Seminar paper from the year 1997 in the subject English Language and Literature Studies - Other, Martin Luther University, course: Seminar Academic Discourse, language: English, abstract: Academic writing is a task that students, especially in the social sciences, engage in very frequently during the course of their studies. They have to compose essays, research reports, term papers etc., which, besides being the basis for students' evaluation, are to prepare them for their professional careers later in life. For those who will stay in the field, writing is going to be a major activity. At university a student's writing skills set him or her apart from other students in the eyes of the professor, but there is no real competition; all papers will be read by the instructors. In the professional world, however, with an abundance of academic texts and with limited time, only those articles will get attention that, besides containing profound reasoning, are at the same time well written, i.e. conveniently structured, precise, short, well formulated etc. This paper is part of a study on academic writing conducted within the seminar "Academic Discourse." The study examines students' works with regard to the authors' writing skills. It looks at the various components of a student term paper (linguistic features and structural elements) to detect the problems German students of English have. The objective is to create a guide for current and future students in this department experiencing difficulties in this area. It combines advice from published writing guides and professors, linguistic theory and personal experience, and is to be an introduction to academic writing for beginners and a reference booklet for the more experienced. We did not attempt to produce a "How-to" manual but rather tried to name the problem areas and to offer help on those with advice and examples. It cannot take the responsibility off the students for the further refinement of their skills by othe

Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyze the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1793-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and Leadership made a significant and lasting impact on the early development of the nation of the United States.*

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

A study guide on essays and term papers can help you study by outlining key points that should be included in your submission. A student can often take more liberties when writing an essay. However, term papers may have more rules and requirements that should be met, before the final submission. The study guide will address these variables and may use various methods such as bullet pointed lists and diagrams to drive home the key criteria needed for a successful essay or term paper. You must remember that a study guide is an outline of what must be done. It's important for students to pay attention to their instructors to fully comprehend what is required for each essay and term paper assignment.

Elegant, suggestive, and clarifying, Lewis Thomas's profoundly humane vision explores the world around us and examines the complex interdependence of all things. Extending beyond the usual limitations of biological science and into a vast and wondrous world of hidden relationships, this provocative book explores in personal, poetic essays to topics such as computers, germs, language, music, death, insects, and medicine. Lewis Thomas writes, "Once you have become permanently startled, as I am, by the realization that we are a social species, you tend to keep an eye out for the pieces of evidence that this is, by and large, good for us."

Award winning essayist Scott Russell Sanders once compared the art of essay writing to "the pursuit of mental rabbits"—a rambling through thickets of thought in search of some brief glimmer of fuzzy truth. While some people persist in the belief that essays are stuffy and antiquated, the truth is that the personal essay is an ever-changing creative medium that provides an ideal vehicle for satisfying the human urge to document truths as we experience them and share them with others—to capture a bit of life on paper. Crafting the Personal Essay is designed to help you explore the flexibility and power of the personal essay in your own writing. This hands-on, creativity-expanding guide will help you infuse your nonfiction with honesty, personality, and energy. You'll discover: •An exploration of the basics of essay writing •Ways to step back and scrutinize your experiences in order to separate out what may be fresh, powerful, surprising or fascinating to a reader •How to move past private "journaling" and write for an audience •How to write eight different types of essays including memoir, travel, humor, and nature essays among others •Instruction for revision and strategies for getting published Brimming with helpful examples, exercises, and sample essays, this indispensable guide will help your personal essays transcend the merely private to become powerfully universal.

Integrating Library Use Skills Into the General Education Curriculum

Homework Helpers Essays and Term Papers

This provocative new book will help you design and implement the most effective library user education possible—one that builds on basic library use skills through a progressively sophisticated program that is fully integrated into course curriculum at all levels, from the freshman year to graduation and beyond. By exploring major issues underlying the integration of library use skills and research methodologies into the general education curriculum, contributors raise important questions, offer creative ideas, and provide insight into the many improvements made in library instruction in the past few years. Following an introduction by Patricia Breivik, a recognized national authority on libraries and general education, contributors representing two- and four-year institutions and research universities discuss such issues as the relationship between high school and college programs, research skills instruction in a remote access environment, the use of microcomputers and end user searching programs to promote critical thinking, and the improved relationship between librarians and faculty. In addition to articles on library instruction geared towards question analysis, information generation by field, structure of published knowledge and dissemination of a discipline's literature, chapters identify cooperative efforts needed among school, public, special, academic libraries and other information agencies, computer center personnel, and online database vendors. Bibliographic instruction librarians who are active participants in planning and administering library user education programs will find this volume to be essential for building and developing stronger, more integrated programs.
