Gateways to Understanding Music explores music in all the categories that constitute contemporary musical experience: European classical music, popular music, jazz, and world music. Covering the oldest forms of human music making to the newest, the chronological narrative considers music from a global rather than a Eurocentric perspective. Each of sixty modular "gateways" covers a particular genre, style, or period of music. Every gateway opens with a guided listening example that unlocks a world of music through careful study of its structural elements. Based on their listening experience, students are asked to consider how the piece came to be composed or performed, how the piece or performance responded to the social and cultural issues at the time and place of its creation, and what that music means today. Students learn to listen to, explain, understand, and ultimately value all the music they may encounter in their world. FEATURES Global

Listening-guided learning—Leads to understanding the emotion, meaning, significance, and history of music. Introduction of musical concepts—Defined as needed and compiled into a Glossary for reference. Consistent structure—With the same step-by-step format, students learn through repeated practice how to listen and how to think about music. *World War I was a watershed, a defining moment, in Armenian history. Its effects were unprecedented in that it resulted in what no other war, invasion, or occupation had achieved in three thousand years of identifiable Armenian existence. This calamity*

*was the physical elimination of the Armenian people and most of the evidence of their ever having lived on the great Armenian Plateau, to which the perpetrator side soon gave the new name of Eastern Anatolia. The bearers of an impressive martial and cultural history, the Armenians had also known repeated trials and tribulations, waves of massacre, captivity, and exile, but even in the darkest of times there had always been enough remaining to revive, rebuild, and go forward. This third volume in a series edited by Richard Hovannisian, the dean of Armenian historians, provides a unique fusion of the history, philosophy, literature, art, music, and educational aspects of the Armenian experience. It further provides a rich storehouse of information on comparative dimensions of the Armenian genocide in relation to the Assyrian, Greek and Jewish situations, and beyond that, paradoxes in American and French policy responses to the Armenian genocides. The volume concludes with a trio of essays concerning fundamental questions of historiography and politics that either make possible or can inhibit reconciliation of ancient truths and righting ancient wrongs.*

*The volume assesses performative structures within a variety of medieval forms of textuality, from vernacular literature to records of parliamentary proceedings, from prayer books to musical composition. Three issues are central to the volume: the role of ritual speech acts; the way in which authorship can be seen as created within medieval texts rather than as a given category; finally, phenomena of voice, created and situated between citation and repetition, especially in forms which appropriate and transform literary tradition. The volume encompasses articles by historians and musicologists as well as literary scholars. It spans European literature from the West (French, German, Italian) to the East (Church Slavonic), vernacular and Latin; it contrasts modes of liturgical meditation in the Western and Eastern Church with secular plays and songs, and it brings together studies on the*

gardist John Cage from an exciting interdisciplinary perspective, exploring his activities as a composer, performer, thinker, and artist. The essays in this collection grew out of a pivotal gathering during which a spectrum of participants including composers, music scholars, and visual artists, literary critics, poets, and filmmakers convened to examine Cage's extraordinary artistic legacy. Beginning with David Bernstein's introductory essay on the reception of Cage's music, the volume addresses topics ranging from Cage's reluctance to discuss his homosexuality, to his work as a performer and musician, and his forward-looking, provocative experimentation with electronic and other media. Several of the essays draw upon previously unseen sketches and other source materials. Also included are transcripts of lively panel discussions among some of Cage's former colleagues. Taken together, this collection is a much-needed contribution to the study of one of the most significant American artists of the twentieth century.

Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast.
