breadth with scholarly and technical depth.

In this mesmerizing finale to the revolutionary Carnivia Trilogy—following The Abomination and The Abduction—Venetian police captain Kat Tapo and U.S. Army intelligence analyst Holly Boland embark on their most dangerous and disturbing journey yet. On Venice’s popular Lido beach, a man is found lying on the shore, his throat slit and his tongue viciously torn out, and his face covered by an unusual antique mask. Superiors inside the Venice Carabinieri have finally given Captain Kat Tapo permission to run her first murder case. But when she learns that the mask is a Masonic “hoodwink”—and that the circumstances of the man’s death are eerily similar to the Masonic punishment for betrayal—she suspects that her appointment has darker implications. As a woman, she cannot penetrate the closed world of Italian freemasonry. The dead man is identified as a senior partner in a small Catholic bank currently engaged in negotiations with one of Italy’s richest men. Yet Kat knows that, when it comes to Venice’s most powerful and influential, money isn’t the only motive for murder. While she focuses on her investigation, American intelligence analyst Holly Boland finds a document among her father’s possessions that offers evidence of a shocking Cold War cover-up. The deeper the second lieutenant digs into what her father knew, the more she begins to wonder: Was her father silenced before he could expose the truth? Reclusive genius Daniele Barbo, creator of the anonymous virtual world Carnivia.com, makes a chilling discovery of his own: his website has been contaminated by a malevolent virus that will cripple Italy unless he can break his own encryption and prevent catastrophe. As the three cases merge, the trio of allies uncover a conspiracy involving the security services, the Church, and the CIA—a devastating plot stretching back decades that could destroy all three of them . . . but not without a fight.

Perché negli ultimi anni abbiamo sentito parlare sempre più di troll e bot russi? Cosa sono e quale strategia nascondono questi attacchi informatici?L'avvento al potere di Vladimir Putin, nel 2000, ha aperto una nuova fase nella storia della Russia, portando il Paese a nutrire maggiori ambizioni nell'arena internazionale non più sostenibili con le vecchie strategie.La cosiddetta ‘Dottrina Gerasimov’, che prende il nome dal Generale che l’ha teorizzata, è il punto di partenza della guerra non convenzionale che vede come strumento combatté anche in tempo di pace e che ha, fra i suoi obiettivi, la manipolazione dell’opinione pubblica e l’uso dell’informazione come arma a largo spettro.In questo libro Marta Ottaviani illustra come Mosca sia riuscita a influenzare alcuni grandi conflitti e appuntamenti internazionallattraverso attacchi hacker ai danni di molti Paesi europei e legioni di troll al soldo del Cremlino, che operano per accrescere la popolarità di Putin e screditare gli oppositori. L’obiettivo è quello di far filtrare la versione dei fatti russa, ribaltando.
This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC’s previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed.

The Book That Started the Fermentation Revolution
Sandor Elix Katz, winner of a James Beard Award and New York Times bestselling author, whom Michael Pollan calls the “Johnny Appleseed of Fermentation” returns to the iconic book that started it all, but with a fresh perspective, renewed enthusiasm, and expanded wisdom from his travels around the world. This self-described fermentation revivalist is perhaps best known simply as Sandorkraut, which describes his joyful and demystifying approach to making and eating fermented foods, the health benefits of which have helped launch a nutrition-based food revolution. Since its publication in 2003, and aided by Katz’s engaging and fervent workshop presentations, Wild Fermentation has inspired people to turn their kitchens into food labs: fermenting vegetables into sauerkraut, milk into cheese or yogurt, grains into sourdough bread, and much more. In turn, they’ve traded batches, shared recipes, and joined thousands of others on a journey of creating healthy food for themselves, their families, and their communities. Katz’s work earned him the Craig Claiborne lifetime achievement award from the Southern Foodways Alliance, and has been called “one of the unlikely rock stars of the American food scene” by The New York Times. This updated and revised edition, now with full color photos throughout, is sure to introduce a whole new generation to the flavors and health benefits of fermented foods. It features many brand-new recipes—including Strawberry Kvass, African Sorghum Beer, and Infinite Buckwheat Bread—and updates and refines original recipes reflecting the author’s ever-deepening knowledge of global food traditions that has influenced four-star chefs and home cooks alike. For Katz, his gateway to fermentation was sauerkraut. So open this book to find yours, and start a little food revolution right in your own kitchen. Praise for Sandor Elix Katz and his books: “The Art of Fermentation is an extraordinary book, and an impressive work of passion and scholarship.”—Deborah Madison, author of Local Flavours “Sandor Katz has proven himself to be the king of fermentation.”—Sally Fallon Morell, President, The Weston A. Price Foundation “Sandor Katz has already awakened more people to the diversity and deliciousness of fermented foods than any other single person has over the last century.”—Gary Paul Nabhan, author of Growing Food in a Hotter, Drier Land “The fermenting bible.” – Newsweek “In a country almost clinically obsessed with sterilization Katz reminds us of the forgotten benefits of living in harmony with our microbial relatives.” – Grist

A Novel
La Seconda guerra mondiale si è combattuta anche su un fronte più nascosto, tra coloro che volevano rendere illeggibili al nemico i propri messaggi e coloro che cercavano in ogni modo di svelarli. La storia è rimasta segreta per quasi trent'anni dalla fine del conflitto e una grande mole di informazioni è stata resa disponibile soltanto negli anni '90 del Novecento grazie alle leggi sulla trasparenza entrate in vigore negli Stati Uniti e nel Regno Unito, i Freedom of Information Act. I crittologi non furono alle prese solo con Enigma, la macchina cifrante tedesca, che Alan Turing contribuì a decrittare. La storia è costellata di sconfitte e trionfi, di contributi di decine di menti geniali e del duro lavoro di un esercito di collaboratori, in gran parte donne. L'uso estensivo di macchine per cifrare e per decifrare è stato uno degli elementi decisivi per la nascita dell'informatica moderna. Set in two Venices, the modern physical world and its virtual counterpart, The Abomination by Jonathan Holt is a contributive tale of murder, conurbation, and international intrigue:the first book in an outstanding new trilogy in which Carabinieri Captain Kat Tapo must unravel a dark conspiracy linking the CIA and the Catholic Church. By the stunning white dome of one of Venice’s grandest landmarks a body with two slugs in the back of the head has been pulled from the icy waters. The victim is a woman, dressed in the sacred robes of a Catholic priestia desecration that becomes known as the Abomination. Working her first murder case, Captain Kat Tapo embarks on a trail that proves as elusive and complicated as the city’s labyrinthine backstreets. What Kat discovers will test her loyalties and remind her of a simple truth: Unliss old crimes are punished, corrupt forces will continue to repeat their mortal sins. The Abomination is book one of Jonathan Holt’s Carnivia Trilogy.
Nel 2097 Corinne Moreau pilota aerospaziale scompare sull'isola di Rapa Nui. L'anno seguente una donna sostiene di averla incontrata a Ghibilterra compiendo un salto temporale di 18.000 anni. "The Old Castle’s Secret”
Trying to end his career as a hired assassin, Japanese American John Rain goes underground, only to be approached by Japanese FBI agent Tatsu to eliminate a sociopathic killer who could tip the balance of power in Japan toward the mafia. Reriprint.
This book analyzes whistleblowing platforms and the adoption of encryption tools in journalism. Whistleblowing platforms are becoming an important phenomenon for journalism in this era and offer safer solutions for communicating with whistleblowers and obtaining leaks. WikiLeaks and the Snowden case have been powerful game changers for today’s journalism, showing the potentials of and needs for encryption for journalistic purposes, together with the perils of surveillance. Whistleblowing platforms are also an interesting example of journalists and hackers coming together to support investigations with new tools and practices. The book introduces this phenomenon and features a qualitative study about whistleblowing platforms and their adoption in the journalistic field.
Cinque ex agenti dei servizi di Gheddafi devono essere eliminati per evitare che rivelino informazioni riservate sul conto del defunto dittatore, informazioni che potrebbero risultare imbarazzanti per le democrazie occidentali. Jack Ryan Jr, figlio del Presidente degli Stati Uniti, ha già concluso la missione quando scopre di essere stato filmato. Chi lo sta facendo pedinare? Chi vuole ricattarlo? Intanto il clima politico fra Stati Uniti e Cina si fa sempre più teso. C’è chi, sfruttando come pretesto i problemi di confine nel mar della Cina, trama per scatenare uno scontro senza esclusione di colpi. E una serie di attacchi informatici mina la sicurezza dell’America e la sua stabilità anche economica. Fra dirottamenti di droni militari, centrali nucleari in surriscaldamento, mezzi navali e aerei in transito sulle zone calde del pianeta, in una frenetica caccia all'uomo che si dipana tra Washington e Hong Kong, Miami e Canton, Mosca e Istanbul, l'attualità si intreccia con la fantasia per evocare lo spettro di un futuro fin troppo probabile.
