A commonly expressed view is that the citizens and the Member States are destined to be overcome by the European Union. There is a sense that the Union of today is not what was intended to be created or acceded to by the Member States or its citizens. The Outer Limits of European Union Law brings together a diverse group of legal and procedural law in a manner highlighting the many senses in which the European Union is or can be limited and so demonstrating that the fear of being overcome is largely a false fear. By exploring the mechanisms and devices used to limit the European Union, the contributors also reveal not only the strengths of the various limits, but thereby demonstrating that the prospect of being overcome may be a genuine risk to be guarded against. By considering general themes (eg legitimacy) and core subject areas (eg policing, free movement of goods, remedies) the book reveals the various techniques used by the Court of Justice, Community institutions and Member States and European Union Law.

A comprehensive picture of the effects of economic integration on industry location in less developed East Asia - particularly in Cambodia, Laos, Vietnam, and Myanmar - who pursued trade liberalization and economic integration after the 1990s. Studies include detailed empirical analyses of regional industry locations as well as country overviews.

This book criticizes the widespread view that the 1997 Asian crisis was due to 'crony capitalism' and puts the blame instead on misguided liberalization. It analyzes the case of Korea's business conglomerates, the chaebol, with particular attention to the car industry, to show how liberalization contributed to the crisis even at the level of the firm. It shows how those firms that had developed innovative capabilities survived the crisis much better than those that had merely expanded into markets opened up by liberalization.

Abstrakte Bankgarantien sind im internationalen Wirtschaftsverkehr ein unverzichtbares Zahlungssicherungsmittel für komplexe Bauvorhaben und andere Großprojekte. Sie versprechen im Bedarfsfall sofortige Liquidität und lassen sich auf erstes Anfordern abrufen, ohne dass Einwände aus dem Grund-, oder Deckungsgeschäft die Auszahlung verhindern können. Diese unmittelbare Verwertungsmöglichkeit birgt jedoch zwangsweise ein erhöhtes Risiko einer ungerechtfertigten oder missbräuchlichen Abrufung. Das vorliegende Werk untersucht rechtsvergleichend den Missbrauch von Bankgarantien (sog. demand guarantee/independent guarantee/standby letter of credit) im südafrikanischen, englischen sowie deutschen Recht. Unter Auswertung aktueller Gerichtsentscheidungen sowie des Schrifttums werden die praxisrelevanten Missbrauchsfallgruppen analysiert und Wege zur Risikominimierung bzw. -vermeidung aufgezeigt. Das Werk ist gleichermaßen für die Praxis und Wissenschaft geeignet und leistet einen wichtigen Beitrag zur Auflösung des Spannungsfeldes von Rechtssicherheit und materieller Gerechtigkeit im internationalen Wirtschaftsverkehr.

There have been significant improvements to the legal framework and the supervisory process since the last Basel Core Principles (BCP) review; some additional recommended enhancements are highlighted in this assessment. The Superintendent of Financial Institutions (SFC) is an integrated supervisor with a purview that includes banks, finance companies, insurance, securities, and other financial intermediaries. Additionally, the SFC is also the bank resolution authority. To strengthen consolidated supervision, Congress passed Financial Conglomerates Law (FCL) 1870 addressing the supervision of financial conglomerates and granting the SFC supervisory authority over financial conglomerates (CF).2 The FCL strengthened the framework for consolidated supervision, which already included banks and their subsidiaries, by adding holding companies as supervised entities. Moreover, it defined the scope of supervision of financial conglomerates, setting standards with regards to risk management, adequate capital, and corporate governance, as well as minimum requirements for managing concentration risks and conflicts of interest in intragroup and related party exposures. The SFC has strong coordination and cooperation arrangements with foreign supervisors (through signed Memoranda of Understanding (MOUs) and the coordination mechanisms derived from the CCSBSO, among others) as well as the authority to request information from parent companies, all of which were further enhanced with the issuance of the FCL. Additionally, the SFC has access and authority to require information from ultimate beneficial owners.

This book discusses an emerging field of decision science that focuses on business processes and systems used to extract knowledge from large volumes of data to provide significant insights for crucial decisions in critical situations. It presents studies employing computing techniques like machine learning, which explore decision-making for cross-platforms that contain heterogeneous data associated with complex assets, leadership, and team coordination. It also reveals the advantages of using decision sciences with management-oriented problems. The book includes a selection of the best papers presented at the 2nd International Conference on Decision Science and Management (ICDSM 2019), held at Hunan International Economics University, China, on 20–21 September 2019.

The History, Politics, and Economics of Australian Exceptionalism

Supervising Today's Thrift Industry

This edited volume is about the Australian difference and how Australia's economic and social policy has diverged from the approach of other countries. Australia seems to be following a 'special path' of its own that it laid down more than a century ago. Australia's distinctive bent is manifested in a tightly regulated labour market; a heavy reliance on means testing and income taxation; a geographical centralization of political power combined with its dispersal amongst autonomous authorities, and electoral singularities such as compulsory and preferential voting. In seeking to explain this Australian Exceptionalism, the book covers a diverse range of issues: the strength and weakness of religion, democratic and undemocratic tendencies, the poverty of public debate, the role of elites, the exploitation of Australian sports stars, the politics of railways, the backwardness of agriculture, deviation from the Westminster system, the original encounter between European and Aboriginal cultures, and the heavy taxation of tobacco. Bringing together contributions from economists, economic historians, and political scientists, the volume seeks to understand why Australia is different. It offers a range of explanations from the 'historical legacy', to material factors, historical chance, and personalities.
