Zombies. The outbreak began in New York. Soon it had spread to the rest of the world. People were attacked, infected, and they died. Then they came back. No one is safe from the undead. As anarchy and civil war took grip across the globe, Britain was quarantined. The British press was nationalised. Martial law, curfews and rationing were implemented. It wasn't enough. An evacuation was planned. The inland towns and cities of the United Kingdom were to be evacuated to defensive enclaves being built around the coast, the Scottish Highlands, and in the Irish Republic. Bill Wright, a Westminster insider and an advisor to a future Prime Minister, broke his leg on the day of the outbreak. Unable to join the evacuation, he watched from his window as the streets filled with refugees. He watched as the streets emptied once more. He watched as they filled up again, this time with the undead. Then the power went out. He is trapped. He is alone. He is running out of food and water. He knows that to reach the safety of the enclaves he will have to venture out into the wasteland that once was England. On that journey he will ultimately discover the horrific truth about the outbreak, a decades old conspiracy, and his unwitting part in it. This is the first volume of his journal. A stunning, powerful debut novel set against the backdrop of the Cambodian War, perfect for fans of Chris Cleave and Chimamanda Ngozi Adichie For seven-year-old Raami, the shattering end of childhood begins with the footsteps of her father returning home in the early dawn hours bringing details of the civil war that has overwhelmed the streets of Phnom Penh, Cambodia's capital. Soon the family's world of carefully guarded royal privilege is swept up in the chaos of revolution and forced exodus. Over the next four

years, as she endures the deaths of family members, starvation, and brutal forced labour, Raami clings to the only remaining vestige of childhood - the mythical legends and poems told to her by her father. In a climate of systematic violence where memory is sickness and justification for execution, Raami fights for her improbable survival. Displaying the author's extraordinary gift for language, *In the Shadow of the Banyan* is a testament to the transcendent power of narrative and a brilliantly wrought tale of human resilience. 'In the Shadow of the Banyan is one of the most extraordinary and beautiful acts of storytelling I have ever encountered' Chris Cleave, author of *The Other Hand* 'Ratner is a fearless writer, and the novel explores important themes such as power, the relationship between love and guilt, and class. Most remarkably, it depicts the lives of characters forced to live in extreme circumstances, and investigates how that changes them. To read *In the Shadow of the Banyan* is to be left with a profound sense of being witness to a tragedy of history' Guardian 'This is an extraordinary debut ... as beautiful as it is heartbreaking' Mail on Sunday

Trapped. Alone. Unconcerned. Eight months after the outbreak, Bill Wright is trapped during a survey mission in Ireland. Surrounded by the undead, low on food and lower on water, he's been in this situation before. Unlike before, help is only a rifle shot away. While waiting for the rescue he's sure will come, he records the turbulent events since his last entry. The Welsh island of Anglesey has become a sanctuary for survivors from across the zombie-infested world. It has electricity, wheat, and not much else. Medicines and equipment, plants and fertiliser, books and batteries, and so much more are needed if this last bastion of civilisation is to survive. Scavenging expeditions depart for Svalbard, Liverpool, and the southern Atlantic, but a discovery is made far nearer, one which will change the fate of all those who've come to call Anglesey home.

The dark will bring your worst nightmares to light in this gripping and eerie survival story, perfect for fans of James Dashner and Neil Gaiman. On Marin ' s island, sunrise doesn ' t come every twenty-four hours—it comes every twenty-eight years. Now the sun is just a sliver of light on the horizon. The weather is turning cold and the shadows are growing long. Because sunset triggers the tide to roll out hundreds of miles, the islanders are frantically preparing to sail south, where they will wait out the long Night. Marin and her twin brother, Kana, help their anxious parents ready the house for departure. Locks must be taken off doors. Furniture must be arranged. Tables must be set. The rituals are puzzling—bizarre, even—but none of the adults in town will discuss why it has to be done this way. Just as the ships are about to sail, a teenage boy goes missing—the twins ' friend Line. Marin and Kana are the only ones who know the truth about where Line ' s gone, and the only way to rescue him is by doing it themselves. But Night is falling. Their island is changing. And it may already be too late.

Fourteen months after the outbreak, thirteen months after the nuclear war, the old world is gone, but a new world is emerging. The evacuation of Britain failed, but other evacuations were a success. In Canberra, a new civilisation is being born, but in Canada, the survivors bid a last and final farewell to the Atlantic. While a final evacuation of Nova Scotia is planned, the search for lost communities begins. The journey takes Bill and Kim to the very end of the Earth, and to a meeting with familiar strangers. Crossing the border, Sholto endures a bittersweet return to the country he 'd embraced so many decades ago. The United States he remembered is gone, and yet he can see its shadow among the burned ruins and desolate towns of the American Northeast. But the rains soon turn to a flood that washes away the few bridges not destroyed during the failed quarantine. With no other escape from the deluge, they take to the river. On the Hudson, they sail into the middle of a civil war. When they learn one faction is led by the last surviving member of the political conspiracy that spawned the apocalypse, it is obvious which side to take. Set among the thawing wilderness of Quebec and Ontario, the swollen rivers and flooded roads of New York, and in the courtrooms of Canberra, this novel includes characters and events from the five-part Pacific-based series *Life Goes On*.

As one year ends, and our old world fades into

memory, a new future is born. On a frozen archipelago, where it is too cold to farm, a few thousand survivors from across the Atlantic have found a refuge. The arduous process of turning a sanctuary into a home begins once more for these weary travellers who 've been chased from Britain, from Ireland, from France and Denmark. But their work is not yet done. The missing Marines cannot be left behind. The French and Ukrainians cannot be abandoned. The cartel can never be forgotten. As soldiers once again become civilians, the dangers of malnutrition replace the everyday spectre of starvation. Potential mutiny supersedes being overrun by the undead. Boredom replaces fear. Slowly, they relax, allowing themselves to enjoy the simple pleasure of music and plays, of weddings and births, of life without the imminent prospect of death. But all is not what it seems in the snowy wastes surrounding their town. While Europe is a zombie-filled radioactive wasteland, there are other continents. Other oceans. Other survivors. Other communities, just like their own, who will fight to keep what they 've the clawed from the grip of the apocalyptic nightmare. Set in Northern Europe, Eastern Canada, and the tumultuous seas between, as one year ends, and a new civilisation dawns.

Outback Outbreak

The Beresford

Surviving The Evacuation, Book 17: There We Stood

The outbreak changed everything, but there are some bonds even the undead can't break. It's been six years since Pete Guinn last saw his sister, Corrie. He always hoped to see her again, but feared she was dead. When an elusive billionaire reveals Corrie is living under an assumed name in the Australian outback, Pete unquestioningly jumps at the chance of a reunion. But you can't win the lottery without buying a ticket, and billionaires don't do favours for free. Corrie is in hiding from her old employer, and from the Rosewood Cartel. Now that they've both found her, only a miracle can save the two siblings, and what happens in Manhattan can't be described as miraculous. What begins as a viral outbreak soon turns into an impossible horror. People are infected and die, only to rise up and continue transmitting the infection. Even as the army is mobilised, the virus spreads beyond the borders of the United States. Nowhere is safe from the living dead. As Australia is quarantined, the mining town of Broken Hill becomes a transit hub for the relief effort. Tourists are evacuated while civilians are conscripted, Pete and Corrie among them. Together with a bush pilot, a flying doctor, and an outback cop, the struggle to

maintain civilisation begins. Supplies run low. Looting is rampant. Laws are forgotten, especially by the cartel who haven't abandoned their search for Corrie and their quest for revenge. Set in Broken Hill and beyond as the Australian quarantine begins. As this book returns to the beginning of the outbreak, it can be considered a good entry point for readers new to the series.

Discover how human beings react to danger—and what makes the difference between life and death “Fascinating and useful . . . [shows that] the most important variable in an emergency is your own behavior.”—The New York Times Today, nine out of ten Americans live in places at significant risk of earthquakes, hurricanes, tornadoes, terrorism, or other disasters. Tomorrow, some of us will have to make split-second choices to save ourselves and our families. How will we react? What will it feel like? Will we be heroes or victims? In her quest to answer these questions, award-winning journalist Amanda Ripley traces human responses to some of recent history’s epic disasters, from the explosion of the Mont Blanc munitions ship in 1917—one of the biggest explosions before the invention of the atomic bomb—to the journeys of the 15,000 people who found their way out of the World Trade Center on September 11, 2001. To understand the science behind the stories, Ripley turns to leading brain scientists, trauma psychologists, and other disaster

experts. She even has her own brain examined by military researchers and experiences, through realistic simulations, what it might be like to survive a plane crash into the ocean or to escape a raging fire. Ripley comes back with precious wisdom about the surprising humanity of crowds, the elegance of the brain's fear circuits, and the stunning inadequacy of many of our evolutionary responses. Most unexpectedly, she discovers the brain's ability to do much, much better—with just a little help.

For good or ill, the future has begun. After the outbreak came the nuclear war. The blasts killed millions. Chaos followed. Most of those unlucky enough not to succumb to starvation and disease joined the ranks of the living dead. Fleeing the impossible nightmare, ten thousand, from nations across the Atlantic seaboard, found refuge on the Welsh island of Anglesey. There, they should have been safe. There, they should have been able to rebuild. There, they were betrayed. Forced to flee once more, a hasty exodus was planned, but those plans were sabotaged. The survivors became scattered across the island of Ireland. Old-world supplies are scarce, hope is running out, and safety is just a memory. The snow has come, and though rain will soon follow, winter has truly begun. In Dundalk, eight hundred survivors have occupied a local college, but the campus is too dispersed to

defend. As they scour the snow-covered town for a safe route to the sea, they find signs of long-fled survivors and answers to a question they hadn't asked. In Belfast, the situation is increasingly precarious. There are saboteurs in their midst. As the investigation into their identity slowly progresses, the terrorists continue to plot. Rumours of a mutiny escalate into a riot, while an unseen clock ticks ever closer towards humanity's destruction. Set in Belfast and Dundalk, over three days that change everything.

Not all people died. Not all gave up hope. The outbreak was in February. By the end of November, Earth has become a hellish wasteland ravaged by the undead. Survivors from across the Atlantic seaboard took refuge on the Welsh island of Anglesey. Beset by dangers from within, they departed to establish a new refuge in Belfast. Not all of them arrived. Six took the last plane on its last flight, but crashed in France. Expecting a sprinting battle through the ruins of Belfast, they packed light. With few weapons and barely any food, their chances of survival are slim. The chances of rescue are slimmer. There was no evacuation in France. No quarantine. No rationing. But there are zombies, and there are people who believe they, alone, are the last survivors of the old-world. So begins a frantic race against the undead, through the snow and storm ravaged ruins of

A Novel (Book Two of The Passage Trilogy)

Red River Rising

If not us, who? If not now, when? As the much-depleted United Nations meets in Canberra, the scale of the global catastrophe becomes clear. The tsunami left Brisbane a flooded ruin. Vanuatu has disappeared. The Madagascan evacuation has failed. Vancouver has been reduced to a radioactive crater. For as far west as Mozambique, as far to the east as Chile, and as far north as Canada, the world is a catalogue of devastation. From the Atlantic, there has been no news since the early days of the outbreak, four weeks ago. With the satellite networks down, searching for survivors is difficult. With the relief

fleets destroyed, rescue is impossible. While the fallout is still settling, the collective minds of the refugees in Australia focus on rebuilding as a distraction from the rising risk of radiation and extinction.

Commissioner Tess Qwong has a different duty. She must find those responsible for this ultimate crime against humanity. Her investigation into the failed coup provides the identity of those behind the outbreak and the location of their lab. With her misfit group of Special Forces and civilian conscripts, she heads to Mozambique. There, a New Zealand frigate will take them on into the unknown dangers of the Atlantic. But while they hunt the radioactive seas for the war criminals, below the waves their enemy is hunting for them. From Perth to Panama, from South Africa to South America, from paradise islands to radioactive wastelands, the battle against extinction continues.

Newbery Honor author Rodman Philbrick sends readers straight into the nightmare of a raging wildfire as 12-year-old Sam is trapped by explosive flames and deadly smoke that threaten to take his life. Can he survive? Flames race toward Sam Castine's summer camp as evacuation buses are loading, but Sam runs back to get his phone. Suddenly, a flash of heat blasts him as pine trees explode. Now a wall of fire separates Sam from his bus, and there's only one thing to do: Run for his life. Run or die. Lungs burning, Sam's only goal is to keep moving. Drought has made the forest a tinderbox, and Sam struggles to remember survival tricks he learned from his late father. Then, when he least expects it, he encounters Delphy, an older girl who is also lost. Their unlikely friendship grows as they join forces to find civilization. The pace never slows, and eventually flames surround Sam and Delphy on all sides. A powerful bond is forged that can only grow out of true hardship -- as two true friends beat all odds and outwit one of the deadliest fires ever. At the end of the novel, information about wildfires and useful safety tips add to the reader's understanding of one of the US's most dangerous natural disasters. Whoever wins the election, humanity will lose. Nine

months after the outbreak, ten thousand survivors from across the globe have found a refuge on the Welsh island of Anglesey. Hordes of the undead ravage the wastelands of Britain and Ireland.

Satellite images show that the rest of the world is no better. Food, fuel, and ammunition are running low and there are no more old-world supplies with which to replace them. Intended as an alternative to a slide into despotism, an election is called. It is hoped the contest will bring forth solutions to the myriad crises facing this last bastion of humanity. After the favoured candidate is hospitalised, suspicion falls on the new frontrunner, a publican who purchased his support with an impossible promise of a return to the pre-apocalyptic world. With no viable candidate, and no way of calling off the election, those who still have access to a ship plan their departure; others plan to rig the contest; a few give up on all plans for a future beyond tomorrow. Anglesey is on the verge of collapse, and humanity is on the brink of extinction. Set in Belfast, the Isle of Man, and Wales during the run-up to the election on Anglesey, this is the sixth volume of Bill Wright's journals.

"A practical, all-encompassing guide to disaster preparedness-from avalanches and blackouts to pandemics and wildfires-from NBC News senior medical correspondent and emergency medicine physician Dr. John Torres"--

There is always hope. Northern France is a frozen morass of mud and snow across which rampages a horde of the undead, a hundred million strong. That

won't stop Chester Carson and his comrades. Seeking a way across the Channel, they make for the coast, unaware that Britain has been abandoned, Belfast is a ruin, and that radiation is seeping into the Irish Sea. If they knew, that wouldn't stop them either. They're on a quest to save their family, their friends, and humanity itself; failure is not an option. As they journey through war-ravaged ports and storm-wrecked beaches, a new truth becomes clear. The flotilla that found refuge on Anglesey wasn't the only group of sea-borne refugees to have survived the outbreak. There are other survivors. Some good, some evil, some just determined to do their duty no matter the cost. Danger lurks along the French and Belgian coasts. So do answers, and hope that humanity now has a future.

Not all survivors are to be trusted. Not all the conspirators are dead. February: Within hours of the outbreak, the quarantine was sabotaged. Within days, the world was gripped by civil war. March: When the lights finally went out, billions were dead. Millions more had joined the ranks of the undead. May: Anglesey has

become home to nearly ten thousand survivors from across the Atlantic. While there is still danger from the undead on the mainland, there is hope. Hope that the zombies might die, hope that the electricity supply might be restored, and hope that more survivors will be found. Hope is not enough. Sergeant Branofski and Chester Carson venture into northern Wales to set up a network of safe houses that will provide a route to Anglesey for those still trapped in the wasteland. Though they find survivors, they discover something far worse.

September: Nowhere is safe from the living dead, not even The Tower of London. The ancient fortress has become home to nearly a hundred people. Food is scarce and the undead are many. The survivors are doomed unless help can be found, but the only place it can come from is Anglesey. Eamonn Finnegan sets out alone to seek their salvation. He never reaches Wales.

November: In her heart, Greta knows that Eamonn is dead, yet she has to look for her lost love because he would look for her. Chester joins her in the futile quest to ensure the search doesn't cost Greta her life. Before their journey has barely begun, they discover an old foe that they thought was dead. Within a few minutes of the outbreak, Manhattan was overrun by the living dead. Within a few days, the undead had reached every corner of the globe. Ireland was no exception. There was no evacuation of Northern Ireland, and no quarantine in the Republic. A Royal Naval blockade prevented ships from docking, but they

didn't prevent those who could reach the coast from fleeing by sea. There weren't enough boats for everyone. Those who were left behind took refuge in castles, police stations, churches, military bases, and any other buildings with strong walls. The walls weren't strong enough. Eight months later, there are only a few dozen survivors left on the entire island of Ireland. They are certain that there is no safe refuge anywhere on the planet. Stranded on the southwestern Atlantic coast of the Irish Republic, Bill and Kim head north. They know that there is a safe haven on Anglesey, but that is hundreds of miles of undead Ireland and a treacherous sea crossing away. They begin a journey on which they will have to rescue the innocent and confront the past before they can embrace the future. Set on the island of Ireland, eight months after the outbreak, this is the next volume of Bill Wright's journals.

When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across

England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature. NEW YORK TIMES BESTSELLER • The little-known true story of Marie-Madeleine Fourcade, the woman who headed the largest spy network in occupied France during World War II, from the bestselling author of Citizens of London and Last Hope Island “Brava to Lynne Olson for a biography that should challenge any outdated assumptions about who deserves to be called a hero.”—The Washington Post NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR AND THE WASHINGTON POST In 1941 a thirty-one-year-old Frenchwoman, a young mother born to privilege and known for her beauty and glamour, became the leader of a vast intelligence organization—the only woman to serve as a chef de résistance during the war. Strong-willed, independent, and a lifelong rebel against her country’s conservative, patriarchal society, Marie-Madeleine Fourcade was temperamentally made for the job. Her group’s name was Alliance, but

the Gestapo dubbed it Noah's Ark because its agents used the names of animals as their aliases. The name Marie-Madeleine chose for herself was Hedgehog: a tough little animal, unthreatening in appearance, that, as a colleague of hers put it, "even a lion would hesitate to bite." No other French spy network lasted as long or supplied as much crucial intelligence—including providing American and British military commanders with a 55-foot-long map of the beaches and roads on which the Allies would land on D-Day—as Alliance. The Gestapo pursued them relentlessly, capturing, torturing, and executing hundreds of its three thousand agents, including Fourcade's own lover and many of her key spies. Although Fourcade, the mother of two young children, moved her headquarters every few weeks, constantly changing her hair color, clothing, and identity, she was captured twice by the Nazis. Both times she managed to escape—once by slipping naked through the bars of her jail cell—and continued to hold her network together even as it repeatedly threatened to crumble around her. Now, in this dramatic account of the war that split France in two and forced its people to live side by side with their hated German occupiers, Lynne Olson tells the fascinating

story of a woman who stood up for her nation, her fellow citizens, and herself. "Fast-paced and impressively researched . . . Olson writes with verve and a historian's authority. . . . With this gripping tale, Lynne Olson pays [Marie-Madeleine Fourcade] what history has so far denied her. France, slow to confront the stain of Vichy, would do well to finally honor a fighter most of us would want in our foxhole."—The New York Times Book Review

Anglesey became a refuge for survivors from across the world, but living in the shadow of a decrepit nuclear power station was always a precarious existence. There is only one destination for their final exodus from Britain, but Belfast won't become their new home. There are fewer undead on the island of Ireland, but their numbers still count in the millions. With farming impossible, with the weather worsening, with ammunition exhausted, desperation turns to despair. All seems bleak, but the survivors don't know how truly desperate their situation is. During the chaos that ensued after the calamitous election, they misjudged the evidence. Their true enemy is still among them, and that enemy is about to act. Set nine months after the outbreak, in Britain and the island of Ireland, when humanity is at a crossroads. Either all will survive, or our species will die.

Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Billions died during the global civil war that followed the outbreak. Anarchy took grip. Chaos ruled. The world collapsed. In Britain, the evacuation failed. Nowhere was safe from the undead. Four months after the outbreak Bill Wright has found safety in a ruined Abbey in southern England, but he is still alone. All he has for company are the files sent to him by his shadowy contact, Sholto. On those, he believes he has found the origins of the undead, and the vast conspiracy in which he discovers he played an unwitting part. He needs answers, and knows the only place they will be found is at the facility that created the virus. As he journeys through the desolate ruins of a dead civilisation, he meets other survivors. He rescues some, is rescued by others, but ultimately discovers that zombies are not the most deadly threat in an undead wasteland. This is the second volume of his journal. (76,000 words)
