***More than a memoir of a custom cafe racer build this book is a tribute to a teacher who inspired young people to be creative with their minds and capable with their hands.***

***Growing up in Fargo, North Dakota in the 1970s and 80s, The Urban Monk had the opportunity to develop a love for machines, metal working and motorcycles. This book provides a glimpse into what life was like for the author and his young friends in Fargo during that time. It is also a poignant defense of industrial arts education in public schools. After an over three year effort building a custom cafe racer in his spare time and documenting the entire process in videos shared with the world on his YouTube channel Urban Monk TV, the author tells the story of how this project became more than a custom motorcycle build - it became a tribute to his middle school Metal Shop teacher who inspired him to go on to a life time of peaceful meditation in his garage with a wrench in his hand. Anyone interested in motorcycles, mechanics, do-it-yourself projects or a historical retrospective of life in 70s-80s Fargo will enjoy this pleasant read.***

Dirt Rider magazine publishes monthly one-page riding technique features. Emap magazines survey their readers every month, and the survey results show that bike tests rank first and riding techniques second. Dirt Rider presents these tip features by showing a well-known pro rider going step-by-step through a difficult obstacle. This book features the last five years of these motocross riding techniques in one volume.

**Bernt Spiegel's The Upper Half of the Motorcycle was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set.**

By 250 AD, Christianity had spread throughout India and China. Known as the Shining Religion or the Luminous Teaching, it drew adherents from Buddhism and Hinduism who were seeking a faith that taught the possibility of achieving a society founded on love and compassion for their fellow man. The new doctrine reached the island nation of Japan where it was so well received that Christianity threatened to supplant Buddhism as the dominant religion. By the close of the 16th century Japanese Christians numbered in the millions. Fifty years later Christianity was officially proscribed and Christians faced execution for openly practicing their faith. Jesus and the Samurai tells their fascinating story with facts drawn from ancient and modern sources. The Complete Idiot's Guide to Motorcycles, Fourth Edition, is the most complete book on motorcycles, covering everything from how to choose and maintain a motorcycle and how to buy appropriate gear, to how to ride safely, and how to make the most out of trips on the open road.
