Organizational leaders, governments and trade unions all agree that learning is fundamental to organizational and economic success. The question is how it should best be supported. The Handbook of Work Based Learning delivers a compelling answer to this question. Learning needs to be based in the realities of organizational life. This unique, groundbreaking handbook provides a definitive guide to the set of strategies, tactics and methods for supporting work based learning. The three main parts of the Handbook, which focus in turn on strategies, tactics and methods, are written for both the learner and the professional developer alike. Each includes a description of the process (strategy, tactic or method), provides examples of what it looks like in action, explains the benefits and the likely limitations and provides a set of operating hints for applying the process. Nothing has been neglected, so alongside detailed descriptions of what to do and how to do it, the authors have included the Declaration on Learning, created by thirteen of the major figures in the field of organizational learning, a section guiding you towards routes for gaining qualifications, along with a well-researched set of references and further reading.

This comprehensive account of financial regulation and supervision in times of crisis analyses the complex changes under way regarding the new financial regulatory structures in the EU. Focusing on the organisation of financial supervision, it deals with the background to the reforms, the architecture of the regulatory system, the likely implications for the financial institutions and the challenge of international co-operation. Changes in the US have been heavily criticised and in Europe a brand new regulatory system with three new regulatory agencies and a systemic risk board has been developed. National systems are in the process of being updated. International cooperation, although still difficult, has made progress, with the Financial Stability Board now acting on behalf of the G.20. Central bank cooperation has improved significantly and in the meantime, sectoral regulations are being adapted in full speed, such as Basel III, AIDMD, MiFID and many others. This book gives an overall view of these complex changes. The first section of the book provides an assessment of the reforms and considers the background to their making. In the section on regulatory structure there is analysis of the new regulatory bodies, their complex competences and actions. The book also takes a critical look at their likely effectiveness. The final section of the work considers the actual implementation of the new rules in a cross-border context.

Journal of Human Services Abstracts

Addressing the practicalities of clinical supervision, this informative book follows the course of the supervision process, illustrating each stage with an absorbing blend of information, opinion, academic theory, anecdotal material, serious comment and thought-provoking exercises. Emphasis is placed on the purpose and value of clinical supervision, but also on the potential pitfalls those involved may encounter, and how they can be avoided. A number of theories and models are discussed with reference to each stage of supervision, providing a thought-provoking basis for the practical issues raised. Written in a lively and engaging style, this book will enable both supervisors and supervisees to get the best they can from the supervisory experience.

Lists citations to the National Health Planning Information Center's collection of health planning literature, government reports, and studies from May 1975 to January 1980.

A major focus is "artistry" in practice, which Holloway demonstrates using supervision interview transcripts, cases, and other examples of actual supervisory interactions. This guide provides impetus for supervisors to think about supervision as they make critical decisions in supervisory strategy, trainee skill development, and professional ethics.

The mission of the International Journal of Educational Reform (IJER) is to keep readers up-to-date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. As the only peer-reviewed scholarly publication that combines authors' voices without regard for the political affiliations perspectives, or research methodologies, IJER provides readers with a balanced view of all sides of the political and educational mainstream. To this end, IJER includes, but is not limited to, inquiry based and opinion pieces on developments in such areas as policy, administration, curriculum, instruction, law, and research. IJER should thus be of interest to professional educators with decision-making roles and policymakers at all levels turn since it provides a broad-based conversation between and among policymakers, practitioners, and academicians about reform goals, objectives, and methods for success throughout the world. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.

A book on social work supervision is desperately needed to bridge the gap between the demands of the field and the absence of literature.

Social Work Supervision: Contexts and Concepts aims to provide readers with basic knowledge of theories, research, and practice of supervision. The book addresses the needs of social work supervisors, frontline practitioners, students, and educators and contains a comprehensive literature review of the historical development, theories and models, and empirical research studies of the subject. Equally important, this is a book from practice experience in supervision that enhances the competence of supervisory practice. It will help social workers, supervisors, and administrators to realize and revitalize their "mission" in social work, that is, to benefit clients.
