We examine how firm and country heterogeneity shape the response of corporate investment in emerging markets to changes in global interest rates and volatility. We test for the presence of (i) a financing channel originating from changes in the costs of external borrowing and (ii) a real options channel—reflecting firms' option values to delay investment. We find evidence of the coexistence of both channels. Financially weaker firms reduce investment by more in response to higher interest rates or volatility, while firms with stronger balance sheets become less willing to invest after volatility spikes. Furthermore, the intensity of the financing channel diminishes for firms in countries with lower public debt, higher foreign reserves, or deeper financial markets.

Covering both the fundamentals and applications, Object Oriented Programming through Java provides a thorough introduction to this popular programming paradigm. It includes coverage of essential topics such as classes, objects, packages, interfaces, multithreading, AWT, Applets, and Swings. The book also includes a detailed overview of various practical applications, including JDBC, Networking classes, and servlets. It contains exercises at the end of every chapter, and sample illustrative programs are used throughout the book. It is a text for courses on object oriented Java programming and a reference for professionals.

The paper documents the use of foreign exchange intervention (FXI) across countries and monetary regimes, with special attention to its use under inflation targeting (IT). We find significant differences between

advanced and emerging market economies, with the former group conducting FXI limitedly and broadly symmetrically, while the use of this policy instrument in emerging market countries is pervasive and mostly asymmetric (biased towards purchasing foreign currency, even after taking into account precautionary motives). Within emerging markets, the use of FXI is common both under IT and non-IT regimes. We find no evidence of FXI being used in response to inflation developments, while there is strong evidence that FXI responds to exchange rates, indicating that IT central banks in EMDEs have dual inflation/exchange rate objectives. We also find a higher propensity to overshoot inflation targets in emerging market economies where FXI is more pervasive.

Being in love and full of anticipation of a great life does not shield young couples from unfair and unexpected challenges and trauma. This book is not an elaborate "how-to" or "self-help" manual for when the going gets rough. It's just a true story about a couple that continued to put one foot in front of the other when they would rather have given up; it's about love and faith and standing fast against adversity. The Way Life Is takes readers into the home of a young couple trying to accommodate their own needs, desires and demons while coping with the special needs of their children: Sara, born with a rare and life threatening disability known as Prader-Willi Syndrome; Gina, who arrived needing open-heart surgery in order to survive; and Andrew, an active and exceptionally healthy little boy stuck in the middle. Readers' Comments "...as I read it I am struck by what a

wonderful personal account it is, not only of your family's experiences, but the part of the story that is universal and inspiring, every couple's struggle with love and adversity. May it bless many, many families around the world!"

Joanne Klassen, author of *Transformative Writing* "Congratulations on what I think is a truly incredible book... it is all beautifully written and the introduction is especially nicely done... the type that grabs a reader right away and makes them want to read more. I think you are going to find that your book really connects with people and will not only comfort, but also inspire them." Brenda Fehr, Entertainment Editor, Transcontinental Media Inc.

In many countries, a sizable share of international trade is carried out by intermediaries. While large firms tend to export to foreign markets directly, smaller firms typically export via intermediaries (indirect exporting). I document a set of facts that characterize the dynamic nature of indirect exporting using firm-level data from Vietnam and develop a dynamic

trade model with both direct and indirect exporting modes and customer accumulation. The model is calibrated to match the dynamic moments of the data. The calibration yields fixed costs of indirect exporting that are less than a third of those of direct exporting, the variable costs of indirect exporting are twice higher, and demand for the indirectly exported products grows more slowly. Decomposing the gains from indirect and direct exporting, I find that 18 percent of the gains from trade in Vietnam are generated by indirect exporters. Finally, I demonstrate that a dynamic model that excludes the indirect exporting channel will overstate the welfare gains associated with trade liberalization by a factor of two.

The Witch Needs Her Freedom. Ellara Wist, one of the many witches that fought on the losing side of the war, has no intentions of returning to Outerland when it is finished and she has no intention of letting her fellow witches suffer either. So, during her sentencing for war crimes against the kingdom of Aulen, she boldly offers

their new king a proposal: she'll join the king's court as his own personal sorceress in exchange for the lives and freedom of those trapped in Outerland. The King Needs a Wife. Terran didn't want to be king. But after years of war and the loss of almost his entire family, he will not put the crown aside. But when a witch from his past offers herself as a sacrifice, he sees her as an equal. So, he instead counters her offer with one of his own: Don't be my sorceress. Be my Queen. ?And the deal they strike will change their world forever. Desperate, Ellara agrees, swearing to herself that she could never love him. But as time reveals the man she's married not as the monster everyone thought he was and danger draws them closer together, she finds her vow almost impossible to keep.

Suburbia meets scandal in this hopeful and honest portrayal of that moment in every woman's life when it's time to make a change, even if that means risking losing it all. Goddess of Suburbia by Stephanie Kepke is a must-read for women looking to reconnect with their passions, and live authentically. When pillar of the community and PTA mom, Max, allowed her husband, Nick, to record a sex video of them on his cell phone, she thought of it as simply a way to keep Nick interested and entertained during his frequent business trips. But suddenly, Max is trending everywhere-her video lighting up the blogosphere and Twitter, thanks to the fact that she's a genuine, imperfect woman. Now the paparazzi are chronicling her every move; her daughter wants to disown her; and her marriage has completely fallen apart. Just as things can't get any more chaotic, Max's college boyfriend, shows up two decades after he broke her heart. Now Max must learn to stop going through the motions of her life on auto-pilot and start living authentically, or risk forever being a suburban lemming running towards the cliff of old age. We exploit a survey data set that contains information on how 11,000 workers across advanced and emerging market economies perceive the main forces shaping the future of work. In general, workers feel more positive than

negative about automation, especially in emerging markets. We find that negative perceptions about automation are prevalent among workers who are older, poorer, more exposed to job volatility, and from countries with higher levels of robot penetration. Perceptions over automation are positively viewed by workers with higher levels of job satisfaction, higher educational attainment, and from countries with stronger labor protection. Workers with positive perceptions of automation also tend to respond that re-education and retraining will be needed to adapt to rapidly evolving skill demands. These workers expect governments to have a role in shaping the future of work through protection of labor and new forms of social benefits. The demand for protection and benefits is more significant among women and workers that have suffered job volatility.

Tariq Ramadan shows that it is possible to live as a practising Muslim in multi-faith, pluralistic European nation states.

Le récit d'une longue épreuve et d'une renaissance « Depuis le 20 octobre 2017, date de la première plainte déposée contre moi, un ouragan s'est abattu sur ma vie. Un impitoyable déluge médiatique. Ce livre n'est pas un plaidoyer pour ma défense. Il apporte des réponses à des questions essentielles : pourquoi les plaignantes ont-elles menti ? Pourquoi la présomption d'innocence n'a-t-elle compté pour rien ? Y a-t-il une explication politique à la façon dont mon dossier a été géré et instruit ? Je m'attache ici à réunir des éléments qui ont été omis, négligés ou tronqués. Je propose aussi une réflexion sur l'état de la société française, le fonctionnement de la justice, le système carcéral et la puissance des médias. Devoir de vérité

The paper explores how international integration through global value chains shapes the working of exchange rates to induce external adjustment both in the short and medium run. The analysis indicates that greater integration into international value chains reduces the exchange rate elasticity of gross trade volumes. This result holds both in the short and medium term, pointing to the rigidity of value chains. At the same time, greater value chain integration is associated with larger gross trade flows, relative to GDP, which tends to amplify the effect of exchange rate movements. Overall, combining these two results suggests that, for most countries, integration into global value chains does not materially alter the working of exchange rates and the benefits of exchange rate flexibility in facilitating external

adjustment remain.

Voices From Earth, like its companion book entitled Thoughts From Earth, is a sparkling collection of timeless words of wisdom written for those seeking more meaning and purpose in their life. This rich anthology features many of the world's truly enlightened thinkers, such as Einstein, Lao Tzu, Rilke, Goethe, Gibran, Ryokan, Tagore, Thoreau and Emerson. Voices From Earth is NOT just another collection of quotations; rather, it is a meticulously crafted blueprint for having a calmer, more centered life that is rich in meaning and reward. Topics include thoughts on God, faith, truth, kindness, self, the human journey, and the awareness that each life has a purpose. Put simply, there is good stuff in here! This book is written for teenagers through adults. It is ideal for any occasion and would be the perfect gift for birthdays, anniversaries, high school and college graduation, newlyweds, and for those facing mid- or late-life challenges. After suffering a traumatic, "Unsurvivable plane crash" the author of this book used his Seven Steps to Complete Recovery to gain complete rehabilitation from his 16 major orthopedic operations, and this led to success in competitive mountain-bike racing and graduate school. This book shows the seven keys steps to achieving complete rehabilitation and recovery from any orthopedic injury (or surgical procedure) ranging from a sprained ankle to "comminuted fractures" (crushed long bones) that the author suffered. This patients' handbook also includes examples of rehabilitative protocols from 25 of the most common injuries such as tennis elbow to knee injuries. The chapters of this book range from injury analysis to designing an effective rehab program. It also includes chapters on proactive exercises with exercises that have been shown to effectively treat illnesses from osteoporosis to depression. This text will also reveal other peoples' success obtained from following Dr Willis' Rehab

Steps. Reading this book will teach the reader how to design their own successful, complete recovery from orthopedic injuries, and if the injury is severe, this text will help you work for a better, more informed success with your medical care givers.

Lowell, a former con man, reveals the secrets of cheating, scams, and hustles in this roller-coaster ride through bar bets, carnivals, Internet fraud, big and small cons, card and dice games, and more. The name of Tariq Ramadan is well known in the West. Thanks to his urbane manner and articulate way of expressing himself - in a number of languages - this Swiss-born academic is a regular contributor to television and radio features dealing with Islam (and Islamism) and the West. In England, his reputation as a "moderate" has won him praise - and even an invitation from the Prime Minister to serve on the government's task force on preventing extremism. Meanwhile, as the grandson of Hassan al-Banna, founder of the Muslim Brotherhood, Ramadan enjoys a certain status in Islamic circles - a kind of ambassador for his grandfather's brand of political Islam. So who is the real Tariq Ramadan and what does he stand for? In this incisive and insightful study of the man, well-known French writer and journalist Caroline Fourest dissects the public pronouncements of Tariq Ramadan. Drawing on his numerous books, articles and speeches as sources, she demonstrates with chilling clarity that

the West has been beguiled by Ramadan's doublespeak. Tariq Ramadan is slippery. He says one thing to his faithful Islamist followers and something else entirely to his Western audience. His choice of words, the formulations he uses - even his tone of voice - vary, chameleon-like, according to his audience. In most people, this would be merely funny or irritating, but Tariq Ramadan is too influential a figure to be dismissed so lightly.

Caroline Fourest does an incalculable service. In this long-overdue English translation of Brother Tariq she proves, once and for all, that Tariq Ramadan is not to be trusted. Ramadan has been portrayed as the Martin Luther King of Islam. This study reveals that he is a far more sinister character at the forefront of a militant and reactionary Islam.

This technical note describes the stress testing exercises carried out for the Danish commercial banking system and the insurance sector. The tests were conducted as part of the Financial Sector Assessment Program for Denmark and were developed in collaboration with the Danish Financial Supervisory Agency (DFSA) and Danmarks

Nationalbank (DNB). Two approaches—bottom-up and top-down—were employed in the analysis. Results of the stress test show that under changing macroeconomic conditions, credit risk could materialize, causing a substantial deterioration in banks' results.

While the United States, and indeed most of the Western world, fights an active war against Islamic terrorism, we remain in deep denial about who truly is the enemy. Elites across North America and Europe fight to silence those who argue, compellingly, that the roots of terrorism are within Islam itself which has evolved into far more than a religion—it is a radical and dangerous political ideology which consciously, if often tacitly, places itself in opposition to democracy and basic human rights. Robert Spencer, one of the world's foremost critical scholars of Islam, has been labeled Public Enemy #1 by those who apologize for Islam and its violent excesses. He has been called a propagandist, a racist, and an "Islamophobe"—a term that he willingly embraces in this provocative and important book. There needs to be a thoroughgoing and honest public discussion of the acceptable parameters of criticism of Islam in light of genuine interests not only of national security but of civilizational survival. Our lives, quite literally, could depend on it, as could those of our children and our children's children. Confessions of an Islamophobe is an attempt to begin that discussion. The first textbook available for A2 Level Philosophy students, and the sister companion to the immensely successful AS text, this text has been written in an

engaging and accessible style and covers the AQA A2 Level specification precisely.

The Italian financial safety net and crisis-management framework has been substantially strengthened since the 2013 FSAP. Among others, the authorities have enhanced the early intervention framework, introduced a new resolution regime (including recovery and resolution planning requirements), and introduced reforms of the two deposit guarantee schemes (DGS) that are active in Italy. Further enhancements at the Banking Union level, as outlined in the 2018 Financial System Stability Assessment for the euro area (IMF Country Report No. 18/226)--including the introduction of an adequately funded common deposit guarantee scheme, a harmonized bank liquidation framework and a finetuning of state aid rules--would yield further benefits for Italy.

Confessions of an Islamophobe

He Is Always With Me is Ms. Howard's first adult book and is a reflection of her life and religious studies. No matter what problems we face the Lord is always with us to see us through. The book deals with emotions that we have all felt at one time or another.

Quelques lignes sur les réseaux sociaux lancent, le 20 octobre 2017, l' affaire Tariq Ramadan, l' une des plus emblématiques du mouvement MeToo. Ancienne salafiste, Henda Ayari porte de très lourdes accusations (un viol qui aurait été commis, selon elle, au printemps 2012) contre ce leader influent et controversé de l' islam européen. Dans la foulée, une deuxième

plainte est déposée, assortie d ' un témoignage édifiant. Ces révélations provoquent un séisme politique et religieux : Tariq Ramadan est en effet au centre des polémiques qui agitent la France au sujet de l ' islam depuis un quart de siècle. Parmi ses proches, c ' est la consternation lorsque le théologien est placé en détention provisoire quelques mois plus tard. Dans une enquête passionnante et glaçante, Bernadette Sauvaget, s ' appuyant sur sa connaissance des milieux musulmans français, retrace la trajectoire du théologien, petit-fils du fondateur de la confrérie des Frères musulmans, de son ascension à sa chute. Grâce à de nombreux témoignages, dont certains inédits de victimes présumées, d ' anciens proches et d ' acteurs de premier plan de ce dossier ultrasensible, elle fait le récit d ' une affaire explosive que la justice devra trancher. Qui est réellement Tariq Ramadan ? Comment a-t-il construit son influence et son aura ? Qui connaissait sa double vie ? Qu ' est-ce qui a précipité sa chute ? Le portrait du leader politico-religieux révèle la complexité des relations de séduction et d ' emprise, les dérives des hommes de pouvoir. Journaliste à Libération et réalisatrice de documentaires, Bernadette Sauvaget est spécialiste des questions de religion et de laïcité. Elle est l ' auteure du Monde selon François. "Ideology in Postcolonial Texts and Contexts reflects that critiques of ideological formations occur within

intersecting social, political, and cultural configurations where each position is in itself 'ideological' - and subject to asymmetrical power relations.

Postcolonialism has become an object of critique as ideology, but postcolonial studies' highly diversified engagement with ideology remains a strong focus that exceeds Ideologiekritik. Fourteen contributors from North America, Africa, and Europe focus (I) on the complex relation between postcolonialism, postcolonial theory, and conceptualizations of ideology, (II) on ideological formations that manifest themselves in very specific postcolonial contexts, highlighting the potential continuities between colonial and postcolonial ideology, and (III) on further expanding and complicating the nexus of postcolonial ideology, from veiling as both ideological practice and individual resistance to home as ideological construct; from palimpsestic readings of colonial photography to aesthetics as ideology"--

Ask yourself this; did Photoleukomelanodermatitis of Kobori exist in the times of our ancestors, centuries ago, or was it born in recent times? Where did it come from? How did we find ourselves diagnosed with it? Has it occurred to you that the foods that you consume on a daily basis directly affect your health? Would you like to know more about the one protocol that has worked for us, time and time again, in increasing our health to a point where "disease" can no longer exist? Through reversing our own chronic diseases and conditions - ranging from severe autoimmune, neurological, digestive - all the way to rare genetic conditions, we

noticed a commonality during our healing journeys. We discovered a protocol that supercharged our health and subsequently worked well in the removal of any condition, disease, infection, abnormality, addiction, mental health condition - or any other label that you may come across. Through producing this series of information-assisted journals, our goal has been to reach you directly and share our experiences with you, with the aim of giving you hope. Regardless of what you have been diagnosed/labeled with - if applied correctly, you will experience significant positive changes. This journal has been broken down into two parts - the first part being information-based, and the second part being an assisted journal area for you to document, track and journal your personal daily progress, whilst being given helpful tips along the way. We didn't want to release just another "information overloaded" book which the reader does not benefit from or take action on immediately. Through this interactive and simplified approach found within this series of journals, you will achieve your health goals effectively. Welcome to the world of improved health and healing. Good luck on your journey.
