Help remediate—and in some cases eliminate—autism and other developmental delays in young children, even in as little as 15 minutes a day with this toolkit of behavioral practices that can be taught at home. Developmental delays and signs of autism usually show up before 18 months of age, yet children are often not diagnosed until they are 4 or 5 years old. In Turn Autism Around, Dr. Mary Barbera explains why parents can't afford to worry and wait in long lines for evaluations and treatment while not knowing how to help their children. She empowers parents, caregivers, and early intervention professionals to regain hope and take back control with simple strategies to dramatically improve outcomes for their children. Dr. Barbera has created a new approach to teaching kids with developmental delays that uses the science of Applied Behavior Analysis (ABA) married with a positive, child-friendly methodology that any parent can use—whether or not their child has delays—to learn to teach communication skills, socialization strategies, as well as tackle sleep, eating, potty training, and behavior challenges in a positive, effective, and lasting way. Turn Autism Around is the first book of its kind that calls attention to an important fact: parents can make a tremendous impact on their child's development through behavioral practices taught at home, even in as little as 15 minutes a day. Her program shows these autism and developmental delays can be remediated, and in some cases, delays can be caught up altogether, if parents intervene while the child is young. This book is for parents of young children aged one-to-five years who are passionate about helping their child as well as learning how they can change the trajectory of their child's and family's life. Eighteen-year-old, Bronwyn Littleton is in love with a stranger she met on a summer night a year ago. A stranger who was tall and broad in a way that made her feel safe. He had dark blue eyes that she can’t stop drawing in her sketch book. And he had a deep, soothing voice that she can’t stop hearing in her dreams. That’s all she knows about him though. Until she runs into him again. At St. Mary’s School for Troubled Teenagers – an all girls reform school – where she’s trapped because of a little crime she committed in the name of her art. Now she knows that her dream man has a name: Conrad Thorne. She knows that his eyes are way bluer and way more beautiful than she thought. And that his face is an artist’s wonderland. But she also knows that Conrad is her best friend’s older brother. Which means he’s completely off-limits. Not to mention, he’s the new soccer coach, which makes him off-limits times two. What makes him off-limits times three however, and this whole scenario an epic tragedy, is that, Conrad, Wyn’s dream man, has a dream girl of his own. And he’s as much in love with his dream girl as Wyn is in love with him...

#1 New York Times bestselling author Sophie Kinsella returns with her trademark blend of sparkling wit and playful romance in this page-turning story of a wedding to remember—and a honeymoon to forget. Lottie just knows that her boyfriend is going to propose, but then his big question involves a trip abroad—not a trip down the aisle. Completely crushed, Lottie reconnects with an old flame, and they decide to take drastic action. No dates, no moving in together, they’ll just get married . . . right now. Her sister, Fliss, thinks Lottie is making a terrible mistake, and will do anything to stop her. But Lottie is determined to say “I do,” for better, or for worse. Praise for Wedding Night “Sophie Kinsella is beloved by millions—her books are properly mood-altering. Wedding Night is funny, fast, and farcical. Faith is a word that is often misunderstood - we may think the innocent lucky few have it while the rest of us couldn't possibly, or that we have to give up independence to attain it. In this book, Sharon Salzberg strips away negative conceptions that dismiss faith as being divisive or requiring blind adherence to a belief system. She offers advice on understanding faith as a healing quality that is grounded in common sense, intelligence and, most importantly, our own experience.
