An insight into the design, construction and operation of the Royal Navy's classic search and rescue helicopter. For more than 25 years the Agusta Westland Sea King has been that most welcome of sights around the English coast, providing essential Search and Rescue (SAR) capabilities for those in peril both on land and at sea. The Royal Navy variant - the Sea King HU Mk 5, which is the main focus of this book - is estimated to have saved literally hundreds of lives. Author and photographer Lee Howard has been given privileged official access to the Navy's SAR air and ground crews to offer fascinating insights into operating, flying and maintaining the Sea King.

Two strategic initiatives out of three fail. They are actually a huge challenge for more-of-the-same, better-and-better, companies. Indeed, their cross-organization scope violates all principles of silo efficiency. Strategic initiatives are precisely not more of the same. Smarter Execution identifies seven key steps that managers need to get to grips with if they are to reap the full benefits of their strategic initiatives: Focus first - less is more Pick the best possible team - don't compromise Set the course - learn to navigate to a destination that is not yet fully defined Set up to win.

Dubbed 'Warthog' - or just 'Hog' - by those who fly and maintain it, the Fairchild Republic A-10 Thunderbolt II is the world's undisputed close air support attack jet. As tough as it is ugly, it has built a fearsome reputation as a tank buster and infantry killer in conflicts around the globe, and its GAU-8 Avenger 30mm cannon strikes fear into the hearts of all unlucky enough to be on the wrong side of it. he A-10 was clutched from the jaws of retirement by the 1991 Gulf War. At the time of the conflict, the United States Air Force was making

plans to shed it's A-10 fleet, citing obsolescence and redundancy. As the ensuing conflict showed, nothing could have been further from the truth, and no other airframe could have provided the US and Coalition commanders with the sort of forward air control, close air support, combat search and rescue, and tank busting capabilities that the Hog did. Since then the A-10 has delivered capabilities to battlefield commanders in the Balkans (1990s), Afghanistan (2001 onwards) and the second Gulf War (2003 onwards), and Libya (2011). A-10s have flown around 11 per cent of Operation Inherent Resolve sorties (striking IS targets in Iraq) since combat operations began in August 2014.
