

Tearing And Pasting Of Paper

Provides information on organizing small neighborhood playgroups for preschool children, emphasizing informally organized and creative play activities for every month

Examining early intervention programs initiated in the 1970s that were designed to facilitate intellectual development of at-risk groups of children provides valuable information about program development and can act to facilitate discussion regarding the underlying values of such programs. This book is an updated account of Project Enhancement, a preschool program established in Australia almost 30 years ago. Chapter 1 reviews the evolution of the notion of intelligence and introduces alternative terms to clarify the contemporary semantic muddle. Chapter 2 examines the controversy regarding whether the intelligence gap between rich and poor is due to innate differences and whether there are limitations upon the degree to which intelligent behavior can be fostered educationally. Chapter 3 discusses various approaches to environmentally determined differences in cognitive performance. Chapter 4 outlines controversial issues related to the 1960s preschool movement in the United States. Chapter 5 discusses the history, cultural setting, and educational difficulties of the Australian

Aboriginal peoples. Chapter 6 describes the history, rationale, and impact of Australia's Project Enhancement preschool established for rural part-Aboriginal children. Chapter 7 deals with theoretical issues related to re-interpreting the preschool study data detailed in chapter 6 and presents a framework of the interrelated aspects of the gestalt of potential, competence, performance, and evaluation. Chapter 8 considers how this framework can be applied to educational and social problems in different societies. Chapter 9 demonstrates that most of the fundamental purposes and principles of Project Enhancement have been retained. Chapter 10 describes the current preschool program and its outcomes. Contains approximately 450 references. (KB)

Early Childhood Care and Education (ECCE) programme has gained importance today. Driven by socio-economic compulsions these days both parents seek jobs and remain away from the child for the whole day. Early Childhood Care centres provide them a safer alternative where their children can grow and develop in a stimulative environ-ment. Therefore, ECCE has been comprehensively included in teacher training programmes at all levels. Designed as a text for the undergraduate students of education (B.Ed.) and elementary education (B.El.Ed.), it provides uptodate and ready to use material. A complete section in the book is devoted to planning a pre-school or ECCE centre, organizing and managing it for its optimum utility and efficient functioning. The effort has been made to include the topics which will help students to understand the ECCE and its functioning in a straightforward and unconventional manner. From the creator of the bestselling Anti-Coloring Book series with more than 600,000 copies sold, a new parenting guide to encouraging creativity in preschool-age children Young at Art is the first and only comprehensive book for the general audience about the nature, value and impact of art on very young children. Directed towards parents and educators of one to five year olds, Susan Striker explains why children's art is not a frill, but the very foundation upon which all later fundamental skills are built. She drives home the idea that encouraging children's artistic growth will have beneficial effects on all other aspects of their emotional and intellectual development. At the core of this practical guide is the understanding that art is an important tool in teaching young children crucial concepts related to self-expression, reading and writing. As opposed to more structured exercises, such as coloring on dittos and underlining pictures in workbooks, Striker stresses that scribbling and free drawing experiments are the most important art activities a child can engage

Providing a selection of papers presented at ICECE 2018, a biennial conference organised by the Early Childhood Education Program, Universitas Pendidikan Indonesia. The conference's general theme was "Finding Alternative Approaches, Theories, Frameworks, and Practices of Early Childhood Education in the 21th Century." Distinct from other periods of time, the 21st century is characterised by so much knowledge -easy to access but hard to grasp, borderless and hyper-connected society mediated by the internet, high competitiveness -not only within a country but across countries, high mobility, and widening economic discrepancy as neoliberalism has strengthened its influence on every sector of human life. The children of today will face many things that have not yet been invented or discovered, sometimes beyond expectations. Scholars and teachers

of early childhood education need to be aware of these astonishing changes. The way children and childhood are seen cannot stay the same, and so does the way children of this century are educated. The conference opened a discussion about finding alternative approaches, theories, and best practices of early childhood education for a rapidly changing and globalised society.

A New York Review Books Original Whether you call her a coldhearted grifter or the soul of modern capitalism, there's no question that Aimée is a killer and a more than professional one. better, as always, to make a killing. But then something snaps: the master manipulator falls prey to a pure and wayward passion. Aimée has become the avenging angel of her own nihilism, exacting the destruction of a whole society of destroyers. An unholy original, Jean-Patrick Manchette transformed the modern detective novel into a weapon of gleeful satire and anarchic fun. In Fatale he mixes equal measures of farce, mayhem, and madness to prepare a rare literary cocktail that packs a devastating punch.
