Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why. It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity, history, and the contemporary world. All chapters include lesson ideas, a sample lesson plan with activity sheets, primary source documents, and helpful charts, graphs, photographs, and maps. High school studentsâ€(tm) responses are woven in throughout. Additional material corresponding to each chapter is posted online at http://people.hofstra.edu/alan_j_singer. The traditional curriculum tends to highlight the Western heritage, and to race through epochs and regions, leaving little time for an in-depth exploration of concepts and historical themes, for the evaluation of primary and secondary sources, and for students to draw their own historical conclusions. Offering an alternative to such pre-packaged textbook outlines and materials, this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it.

Davies outlines the composition and date of Numbers, and the various attempts that have been made to establish a coherent and meaningful structure in its arrangement. Davies also shows how the application of reader-response criticism, feminist criticism and postcolonial criticism have contributed to our understanding of selected passages in the book. Addressing theological issues, Davies considers three themes that occupy much of the content of Numbers, namely: land, purity and holiness, and rebellion. The concluding chapter considers the contentious issue of the historicity of the book of Numbers in the light of recent discussions concerning the historical value of the Old Testament. Davies shows how some of the issues Numbers raises – war, disease, survival, hunger, race relations – are among the perennial problems faced by nations across the centuries and across cultures. While individual passages within Numbers may reflect a questionable sense of morality, Davies demonstrates that the book, when viewed in its totality, encompasses a number of important theological themes which recur throughout the Old Testament: the interplay of forgiveness and judgment, and of sin and punishment, and the need to trust in the power of God rather than human might.

It is designed to draw readers into the detective process that characterizes the work of professional historians and social scientists — sharing raw data, defining terms, building interpretations, and testing competing theories. In the Great Recession of 2007-2010, Americans watched their retirement savings erode and the value of their homes decline while the unemployment rate increased and GDP sank. New demands emerged for unprecedented government intervention into the economy. While these changes have a dramatic impact on society at large, they also have serious implications for the content and teaching of economics. Teaching Economics in a Time of Unprecedented Change is a one-stop collection that helps pre- and in-service social studies teachers to foster an understanding of classic content as well as recent economic developments. Part I offers clear and teachable overviews of the nature of today's complex economic crisis and the corollary changes in teaching economics that flow from revising and updating long-held economic assumptions. Part II provides both detailed best practices for teaching economics in the social studies classroom and frameworks for teaching economics within different contexts including personal finance, entrepreneurship, and history. Part III concludes with effective strategies for teaching at the elementary and secondary school levels based on current research on economic education. From advice on what every economics teacher should know, to tips for best education practices, to investigations into what research tells us about teaching economics, this collection provides a wealth of contextual background and teaching ideas for today's economics and social studies educators.
