democracy is
shaped by
competing
factions, each

seeking to minimize its burden. Because few people are convinced by appeals to self-interest, factions must give reasons, which are skillfully elaborated into systems of belief or ideologies.

Eisenstein's aim is to examine (and debunk) three major ideologies used to justify various reforms of the tax system. The ideology of ability holds that taxes should be apportioned based on ability to pay

and that this is properly measured by income or wealth. The ideology of deterrents is concerned with high taxes on private enterprise. Low and flat taxes are desired lest the

wealthy reduce their work efforts and savings. The ideology of equity is focused on equal treatment of similarly situated individuals.

Eisenstein shows, with sharp wit and an instinct for the jugular, how each

of these ideologies is plagued with contradictions, incompleteness, and, in some cases, self-serving claims.
