A motorcycle's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle's function—the more useful, even critical, it will be to know something about them. That's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle's electrical system, along the way giving clear, step-by-step instructions for diagnosing specific problems.

Everything you need to know to restore or customize your classic Japanese motorcycle. Whether you want to correctly restore a classic Japanese motorcycle or create a modified, custom build, you need the right information about how to perform the mechanical and cosmetic

tasks required to get an old, frequently neglected, and often long-unridden machine back in working order. How to Rebuild and Restore Classic Japanese Motorcycles is your thorough, hands-on manual, covering all the mechanical subsystems that make up a motorcycle. From

finding a bike to planning your project to dealing with each mechanical system, How to Rebuild and Restore Classic Japanese Motorcycles includes everything you need to know to get your classic back on the road. Japanese motorcycles have been the best-selling bikes in the world since the mid-1960s, driven by the "big four": Honda, Yamaha, Suzuki, and Kawasaki. Of course certain bikes have always had a following - Honda CB750, 305 Hawk, CB400-4, Benly; Suzuki GT750, Katana, GS1000S; Yamaha XS650, RD400 Daytona, TZ; Kawaski H1, H2, Z1R - and these have now become the blue-chip Japanese bikes leading collectors to seek out more common (and now more affordable) alternatives. This is the perfect book for anyone interested in classic Japanese motorcycles, as well as prepping a bike to build a cafe racer, street tracker, or other custom build.

In 1974, Honda took the wraps off a 1000cc flat four with shaft drive and water cooling, and the Honda Gold Wing was born. Renowned photographer Malcolm Birkitt has included coverage of Honda's dynamic, new Valkyrie in this update of his best-selling Honda Gold Wing title, as well as examining all the changes in the Gold Wing since 1995. Included are intriguing early design sketches and portraits by Honda's designers and engineers.

Aside from the odd four-stroke built in their formative years, it wasn't until 1976 that Suzuki manufactured such machines in significant numbers. Until then, it was two-strokes all the way. These models, many of which were the basis of successful racers, carried names like Titan, Cobra, Sebring, LeMans, Kettle, and Water Buffalo along with their codes. The author examines these models and others, providing the reader with: -- Extensive specification tables high lighting the variations in seemingly similar models -- Information to help the reader match model and marketing codes, essential when ordering parts or servicing a machine -- A model chart that matches full codes to their exact year, shows the cars in which models were built, and explains the relationship between similar codes Also included is the RE5 with its rotary engine and unique styling, and Suzuki's minute but complex road racers, which carried as many as 14 speeds in their gearboxes. Illustrated throughout with black-and-white photographs of the models and their variants.

Life has gotten a bit boring for Zuria Johnston, and with the exception of her Friday nights out with her best, flamboyant friend, Chase, and her job as a guidance counselor, she seems to have hit a rut. After a rough break-up with her longtime boyfriend, Manuel, her prospects of finding a man also seem pretty bleak. That is, until she connects with her poetic crush, Amir, and he opens her eyes to a world of romance and passion that she didn't know existed. She discovers what it feels like to be loved as a real woman should, and to overcome the difficulties of being a young, strong, black woman who is afraid to have her heart broken for a second time. The thrill of new romance seems to fill the emptiness in her life, but her old life isn't as easy to escape as she first thought. Mistakes that she thought she had left behind threaten to undo everything that she has begun to build in this new chapter of her life, but she isn't the only one battling the demons of her past. The poetic and passionate Amir harbors some dark secrets of his own, and when the truth begins to come out, the connection between her two lovers, old and new, may end her short reign of happiness before it ever fully begun. With love from one man and sworn vengeance from another, Zuria is trapped in the middle, trying desperately to make her way through the tangled troubles of family, love, and happiness. The problem is, she might lose more than the man of her dreams. As this complex and spellbinding story reaches its peak, Zuria will have to risk mind, body, and soul for herself and the people she loves, but will that final risk mean achieving the life she'd always dreamed of? Or will she end up making the ultimate sacrifice?
