This book examines new directions in home-school relations from an international perspective. Unlike other current literature that concentrates on traditional models of family-school partnerships in Western countries, it focuses on the contributions of immigrant and minority parents, especially those in Asia and South America. This book brings together international scholars who explore home-school relations in Australia, Brazil, Canada, China, Hong Kong, South Korea, Mongolia, Sweden and the United States. Conversations with Colum McCann brings together eighteen interviews with a world-renowned fiction writer. Ranging from his 1994 literary debut, Fishing the Sloe-Black River, to a new and unpublished interview conducted in 2016, these interviews represent the development as well as the continuation of McCann’s interests. The number and length of the later conversations attest to his star-power. Let the Great World Spin earned him the National Book Award and promises to become a major motion picture. His

with its dynamic yoking of the 1845-1846 visit of Frederick Douglass to Ireland, the 1919 first nonstop transatlantic flight of Alcock and Brown, and Senator George Mitchell’s 1998 efforts to achieve a peace accord in Northern Ireland. An extensive interview by scholar Cecile Maudet is included here, as is an interview by John Cusatis, who wrote Understanding Colum McCann, the first extensive critical analysis of McCann’s work. An author who actually enjoys talking about his work, McCann (b. 1965) offers insight as well as the challenge of writing each novel to go beyond his accomplishments in the novel before. Readers will note how many of his responses include stories in which he himself is the object of the humor and how often his remarks reveal insights into his character as a man who sees the grittiness of the urban landscape but never loses faith in the strength of ordinary people and their capacity to prevail.

The four-volume set LNCS 9012, 9013, 9014 and 9015 constitutes the proceedings of the Second International Conference on Design, User Experience, and Usability, DUXU 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCI 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCI 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 282 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 67 papers included in this volume are organized in the following topical sections: cross-cultural design; the learning and culture experience; designing for the health and quality of life experience; and games and gamification.

150 Programming Interview Questions and Solutions

When it comes to interviewing for a job, you can be never sure what types of questions an employer is going to ask. Job-seekers can be faced with casual questions, or those designed to test critical thinking skills and spontaneity. Packed full of the toughest interview questions and the savvy answers that today’s managers are looking for, 301 Smart Answers to Tough Interview Questions prepares career-seekers to confidently answer any interview question that might come their way.

This book is an introduction to the biological basis of behavior, broadly defined, with practical applications for higher education programs that focus on advances in neuroscience. It has a special focus on training practitioners based on American Psychological Association (APA) health service psychology guidelines. It reviews and digests information for clinical, counseling, and school psychologists serving clients of all ages in a variety of settings, such as schools, hospitals, and clinics. Content for all developmental stages, including birth to geriatric practices are highlighted. Some unique features of this book include: The integration of neuropsychological and theoretical foundations for clinical practice. Comprehensive consideration of projective, objective, and interviewing measures. Recent research in neuroimaging as it relates to clinical practice. Psychopharmacology and its effect within the neurosciences. Assessment for intervention in clinical, counseling, school, and neuropsychology. The use of research to guide neuropsychologically-based clinical practice. Eastern and western approaches to integration and case conceptualization. Interventions driven by brain-based scientific understanding. A variety of neuropsychological cases and report styles to improve practice The enduring contribution of psychology into modern times will remain contingent on practitioners’ commitment to ethically-based, empirically-focused, evidence-based practice; continuing education; and scientific discovery. This book will help health service psychologists and counselors to meet the needs of an increasingly diverse population by providing cutting-edge, evidence-based, ecologically valid neuropsychological interventions currently lacking within the field. Cultural considerations are provided within each chapter, which is especially important given societal inequity that continues to persist within our world.

Implications for the COVID-19 pandemic are also discussed in light of neuroscientific advances in medicine. When Trauma Survivors Return to Work: Understanding Emotional Recovery explains how managers and co-workers can learn to foster the process of emotional recovery for traumatized employees returning to the workplace. No other resource teaches managers and co-workers how to treat fellow co-workers returning to the workplace after experiencing a violent accident, rape, a burglary, or armed robbery. Or what to say to those who have just been told they have a terminal illness. Or how to treat an employee whose close family member has committed suicide. It is not helpful for co-workers to deny such traumatic events or remain silent, which is what happens. Or for managers to avoid directly communicating with traumatized employees. Is there a short and simple way to teach managers and co-workers how to be truly helpful to such wounded people? The answer is Dr. Barski-Carrow’s illuminating, example-filled book, When Trauma Survivors Return to Work: Understanding Emotional Recovery.

Tomcat Interview Questions You’ll Most Likely Be Asked is a perfect companion to stand ahead above the rest in today’s competitive job market.

Are you looking for a mere job?the kind where you do virtually the same thing day after day, year after year, and spend the hours counting down the minutes until the clock hits five p.m.? Or are you looking for a career?the kind that engages your interests and passions, constantly presents new and exciting opportunities and challenges, and allows you to grow personally and professionally? If you chose the latter, this is the book for you. In The Wall Street Journal Guide to Building Your Career, former Wall Street Journal career editor Jennifer Merritt shows you how to build the foundation for the fulfilling professional career that leads to that corner office. She’ll walk you through how to:
• Select and nab that important career-launching college internship
• Ace your first interview—and blow them away in the second round
• Navigate the unwritten rules of any office culture
• Negotiate tastefully and successfully for the salary your skills are worth
• Get that critical promotion when you’re at the peak of your learning curve
• Choose the mentor (or mentors) who can best help you achieve your goals
• Leap ahead of other high achievers racing you to the top Drawing on advice from industry experts, career coaches, and ordinary people who’ve made the climb themselves, Merritt offers insider tips for landing and moving up in the kind of job that’s not just about earning a paycheck but about realizing your ambitions and achieving the kind of success you’ve always dreamed of.

Collective Memory examines the difficult transmission of memory in France of the Algerian war of independence (1954-62). Emphasizing the current lack of transmission of memories of this war through a detailed case study of three crucial vectors of memory: the teaching of school history, coverage in the media, and discussion in the family, author McCormack argues that lack of transmission of memories is feeding into contemporary racism and exclusion in France. Collective Memory draws extensively on interviews with historians, teachers, and the public, as well as secondary sources and media analysis. McCormack proposes that a greater “work of memory” needs to be undertaken in France to overcome the division in French society that stems from the war. There has been little reconciliation of memories, a situation that leaves many individuals without a voice on this important subject. “Memory battles” dominate discussion of the topic as many issues periodically flare up and cannot yet be overcome.

“In this... guide to the ever-changing modern workplace, Kathryn Minshew and Alexandra Cavoulacos, the co-founders of [the] career website TheMuse.com, show how to play the game by the New Rules. [Explaining] how to figure out exactly what your values and your skills are and how they best play out in the marketplace... [They] guide you as you sort through your countless options [and] communicate who you are and why you are valuable and stand out from the crowd”--

This book uniquely combines data from a study focused on the use of dialogic instruction in an elementary classroom, with analysis of students’ retrospective beliefs about the classroom environment, interactions, and authority. Through this retrospective methodology, the text offers valuable insight into the long-term impacts of discursive practices on young learners’ attitudes to learning and their educational trajectories. Analysis also serves to further understandings of how the classroom environment can function as a living dialogue, in which authority in respect to talk, knowledge sharing, and curricular choices serves as an interactional accomplishment and means of social justice. This book will be a valuable resource for researchers and academics with an interest in classroom discourse and critical pedagogy. It will be of particular interest to those with a focus on elementary education.

**Learning and identity development are lifetime processes of becoming. The construction of self, of interest to scholars and practitioners in adult development and adult learning, is an ongoing process, with the self both forming and being formed by lived experience in privileged and oppressive contexts. Intersecting identities and the power dynamics within them shape how learners define themselves and others and how they make meaning of their experiences in the world. I Am What I Become: Constructing Identities as Lifelong Learners is an insightful and diverse collection of empirical research and narrative essays in identity development, adult development, and adult learning. The purpose of this series is to publish contributions that highlight the intimate connections between learning and identity. Our aim is to promote reflection and research at the intersection of identity and adult learning at any point across the adult lifespan and in any space where learning occurs: in school, at work, or in community. The series aims to assist our readers to understand and nurture adults who are always in the process of becoming. Adult educators, adult development scholars, counselors, psychologists, and sociologists, along with education and training professionals in formal and informal learning settings, will revel in the rich array of qualitative research designs, methods, and findings as well as autobiographies and narrative essays that transform and expand our understanding of the lived experience of people both like us and unlike us, from the U.S. and beyond. Volume One, Identity and Lifelong Learning in Higher Education, contains chapters by and about post-secondary educators and students. Together these chapters enhance our understanding of the inextricable link between learning and identity.**

**School culture is unarguably central to a school’s success or failure. While there is no single “correct” school culture, there are lessons to be learned. Culture Rules examines the factors that create an environment where students want to learn, and adults want to teach. Culture Rules explores staff culture, student culture, team building, establishing and maintaining norms inside and outside the classroom, and lessons learned from top-performing schools. By sharing her personal journey in school leadership, Jo Facer: explores the different factors that can affect a school’s culture; considers hot topics such as teacher workload, discipline, marking, CPD and shows how these can influence a school’s culture and success; and includes real case studies to show how schools have developed a strong culture and the impact on performance. Full of practical, sustainable ideas for schools to implement in the short and long term, this is essential reading for all school leaders in primary and secondary schools looking to build a great school culture in their organisations.**

**This was an exciting project to work on, and I attempted to obtain a broad sampling of current research on the neuropsychology of epilepsy. Because the emphasis of the book takes a neuropsychological perspective on epilepsy, the coverage is not redundant with previous texts on this topic. The book is organized around three themes, although individual chapters certainly often extend beyond the part in which they are located. The three major topics are the nature of epilepsy, cognitive and emotional consequences of epilepsy, and treatment approaches to epilepsy and outcome. In Part I, following a historical overview of epilepsy in Chapter 1 by Sandra D. Haynes and me, Gerald C. McIntosh presents a conceptualization of the epilepsies from a neurologist’s perspective. The characteristics of seizure types are discussed, and the etiology of secondary epilepsies is described. Epileptic syndromes are considered. McIntosh outlines clinical seizure patterns associated with seizures originating from different cortical regions.**

*In den letzten Jahrzehnten wurde die Förderung von Demokratie und Governance zu einem wichtigen Bestandteil der Außenpolitik westlicher Regierungen und multilateraler Organisationen. Nach und nach wurde die externe Demokratieförderung zu einem breiten Forschungsfeld der Politikwissenschaft und der Transformationsforschung. Während sich ein Großteil der wissenschaftlichen Forschung auf Instrumente und Strategien multilateraler Geberinstitutionen wie Weltbank (WB), Internationaler Währungsfonds (IWF) und Europäische Union (EU) konzentriert, ist die Afrikanische Entwicklungsbankgruppe (AfDB) bisher nur wenig erforscht. Die Studie bietet neue empirische Einblicke in die Umsetzung der politischen und entwicklungspolitischer Entwicklungszusammenarbeit für Marokko als größter Empfänger von bilateraler EU-Hilfe im Rahmen der Europäischen Nachbarschaftspolitik (ENP) und trägt zu einer systematischeren Erforschung der Rolle nicht-westlicher Akteure in der Auslandshilfe bei. Der Autor zeigt zum einen, dass die Ziele der Förderung von Demokratie und guter Regierungsführung miteinander konkurrieren und zum anderen die Politikförderung zunehmend technokratisiert und entpolitisiert wird.*

*Golding’s iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buchler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.*

**Migration fundamentally shapes the processes of national belonging and socioeconomic mobility in Mexico—even for people who never migrate or who return home permanently. Discourse about migrants, both at the governmental level and among ordinary Mexicans as they envision their own or others’ lives in “El Norte,” generates generic images of migrants that range from hardworking family people to dangerous lawbreakers. These imagined lives have real consequences, however, because they help to determine who can claim the resources that facilitate economic mobility, which range from state-sponsored development programs to income earned in the North. Words of Passage is the first full-length ethnography that examines the impact of migration from the perspective of people whose lives are affected by migration, but who do not themselves migrate. Hilary Parsons Dick situates her study in the small industrial city of Uriangato, in the state of Guanajuato. She analyzes the discourse that circulates in the community, from state-level pronouncements about what makes a “proper” Mexican to working-class people’s talk about migration. Dick shows how this migration discourse reflects upon and orders social worlds long before—and even without—actual movements beyond Mexico. As she listens to men and women trying to position themselves within the migration discourse and claim their rights as “proper” Mexicans, she demonstrates that migration is not the result of the failure of the Mexican state but rather an essential part of nation-state building.**

**A Library Journal Best Book of 2015 Go behind the scenes of seven of today’s most popular narrative radio shows and podcasts, including This American Life and RadiolaB, in graphic narrative. Every week, millions of devoted fans tune in to or download This American Life, The Moth, RadiolaB, Planet Money, Snap Judgment, Serial, Invisibilia and other narrative radio shows. Using personal stories to breathe life into complex ideas and issues, these beloved programs help us to understand ourselves and our world a little bit better. Each has a distinct style, but every one delivers stories that are brilliantly told and produced. Out on the Wire offers an unexpected window into this new kind of storytelling—one that literally illustrates the making of a purely auditory medium. With the help of This American Life’s Ira Glass, Jessica Abel, a cartoonist and devotee of narrative radio, uncovers just how radio producers construct narrative, spilling some juicy insider details. Jad Abumrad of RadiolaB talks about chying moments of awe with scientists, while Planet Money’s Robert Smith lets us in on his slightly goofy strategy for putting interviewees at ease. And Abel reveals how mad—really mad—Ira Glass becomes when he receives edits from his colleagues. Informative and engaging, Out on the Wire demonstrates that narrative radio and podcasts are creating some of the most exciting and innovative storytelling available today.**

*There is a feeling of pure delight that comes from laughing out loud while watching a hilarious movie or a TV show. Yet as funny as these lines may be, they are the work of people you will never see. The magic behind any comedy hit begins when an idea is hatched in the mind of a comedy writer and is then put down on paper. And while few of us are privy to this fascinating process, for writers Peter Desberg and Jeffrey Davis, the challenge of observing and understanding how comedy is born has culminated in a unique new book, Now That’s Funny! Desberg and Davis provide an intimate look into the minds of twenty-four of Hollywood’s funniest comedy writers, who have given us such shows as: Saturday Night Live Monk Everybody Loves Raymond The Simpsons Frasier Maude Home Improvement Valerie Modern Family Cheers There’s Something about Mary The Honeymooners Suddenly Susan Newhart Sabrina the Teenage Witch Archie Bunker’s Place The Tracey Ullman Show Wings Who’s The Boss? and more How do you get to see the creative wheels turn? The authors’ premise was simple: Using a Q and A format, they provided each writer with a story idea and let them run with it. Everyone started with the same concept, the authors could see how some writers jumped in and began creating, while others asked lots of questions; how some writers stuck closely to the premise, while others turned it on its head. What emerges is an entertaining look—illuminating and hilarious in turn—at the creative process behind hit TV shows and movies. If you’re one of the millions who have enjoyed watching the work of comedy writers, here is an opportunity to go behind the scenes and see the madness unfold. Now that’s funny!*
