

## Switch Off My Lights

A complete ICT course for children from five years of age.

In the 5G era, edge computing and new ecosystems of mobile microservices enable new business models, strategies, and competitive advantage. Focusing on microservices, this book introduces the essential concepts, technologies, and trade-offs in the edge computing architectural stack, providing for widespread adoption and dissemination. The book elucidates the concepts, architectures, well-defined building blocks, and prototypes for mobile microservice platforms and pervasive application development, as well as the implementation and configuration of service middleware and AI-based microservices. A goal-oriented service composition model is then proposed by the author, allowing for an economic assessment of connected, smart mobile services. Based on this model, costs can be minimized through statistical workload aggregation effects or backhaul data transport reduction, and customer experience and safety can be enhanced through reduced response times. This title will be a useful guide for students and IT professionals to get started with microservices and when studying the use of microservices in pervasive applications. It will also appeal to researchers and students studying software architecture and service-oriented computing, and especially those interested in edge computing, pervasive computing, the Internet of Things, and mobile microservices.

"A lightning bolt of a literary debut." ---Adam Johnson, Pulitzer Prize winner "Enchanting and so neatly planed they feel made by time, these stories mark the debut of a writer to watch." ---John Freeman, Literary Hub Last One Out Shut Off the Lights is an evocative portrait of the last-chance towns of southwest Louisiana, where oil development, industrial pollution, dying wetlands, and the ever-present threat of devastating hurricanes have eroded their inhabitants' sense of home. These eleven piercing stories feature indelible characters struggling to find a foothold in a world that is forever washing out from under them, people who must reckon with their ambivalence about belonging to a place so continually in flux. In a collection whose resonant echoes abound, we meet a reluctant teenage mother who stows her baby in a closet to steal a night out; a spiteful retiree who sabotages his neighbor in the wake of a hurricane; a Pentecostal singer in a children's theater company who confronts the cultish leader of her troupe; a community of elderly Cajuns who conspire with a family of Sudanese immigrants to hide an escaped cow from the authorities; and a desperate young woman who tries to drag her brother to Mexico for surgery, determined to save his life and her own. As Lauren Groff did for the state of Florida in her recent collection Florida, Stephanie Soileau demonstrates that Louisiana is as much a state of mind as it is a place on the map. A love letter to the Cajun language, life rhythms, and customs that still make the region unique, Last One Out Shut Off the Lights is also a powerful reminder of the treacherous escape routes that bedevil anyone longing to leave home, and the traps that remain for those who desire to return.

Unsurpassed in coverage of the theory and procedures for automotive electricity and electronics, the newest edition of this highly successful classroom and shop manual is guaranteed to instill both the knowledge and skills critical to success in the industry. TODAY'S TECHNICIAN: AUTOMOTIVE ELECTRICITY & ELECTRONICS, 5TH EDITION has been updated to offer a more streamlined presentation of diagnostic and service procedures, as well as additional attention to data bus networks, including the CAN, LIN, ISO, and other common systems. The book also features expanded coverage of vehicle accessory systems, including the new multi-stage air bag systems, weight classification systems, side air bag systems, and laser-guided cruise control systems. An all-new chapter on hybrid and high voltage systems rounds out the up-to-date content, ensuring readers gain a strong working knowledge that of the latest industry trends and technologies. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

When the Floods Came

ELEMENTS OF ENGLISH GRAMMAR

**The COVID-19 pandemic drastically transformed the classroom by keeping students and teachers apart for the sake of safety. As schools emptied, remote learning rapidly expanded through online services and video chatrooms.**

**Unfortunately, this disrupted many students and teachers who were not accustomed to remote classrooms. This challenge has forced K-12 teachers to think differently about teaching. Unexpectedly and with little time to prepare, they have been confronted with redesigning their curriculum and instruction from face-to-face to online virtual classrooms to protect students from the COVID-19 virus while ensuring that these new online initiatives remain sustainable and useful in the post-pandemic world. As teachers learn to take advantage of the affordances and strengths of the multiple technologies available for virtual classroom instruction, their instruction both in online and face-to-face will impact what and how students learn in the 21st century. The Handbook of Research on Transforming Teachers’ Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning examines the best practices and pedagogical reasoning for designing online strategies that work for K-12 virtual learning. The initial section provides foundational pedagogical ideas for constructing engaging virtual learning environments that leverage the unique strengths and opportunities while avoiding the weaknesses and threats of the online world. The following chapters present instructional strategies for multiple grade levels and content areas: best practices that work, clearly describing why they work, and the teachers’ pedagogical reasoning that supports online implementations. The chapters provide ways to think about teaching in virtual environments that can be used to guide instructional strategy choices and recognizes the fundamental differences between face-to-face and virtual environments as an essential design component. Covering such topics as K-12 classrooms, pedagogical reasoning, and virtual learning, this text is perfect for professors, teachers, students, educational designers and developers, instructional technology faculty, distance learning faculty, and researchers interested in the subject.**

**What if memory and learning could improve after eating certain foods—such as blueberries—high in plant chemicals called flavonols? What if primal ways of moving the body strengthen kids' working memory and mental flexibility? What if receiving the right types of touch translate into better emotional control and self-regulation? These and many more questions led Pincott to simple, all-natural "biohacks"—or experiments inspired by current research and theory—complete with instructions on how to undertake them to help your own children strengthen their wits, guts, and grit.**

**When you walk into a room and flip a light switch, a lightbulb turns on, illuminating the area. But how does one small switch do such a large job? Why Do the Lights Turn On? enlightens readers about the science behind electricity and circuits through full-color illustrations and photographs.**

**The Mighty Mustang You Can Take a Soldier Out of the Army but Not the Army Out of the Soldier Written in a lucid style this book is a very comprehensive effort to teach the students of English language effective communication and writing skills. It will prove very useful for beginners as well-advanced readers who want to master the art of good English writing and speaking. The book is exceptional and wide ranging in understanding and overcoming the difficulties' students of English grammar face in everyday use of the language in variety of situations from social to professional. Combined with communication, personality development, interview technique etc. and the inclusive exercises for students of all levels "English Language and Personality" is indeed a unique and extremely useful book. A MUST FOR ALL LEARNERS KEEN TO MASTER THE ENGLISH LANGUAGE COMMENT- Sri Anil Prakash has taken great pains to write this book on English Grammar keeping in view the needs of the Indian students for whom English is a second Language. He has combined grammar with communicative needs of the learners. Therefore, this book is bound to be very useful for both teachers and the students. Anil Prakash has kept away from the cumbersome method of overemphasis on the intricate rules and exceptions. He has presented the rules of English Grammar with clarity. Moreover, He has given a variety of exercises for students of different levels. He has not only covered the needed aspects of English Grammar in the Indian context but has also given various types of examples and exercises which will be of great help for school, college and competitive examinations.**

This two-volume set constitutes the refereed proceedings of the 15th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2021, held as part of the 23rd International Conference, HCI International 2021, held as a virtual event, in July 2021. The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. UAHCI 2021 includes a total of 84 papers; they focus on topics related to universal access methods, techniques and practices, studies on accessibility, design for all, usability, UX and technology acceptance, emotion and behavior recognition for universal access, accessible media, access to learning and education, as well universal access to virtual and intelligent assistive environments.

Essays by Thomas Frank, Clay Shirky, David Simon, and others: “ Anyone concerned about the state of journalism should read this book. ” —Library Journal The sudden meltdown of the news media has sparked one of the liveliest debates in recent memory, with an outpouring of opinion and analysis crackling across journals, the blogosphere, and academic publications. Yet, until now, we have lacked a comprehensive and accessible introduction to this new and shifting terrain. In Will the Last Reporter Please Turn Out the Lights, celebrated media analysts Robert W. McChesney and Victor Pickard have assembled thirty-two illuminating pieces on the crisis in journalism, revised and updated for this volume. Featuring some of today ’ s most incisive and influential commentators, this comprehensive collection contextualizes the predicament faced by the news media industry through a concise history of modern journalism, a hard-hitting analysis of the structural and financial causes of news media ’ s sudden collapse, and deeply informed proposals for how the vital role of journalism might be rescued from impending disaster. Sure to become the essential guide to the journalism crisis, Will the Last Reporter Please Turn Out the Lights is both a primer on the news media today and a chronicle of a key historical moment in the transformation of the press.

Turn off the Lights is a combined work of poetry that includes all the poems from my first chapbook, Owl’s Moonlight. It is a collection of poetry dating back to my teenage years that covers a variety of themes including love, heartbreak, pain, depression, mental health, and concussions. In essence, this is a second edition. Growing up there was an unwritten rule that men should not express their feelings. As a teenager it is rather difficult to keep your emotions bottled up. You are navigating the social realm of high school and learning who you are. Why poetry? I hit some rocky moments in high school that my English teacher noticed. He would frequently give me heck for declining grades and slacking off. The best piece of advice he gave me was about my feelings and writing. He told me that as men, we may not share our feelings with others very often, but there is nothing stopping us from writing to ourselves. Write poetry. Reflect on your work each year. You will learn a great deal about yourself, especially when you are older. Make a cup of coffee and dive in.

This collection of thought-provoking essays challenges librarians to consider the future of the profession, particularly as it relates to the Web, the library as place, delivering services to the desktop, certification, and the future of professional associations.

Who Turned Off the Lights?

**This was first published in 1975 and was so popular that it quickly sold out. Brightonian, Daisy Noakes, tells her story from the age of fourteen, when she went into service. She gives us an insight into the life of a woman born and brought up in Brighton. Daisy documents - with humour - her inevitable trials and tribulations in the often physically demanding world that she inhabited during her working life. The autobiography covers her childhood, as one of a family of ten, living in Prince's Road and Vere Road, and her working days in service in different parts of the town. This is a special insight into Daisy's world and is a shining example of true grit and fortitude!**

**Lemmer's First Law: Don't get involved. But when Emma le Roux looks at him with pleading eyes, when the roof of his Karoo house needs big repairs, when the cause is good and just, laws can be broken. So he sighs, and says, yes, he'll ride shotgun for two rare black rhinos. Bad decision. Because on a dark and dusty road in Limpopo, they stick a Smith & Wesson Model 500 against his head. They kick him and beat him, they lie, they deceive him, and they steal his Glock, the one with his fingerprints all over it. They should have killed him. And now he goes after them--the start of a trail of violence that will run the length and breadth of a country, and touch many lives. It will leave a trail of blood through the first private-investigation dossier of former cop Mat Joubert. It's a "fifty-five," police slang for a missing persons case. It will stomp fear and horror through the life of Milla Strachan, who walked out on her rich, cheating husband and abusive teenage son to start a new life. A trail of death, stretching from the Chizarira to the Cape Waterfront. And at the end of it, nobody will be untouched.**

**Piery collection of poetry provides a glance back at a lifetime of learning, loving, grieving, and fighting for the disenfranchised; and a look forward at what the future holds for herself, her family and friends, and her embattled country. It is a bountiful group of poems that reflect on language, nature, old age, young love, Judaism, and our current politics-- all in her usual direct and mind-tingling fashion. -- adapted from publisher info**

**"This updated and expanded third edition continues the theme of the second edition of providing extensive research findings in all types of electrical fires. This book describes in a practical and easy-to-understand manner the patterns of electrical fires which make it easier to determine where an electrical fire started. Specific topics include: (1) the general background and essential elements of fire initiation; (2) codes and standards, testing laboratories approval, non-electrical fires, arc mapping and V-patterns; (3) disassembly of equipment, nameplates, equipment misuse, abuse, and repair; (4) the gathering, preserving, and shipping of evidence, keeping records; (5) common clues, melting points, and insulation degradation; (6) common components, moveable contacts, switches and relays, circuit breakers and panels, conduit joints, heating elements; (7) appliances, wall outlets and switches, light bulbs, reversed polarity; (8) arson, telephones and answering machines, igniters, debris inspection; (9) reports, depositions and trials, report purpose and appearances; (10) fire initiation and spread, space heaters, wires, and other heat-producing mechanisms; (11) fire characteristics and general precautions; (12) electrical systems and grounds, general wiring; (13) photography and camera features; (14) electrical circuits and waves; and (15) electrical power equipment, transformers, generators, rectifiers, and motors. This book is an excellent resource not only for arson investigators but for attorneys, the insurance industry, and manufacturers who are concerned with electronic reliability."--pub. desc.**

**Handbook of Research on Transforming Teachers’ Online Pedagogical Reasoning for Engaging K-12 Students in Virtual Learning**

**10th International Conference, Pervasive 2012, Newcastle, UK, June 18-22, 2012. Proceedings**

**Today's Technician: Automotive Electricity and Electronics**

**Explains how electricity is produced and transmitted, how to create electricity using an electrical wire and a magnet, how generators supply electricity for cities, and how electricity works in homes. This science fiction book is about five young people living on a space station orbiting the planet Venus. Of how their happy world is taken away from them by a ruthless saboteur: on their own with only one man to help them, they must survive somehow until help arrives from control back on Earth. Will they be able to do so with a killer looking for them? Who knows? When starting out on a leaning course on the space station, the five young people could never have imagined how it will end. How something enjoyable can turn into a frightening experience. They will have to hide to avoid being caught and probably killed. Only one person, a crewmember, can help them, but he is badly injured. It is up to them, as young people, to survive.**

**This book constitutes the refereed proceedings of the 10th International Conference on Pervasive Computing, Pervasive 2012, held in Newcastle, UK, in June 2012. The 28 revised papers presented were carefully reviewed and selected from 138 submissions. The contributions are grouped into the following topical sections: activity capturing; urban mobility and computing; home and energy; HCI; development tools and devices; indoor location and positioning; social computing and games; privacy; public displays and services.**

**Beginning with an overview of the benefits of the modern building control system, the authors go on to describe the different controls and their applications and include advice on their set-up and tuning for stable operation.**

Why Do the Lights Turn On?

Cambridge ICT Starters: On Track, Stage 2

The Dangerously Intertwined Series Boxed Set

**Blackouts—whether they result from military planning, network failure, human error, or terrorism—offer snapshots of electricity's increasingly central role in American society. Where were you when the lights went out? At home during a thunderstorm? During the Great Northeastern Blackout of 1965? In California when rolling blackouts hit in 2000? In 2003, when a cascading power failure left fifty million people without electricity? We often remember vividly our time in the dark. In When the Lights Went Out, David Nye views power outages in America from 1935 to the present not simply as technical failures but variously as military tactic, social disruption, crisis in the networked city, outcome of political and economic decisions, sudden encounter with sublimity, and memories enshrined in photographs. Our electrically lit-up life is so natural to us that when the lights go off, the darkness seems abnormal. Nye looks at America's development of its electrical grid, which made large-scale power failures possible and a series of blackouts from military blackouts to the “greenout” (exemplified by the new tradition of “Earth Hour”), a voluntary reduction organized by environmental organizations. Blackouts, writes Nye, are breaks in the flow of social time that reveal much about the trajectory of American history. Each time one occurs, Americans confront their essential condition—not as isolated individuals, but as a community that increasingly binds itself together with electrical wires and signals.**

**Revolving around the electrification of rural northeast Georgia shortly after the end of World War II, the novel has become a classic coming-of-age story. Kay, now an acclaimed writer with an international following, has reread the novel with the eyes of a seasoned storyteller. Cutting here and adding there, Kay has enriched an already highly comical and poignant work.**

**Hedgehog just wants to get some sleep. So, please, won't you stop turning on the light?**

**This completely revised second edition of the popular, jargon-free guide to greener working practices highlights the opportunities for achieving cost savings and environmental improvements to enhance competitiveness in organizations of all sizes, with specific guidance for small businesses. The manual sets out effective and simple mechanisms to encourage participation and commitment from both staff and suppliers. It builds on the sound advice of the first edition, with a wide range of new case studies from different sectors including retailers, hotels and hospitality, schools and educational institutions, airports and prisons, as well as plenty of office based examples. Written with the busy office manager in mind, the manual offers clear and reliable independent information and easy-to-follow guidelines for businesses of all sizes. Profiles are provided of useful organizations who can help together with their contact details and website information.**

Summary Voice Applications for Alexa and Google Assistant is your guide to designing, building, and implementing voice-based applications for Alexa and Google Assistant. Inside, you'll learn how to build your own "skills"—the voice app term for actions the device can perform—from scratch. Foreword by Max Amordeluso. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. You'll find registration instructions inside the print book. About the Technology In 2018, an estimated 100 million voice-controlled devices were installed in homes worldwide, and the apps that control them, like Amazon Alexa and Google Assistant, are getting more powerful, with new skills being added every day. Great voice apps improve how users interact with the web, whether they're checking the weather, asking for sports scores, or playing a game. About the Book Voice Applications for Alexa and Google Assistant is your guide to designing, building, and implementing voice-based applications for Alexa and Google Assistant. You'll learn to build applications that listen to users, store information, and rely on user context, as you create a voice-powered sleep tracker from scratch. With the basics mastered, you'll dig deeper into multiuse conversational flow and other more-advanced concepts. Smaller projects along the way reinforce your new techniques and best practices. What's inside Building a call-and-response skill Designing a voice user interface Using conversational context Going multimodal Tips and best practices About the Reader Perfect for developers with intermediate JavaScript skills and basic Node.js skills. No previous experience with voice-first platforms is required. About the Author Dustin A. Coates is a developer who focuses on voice and conversational applications. He's currently the voice search lead at Algolia and is also a Google Developers Expert for Assistant as well as cohost of the VUX World podcast. Table of Contents Introduction to voice first Building a call-and-response skill on Alexa Designing a voice user interface Using entity resolution and built-in intents in Alexa skills Making a conversational Alexa skill VUI and conversation best practices Using conversation tools to add meaning and usability Directing conversation flow Building for Google Assistant Going multimodal Push interactions Building for actions on Google with the Actions SDK

Every devoted Christian experiences periods of time when God seems far away, when the light of his face seems to have turned away and left his child to fumble in the darkness. During periods of spiritual blackout, when God seems to be silent, we feel as if we've been put on hold. We wait and wait for God to get back on the line. We know it will be wonderful when the light comes back on and drives away the darkness, but we want it now—not later. Award-winning writer Cecil Murphey has journeyed through this darkness three different times during his many years following Christ, and each time was more difficult than the last. He suggests that believers have three choices when the lights go out: (1) give up, (2) examine ourselves for sin or failure, or (3) accept that God's face is hidden with his purpose in mind. In *When God Turned Off the Lights*, readers will learn how to make the most of their time on hold by pondering the mysteries of God's character, confident that he will turn the lights on once again.

Esta pequeña Gramática inglesa, titulada ELEMENTS OF ENGLISH GRAMMAR ha sido concebida para su uso en las clases de enseñanza del Inglés, específicamente pensando en alumnos de 14 a 18 años, de forma que sin demasiadas explicaciones teóricas dispongan de unos cuadros sinópticos tanto de la morfología de los componentes básicos de la gramática inglesa como también de los elementos sintácticos que permitan una rápida comprensión y utilización de ellos a la hora de expresar un pequeño discurso coherente de forma inteligible, sea ello en forma escrita o hablada. Es necesaria, por tanto, su presentación y utilización en clase de forma que puedan entender o consultar luego rápidamente, por su cuenta, las estructuras y funciones que se presentan en esta pequeña obra, y que van redactados en un Inglés simple. Todas las estructuras van acompañadas de un buen número de ejemplos, sin dejar ninguna de las variantes teóricas tratadas sin ejemplificación clara. De especial utilidad son los cuadros dedicados a las Funciones y a la Sintaxis ya que la trabazón de un discurso lingüístico viene determinada por la correcta comprensión de los conjuntos y conjunciones que rigen la adecuada matización de la información comunicativa.

Turn Off That Light!

**Electrical Fire Analysis**

Energy efficient lighting is said to be one of the most cost-effective approaches to save energy and reduce CO2 emissions. In order to stimulate the application of lighting retrofits of good quality, IEA Task 50, Subtask B “Daylighting and Electric Lighting solutions” has looked into the assessment of existing and new technical retrofit solutions in the field of façade and daylighting technology, electric lighting and lighting controls. The document provides information for those involved in the development of retrofit products or involved in the decision making process of a retrofit project, such as buildings owners, authorities, designers and consultants, as well as the lighting and façade industry. This source book addresses both electric lighting solutions and daylighting solutions, and offers a method to compare these retrofit solutions on a common basis, including a wide range of quality criteria of cost-related and lighting quality aspects. Simple retrofits, such as replacing a lamp or adding interior blinds, are widely accepted, often applied because of their low initial costs or short payback periods. The work presented in this report aims at promoting state-of-the-art and new lighting retrofit approaches that might cost more but offer a further reduction of energy consumption while improving lighting quality to a greater extend. Energieeffiziente Beleuchtung ist eine der effektivsten Möglichkeiten, Energie zu sparen und damit die Emission von CO2 zu vermindern. Im Rahmen des IEA Task 50, Subtask B “Daylighting and Electric Lighting solutions” wurden daher neue und vorhandene technische Sanierungslösungen für Gebäude in den Bereichen Fassade, Tageslichttechnik, künstliche Beleuchtung sowie Lichtsteuerung bewertet, um die Anwendung hochwertiger Lösungen voranzutreiben. Die Informationen sind dabei für alle in den Sanierungsprozess einbezogenen Personen von großem Interesse, wie z. B. Gebäudeeigentümer, Behörden, Planer und Berater aber auch für Hersteller und Entwickler von Beleuchtungs- und Fassadenlösungen. Betrachtet werden sowohl künstliche als auch Beleuchtungslösungen mit Tageslicht, wobei eine Methode entwickelt wurde, die Sanierungslösungen grundlegend miteinander zu vergleichen. Hierbei werden zahlreiche Kriterien berücksichtigt, die energetische, lichttechnische, thermische und kostenbezogene Aspekte beinhalten. Einfache Sanierungsmaßnahmen wie der Austausch von Lampen oder die Montage innenliegender Jalousien werden weitgehend akzeptiert und oft verwendet, da sie kostengünstig sind und sich schnell amortisieren. Die vorliegende Arbeit hat es sich zum Ziel gesetzt, die Anwendung neuer und dem Stand der Technik entsprechender Beleuchtungslösungen für die Sanierung zu fördern. Diese verursachen zwar eventuell höhere Kosten, ermöglichen jedoch eine weitere Energieeinsparung bei gleichzeitiger Verbesserung der Beleuchtungsqualität.

Who turned off the light? The land before the country called Nigeria came into existence, was a land filled with light and hope. Electricity referred to as "light" metaphorically represents the success of the people. Today, lights are sporadic at best, and hope is fading. Some believed darkness resulted from the colonization by the British, which brought about the ideals of capitalism. The survival of the fittest became the contest of the day and poverty surly followed. After Nigeria received its independence in 1960, the British left a system in place where the Northern region welded control over the Southern and Western regions. Many leaders felt the only way to change this system was through force. The first military coup was initiated by Igbo army officers in January 1966, this set off a series of counter coups including a bloody three (3) year civil war until the final coup d' etat in 1993. The untimely death of the Military head of State Sani Abacha paved the way for a civilian government. As military rule became a seemingly permanent feature of Nigerian politics. Many Nigerians lost hope and developed a mindset to get all; as much as you can today because tomorrow is just another day. Many civil servants took on the attitude of the increasingly authoritarian and corrupt governments. Greed, bribery, and corruption was the order of the day, over time corruption would reach almost every sector of life, and business dealings in the country. As a result of the "winner take all" framework, long regaining leaders referred to as strongmen dominated politics in Africa. Nigeria provides power/electricity to the Ghanaian people that reside in Ghana, West Africa. Currently the energy supply crisis in Nigeria refers to the ongoing failure to provide adequate electricity supply to domestic households and industrial producers, only 40% of the Nigerian population is connected to the energy grid. It is so common in people residing in local communities, and villagers often state "we have a generator so that makes our family better than yours". The Federal Government of Nigeria spent Billions of dollars on roads, yet the country has some of the worst roads in the world. The Federal Government has also spent billions on the construction of Power Plants to bring stable lights to the country. Greed and corruption for roads, power facilities, and other necessary infrastructure projects have been squandered by corrupt leaders.

The complete Dangerously Intertwined Series from USA Today bestselling author Kimberly Knight. The game of love always goes on ... And their game is just beginning. Book 1: Use Me (Ashtyn and Rhys) Rhys Cole's life has always revolved around hockey. Growing up, he knew he'd play in the National Hockey League, but when his dream of being drafted didn't happen, he chose the next best thing: becoming a hockey sportscaster for a local sports station. But just like in sports, you win some, you lose some. When Rhys discovers his girlfriend cheating with a stranger in his bed, he walks to the local bar down the street to let off some steam. After moving her way up the journalism field by covering stories in extreme weather conditions and working late hours, Ashtyn Valor is now the lead anchor for the nightly news. Finally settled into her career, Ashtyn is ready to take the next step in life with her boyfriend. But when he unexpectedly breaks up with her, Ashtyn decides to numb the pain with alcohol at the closest bar. Rhys and Ashtyn both expected an evening of alcohol to mask the pain of that October night. What they didn't expect was meeting someone who could shield them from the darkness of their heartaches. Or that their pasts would dangerously intertwine ... When obsession becomes dangerous, Ashtyn turns to Rhys for safety. But how safe are they really? The game of love always goes on. And their game was just beginning. Book 2: Watch Me (Reagan and Ethan) Ethan Valor thought he had it all with a career he was meant for, and the perfect family at home. But when his wife unexpectedly filed for divorce, he moved into his sister's condo. Needing a nightcap after a long day on the police force, Ethan decided to go to the neighborhood bar that, in his family, was known to bring people together. Or, in his case, bring his first love back into his life. Reagan McCormick moved back to Chicago after twenty-three years. Divorced, and with a daughter in college, it was time for Reagan to focus on what made her happy. Wanting to make new friends and extra cash while in school, Reagan gets a job as a bartender. A blast from the past blows into her bar one night proving that moving back to the Windy City was the right decision to make. What Ethan and Reagan didn't expect was how easy it would be to start over together. Or how their career paths would dangerously intertwine ... When a serial killer strikes Murder City, Ethan will stop at nothing to keep Reagan safe. But how safe could they be when someone was always watching? The game of love always goes on. And their game was just beginning.

In a world prone to violent flooding, Britain, ravaged 20 years earlier by a deadly virus, has been largely cut off from the rest of the world. Survivors are few and far between, most of them infertile. Children, the only hope for the future, are a rare commodity. For 22-year-old Roza Polanski, life with her family in their isolated tower block is relatively comfortable. She's safe, happy enough. But when a stranger called Aashay Kent arrives, everything changes. At first he's a welcome addition, his magnetism drawing the Polanskis out of their shells, promising an alternative to a lonely existence. But Roza can't shake the feeling that there's more to Aashay than he's letting on. Is there more to life beyond their isolated bubble? Is it true that children are being kidnapped? And what will it cost to find out? Clare Morrall, author of the Man Booker Prize-shortlisted Astonishing Splashes of Colour, creates a startling vision of the future in a world not so very far from our own, and a thrilling story of suspense.

True Stories of Seeking God in the Darkness

Is this the Future of American and Canadian Libraries?

Brig Detroit is a professional poker player who has fallen through the cracks of modern society. Living his day to day life one hotel at a time, he grinds his living on a leather chair, in comfortable obscurity.After receiving news of his cousin's murder, Brig's best friend, Benny, convinces him to drive to New York to investigate the crime. When Benny goes missing, Brig must unravel a strange chain of events leading him to one of New York's most feared Mafioso's, the supposed bastard son of John Gotti. Brig is drawn into a cat-and-mouse game with local authorities and thugs alike. Using all of his resources, he must evade violent criminals and dirty cops while he searches for answers about his friend's disappearance.Bloody and bruised, Brig finally lands on Gotti's doorstep. Gotti's price for information on Benny's disappearance puts Brig, and his entire bankroll, at risk when he decides to raise the money the only way he knows how.Bullets and aces must fly before Brig can finally know peace and find closure.

Kim Fairley was twenty-four when she fell in love with and married a man who was fifty-seven. Something about Vern—his quirkiness, his humor, his devilish smile—made her feel an immediate connection with him. She quickly became pregnant, but instead of the idyllic interlude she'd imagined as she settled into married life and planned for their family, their love was soon tested by the ghosts of Vern's past—a town, a house, a family, a memory. Shooting Out the Lights is a real-life mystery that explores the challenges faced in a loving marriage, the ongoing, wrenching aftermath of gun violence and the healing that comes with confronting the past.

Yashvi, an author with an abandoned draft of her novel, is experiencing something that is possible in her story only. Nia with her nightmares and Aeden with his beautiful dreams cross their paths...but not in reality, in a darker world tucked in someone else's dream. Eva's dream date gets the evil eye of her sister...or it itself is scarier than what she can think of? Ritika's airplane disappears on its way...and it gives birth to a new journey for her that can give goosebumps even in the daylight! Do you think twice before you buy a gift for someone? Well, you will once you know the story of Sameer and Neha. They both gift the most wanted thing to their friend...but that embarks a dark story no one wants to hear. A little girl's continuous complaints about a man intruding into their house irk her mother. But she ends up believing her without seeing what her daughter sees...why? A deaf girl's silent world not only starts suffocating her but turns her into something that makes her want to run away from herself. Newly married Ayesha is strongly repulsed by her new family, especially her in-laws. Is she overthinking or looking at the truth that is just a tip of the iceberg? Roma D'souza's new painting earns more praise than she ever could. And secretly she wants to become prettier like that portrait. But why does that feel like a sin? Or, is it really? Dazzling Ritika gets engaged in an interesting game with a stranger in a late night party. Just when she thinks the ball is in her court, her world gets shaken. 19 stories...explore the darkest, creepiest and most unusual incidents, people and places. But you know, what is even creepier? They can turn into real anytime, anywhere...
