

Tdi Extended Range Instructor Guide

This is the first book to span the depth between traditional sport diving editions and the complex medical/commercial texts. It provides a balanced view of the fascinations and hazards of deep diving through extensive factual development of its technical chapters.

The TDI Advanced Nitrox Instructor Guide is the text-book literary assistant designed to provide the instructor with everything they need to know about the Advanced Nitrox course to present an effective and informative course to students. It discusses both marketing Advanced Nitrox training as well as a step-by-step procedure for conducting the course using the TDI Advanced Nitrox textbook, CD-ROM,

and other support materials.

Building on his first book, "SCUBA: A Practical Guide for the New Diver", James Lapenta addresses what is most often the next step in diver training. Advanced Level or Advanced Open Water training is often taken by divers to gain additional skills and knowledge. It is also taken to allow them to gain access to more challenging dives and dive sites. These also pose a greater degree of risk to the individual. Unfortunately some advanced classes are no more than a "taste" or "tour" of advanced level dives. The divers do not get the new knowledge and skills required to safely embark on these dives. In order to safely pursue these dives James has outlined the steps to take to reduce the risk of injury and worse. From describing the dives to offering advice on the content one should expect, as well as selecting an instructor, he offers new and not so new divers guidance. Additional sections on equipment options, air supply management, dive planning, and dive selection for maximum learning potential are looked at. Also included

is a section on a subject often overlooked in recreational SCUBA diving - the after-effects of a diving accident and rescue/recovery on the rescuer and witnesses to the event. Post Traumatic Stress in Recreational Dive Rescues is a real possibility and one that must be looked at when executing dives with greater risk. Safety in training and after training is the heart of this work and the driving force behind its publication. James has experienced the best in training and that which left something to be desired. He gives examples of both throughout the work. If you do not have his first book, it is highly recommended that you also acquire it as a companion to this one. While they do contain some sections of the same information, there are sections in the first book that are not included in this that are highly beneficial.

Written by an award-winning aquanaut and with art by a #1 New York Times bestselling illustrator, this inspiring picture book encourages readers to explore their world, build their self-esteem and imagine what they can do and become when they grow up. When I was young, the world seemed too dangerous. Everything was too hard. I was too young. Places were too far away. But that was okay because I had a big imagination . . . Through beautiful, spare text, Jill Heinerth tells her story about a girl who feels too young, too little and too far away from her dreams. But you don't need to wait to grow up. It doesn't take much to imagine all the things you

can do and be. What if your bedroom were a space station? What would it be like to have flippers or tusks? In your own home you can explore new worlds and meet new friends. Jaime Kim's luminous art transports readers back and forth through time to see how Jill's imagination as a young girl laid the pathway to her accomplishments and experiences as an underwater explorer.
