The vast range of vehicles depicted includes mainstream off-roaders, and Sports Utility Vehicles (SUVs), as well as more unusual vehicles such as the pre-war Citroen half-track and "Monster" 4x4 pick-ups, and a look at concept vehicles that point the way to the future. An index makes the manual easy to navigate.

By 250 AD, Christianity had spread throughout India and China. Known as the Shining Religion or the Luminous Teaching, it drew adherents from Buddhism and Hinduism who were seeking a faith that taught the possibility of achieving a society founded on love and compassion for their fellow man. The new doctrine reached the island nation of Japan where it was so well received that Christianity threatened to supplant Buddhism as the dominant religion. By the close of the 16th century Japanese Christians numbered in the millions. Fifty years later Christianity was officially proscribed and Christians faced execution for openly practicing their faith. Jesus and the Samurai tells their fascinating story with facts drawn from ancient and modern sources.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

More than a memoir of a custom cafe racer build this book is a tribute to a teacher who inspired young people to be creative with their minds and capable with their hands. Growing up in Fargo, North Dakota in the 1970s and 80s, The Urban Monk had the opportunity to develop a love for machines, metal working and motorcycles. This book provides a glimpse into what life was like for the author and his young friends in Fargo during that time. It is also a poignant defense of industrial arts education in public schools. After an over three year effort building a custom cafe racer in his spare time and documenting the entire process in videos shared with the world on his YouTube channel Urban Monk TV, the author tells the story of how this project became more than a custom motorcycle build - it became a tribute to his middle school Metal Shop teacher who inspired him to go on to a life time of peaceful meditation in his garage with a wrench in his hand. Anyone interested in motorcycles, mechanics, do-it-yourself projects or a historical retrospective of life in 70s-80s Fargo will enjoy this pleasant read.
