The excessive risk-taking at banks might account for the failure of financial undertakings, as well as to systemic problems in the European Union and around the world. The inappropriate design of remuneration systems in many financial institutions is reported to induce such risk-taking. The EU regulators have intervened through legislative

measures which have been differently implemented in Member States. Such legislative measures face critics due to the restriction in banks' freedom of business. However, this book will point out that regulations are necessary and can be justified in order to protect the common good of a sound functioning financial market. Nevertheless, the effectiveness of current legislative provisions is challenged. Therefore, this book will critically analyse the legislation of bankers' remuneration, focussing on relevant EU, UK and German measures.

**Addressing the practicalities of clinical supervision, this informative book follows the course of the supervision process, illustrating each stage with an absorbing blend of information, opinion, academic theory, anecdotal material, serious comment and thought-provoking exercises. Emphasis is placed on the purpose and value of clinical supervision, but also on the potential pitfalls those involved may encounter, and how they can be avoided. A number of theories and models are discussed with reference to each stage of supervision, providing a thought-provoking basis for the practical issues raised. Written in a lively and engaging style, this book will enable both supervisors and supervisees to get the best they can from the supervisory experience.**

This paper discusses key findings of the Report on the Observance of Standards and Codes for Hong Kong Special Administrative Region (HKSAR). HKSAR has a very high level of compliance with the Basel Core Principles for Effective Banking Supervision. The Hong Kong Monetary Authority (HKMA) complements its high supervisory standards with a sustained commitment to the international regulatory reform agenda where it is an early adopter of many standards. The banking system is characterized by the dominant presence of institutions with foreign ownership, including the systemic banks, which puts a premium on the HKMA ' s role as a host supervisory authority.

Human Factors in the Nuclear Industry: A Systemic Approach to Safety presents the latest research and studies of human factors in the nuclear industry. It models and highlights scientific and technological foundations before providing practical examples of applications within the nuclear facility of human performance at an individual, group, organization, and system level. Editors Dr. Teperi and Dr. Gotcheva supply concrete models, tools and techniques based on research to provide the reader with knowledge of how to facilitate and support human performance in this dynamic and fast moving safety critical field. In this timely Handbook, over 30 prominent academics, practitioners and regulators from across the globe provide in-depth insights into an area of law that the recent global financial crisis has placed in the spotlight: bank insolvency law. Research Handbook on Crisis Management in the Banking Sector

discusses the rules that govern a bank insolvency from the perspectives of the various parties that are affected by these rules. Thus, whilst many bank insolvency rules have been enacted only recently and their application is still clouded by a host of uncertainties, this book takes the perspectives of the relevant authorities, of the bank and of the bank's counterparties. Providing a comprehensive approach to crisis management in the banking sector, this Handbook will prove a valuable resource for academics, postgraduate students, practitioners and international policymakers.
