Miller Test Prep's study guide for the TABE is the solution for students who want to maximize their score and minimize study time. Our study guides are carefully designed to provide only that clear and concise information you need. That's precisely why we put "Clear & Concise" on our cover. The standard for the study guide industry is to "throw in the kitchen sink" when it comes to making a book, meaning you are stuck with hundreds of pages of repetitive information, redundant and confusing examples, and more practice questions than any person could be expected to work through. This results in students feeling overwhelmed, leading to reduced self-confidence, which leads to lower scores! Instead, Miller Test Prep has worked specifically

with tutors. Why tutors you ask? Tutors specialize in helping students comprehend information that has already been presented by a teacher. That means they see time and again what students struggle with and what actually works to help them. They specialize in helping students who have previously failed, to succeed. We compiled their decades of experience helping students just like you into this study guide, so you pass the first time! In this Test for Adult Basic Education guide, we ensure you are thoroughly prepared for this critically important test: Comprehensive review of all TABE exam sections: Language Mathematics Reading Step-by-step examples for every concept tested Practice test questions like the real exam Detailed, thorough answer key explanations

This student manual is designed to successfully prepare adult students for the TABE 11 & 12 Level D math test. It offers six (6) sections that cover all the TABE 11 & 12 and Math CCR standards and content for level D such as: 1) the number system, 2) expressions and equations, 3) ratios and proportional relationships, 4) functions, 5) geometry, and 6) statistics and probability. The book also offers step-by-step instruction, plus practice exercises and answer keys, questions and tasks that encourage pair work and group work, and classroom discussion on math ideas and concepts. It presents 2 practice tests that mimic the TABE 11 & 12 level D test format and rigor, plus answer keys. Specifically, this manual invites math teachers to provide learners with the space and time to experiment with math concepts and ideas and to get deeper in their learning process. For example, the tasks presented in this book aim to make learners think more deeply about math and therefore improve their mathematical thinking skills, provide learners with hands-on tasks relevant to their situation, help learners connect their math learning with the real world, create opportunities for learners to read about, write about, and discuss math ideas and concepts.
