Everything You Ever Wanted To Know About The Music Your Parents

Never Wanted You To Hear Believe it or not, music censorship in America did not begin with Tipper Gore's horrified reaction to her daughter's Prince album. The vilification of popular music by government and individuals has been going on for decades. Now, for the first time, Parental Advisory offers a thorough and complete chronicle of the music that has been challenged or suppressed -- by the people or the government -- in the United States. From Dean Martin's "Wham, Bam, Thank you Ma'am" to Marilyn Manson's Antichrist Superstar; from freedom fighters such as Frank Zappa and in-your-face rappers such a N.W.A. to crusaders such as Tipper Gore, this intelligent and entertaining book shows how censorship has crossed sexual, class, and ethnic lines, and how many see it as a de facto form of racism. With nearly one hundred fascinating photographs of musicians, record burning, and controversial cover art; illuminating sidebars; and a decade-by-decade timeline of important moments in censorship history, Parental Advisory is by turns frightening and hilarious -- but always revealing.

Financial planning is a young industry. The International Association of Financial Planning—one of the predecessors to the Financial Planning Association—was formed less than forty years

ago. But as the profession's first tier of advisers reaches maturity, the decisions that may be part of transition planning for their firms loom large. A sale? A partner buyout? A merger? No matter what the choice, its viability hinges on one critical issue—the value of the firm. Unfortunately, many advisers--whether veteran or novice—simply don't know the worth of their practice or how to influence it. That's why How to Value, Buy, or Sell a Financial-Advisory Practice is such an important book. It takes advisers carefully through the logic and the legwork of coming to a true assessment of one of their most important personal assets—their business. Renowned for their years of experience helping advisers tackle the daunting challenges related to the valuation, sale, and purchase of advisory firms, Mark C. Tibergien and Owen Dahl offer guidance that's essential and solutions that work.

With a focus on eight categories including memoir, sports, and true crime, a readers' advisory guide includes coverage of the major authors and works, popularity, and style.

Explores research on readers' advisory services and examines the needs of adults, young adults, and children in a public library setting, discussing the practical aspects of each topic.

Middle-level educators can bridge differences, reduce bias, and help diverse students connect to school. Face to Face Advisories guides 125+ advisory conversations about culture, with daily messages, greetings, share topics, robust and varied activities, and reflection questions, to prompt development of social skills, critical thinking, and open discussion. The advisories help students think critically and with feeling as they: ? Develop appreciation for cultural diversity ? Cultivate connections across differences ? Examine the price we pay for intolerance ? Realize that each of us can be a change agent ? Take action for equity Abundant teacher support: research, theory, resources, and practical tips guide each advisory.

Robo-Advisory is a field that has gained momentum over recent years, propelled by the increasing digitalization and automation of global financial markets. More and more money has been flowing into automated advisory, raising essential questions regarding

the foundations, mechanics, and performance of such solutions. However, a comprehensive summary taking stock of this new solution at the intersection of finance and technology with consideration for both aspects of theory and implementation has so far been wanting. This book offers such a summary, providing unique insights into the state of Robo-Advisory. Drawing on a pool of expert authors from within the field, this edited collection aims at being the vital go-to resource for academics, students, policy-makers, and practitioners alike wishing to engage with the topic. Split into four parts, the book begins with a survey of academic literature and its key insights paired with an analysis of market developments in Robo-Advisory thus far. The second part tackles specific questions of implementation, which are complemented by practical case studies in Part III. Finally, the fourth part looks ahead to the future, addressing questions of key importance such as artificial intelligence, big data, and social networks. Thereby, this timely book conveys both a comprehensive grasp of the status-quo as well as a guiding outlook onto future trends and developments within the field. A guide to help readers' advisors serve teens offers techniques to connect with teens on their own terms, provides tips on creating a positive advisory experience, and includes "sure bets" lists, thematic reading lists, and sources of reviews.

“Even readers who deem themselves confirmed landlubbers will warm to this charming memoir...[also] offers the fine local color of coastal North Carolina.”—Publishers Weekly
When Louis Rubin was thirteen, he built a leaky little boat and paddled it out to the edge of the ship channel in Charleston, South Carolina, where he felt the inexorable pull of the water. In his sixties, dozens of boats later—sailboats, powerboats, inboards and

outboards—the pull is as strong as ever. In the tradition established by Twain, Conrad, and Melville, Small Craft Advisory explores man’s longtime passion for boats. Louis Rubin examines the compulsion that has prompted him and countless other non-nautical persons to spend so much time, and no small portion of their incomes, on watercraft that they can use only infrequently. As his new boat (a cabin cruiser made of wood on a workboat hull) is being built, Rubin tells of his past boats and numerous boating disasters, and draws a poignant comparison between his two passions: watercraft and the craft of writing. “A wistful meditation on risk-taking and a longing for a place where time never runs out.”—The Washington Post Book World “If the point of reading a memoir is to meet a person who is truly good company, and maybe to have a little wisdom rub off at the same time, Small Craft Advisory is a book to read.”—The New York Times Book Review “In describing the building of his boat he is describing the building of his life, reasserting the shaping value of memory and imagination. [A] gracefully written contemplation.”—Library Journal

How climate change can affect our health, from heat-related illnesses to extreme weather events. Climate change affects not just the planet but the people who live on it. In this book, physician Alan Lockwood describes how global warming will be bad for our health. Drawing on peer-reviewed scientific and medical research, Lockwood meticulously details the symptoms of climate change and their medical side effects. Our global ecosystems create webs of interdependence that support life on the planet. Lockwood shows how climate change is affecting these ecosystems and describes the resulting impact on health. For example, rising temperatures create long-duration heat waves during which people sicken and die. Climate change increases the risk for certain infectious diseases, including malaria, dengue fever, West Nile virus, Zika, and Lyme disease. Extreme weather and poor soil conditions cause agricultural shortfalls, leading to

undernutrition and famine. There is even evidence that violence increases in warmer weather—including a study showing that pitchers throw “beanballs” (balls thrown with the intention of hitting the batter) significantly more often in hot weather.

Climate change is real and it is happening now. We must use what we know to adapt to a warmer world and minimize adverse health effects: make city buildings cooler with air conditioning and “cool roofs,” for example, and mobilize resources for predicted outbreaks of disease. But, Lockwood points out, we also need prevention. The ultimate preventive medicine is reducing greenhouse gas emissions and replacing energy sources that depend on fossil fuels with those that do not.

A charming middle-grade fantasy debut that put a new spin on the legend of Camelot, perfect for fans of The School for Good and Evil and A Tale of Magic... Twelve-year-old Ellie can't help that she's a witch, the most hated member of society. Determined to prove her worth and eschew her heritage, Ellie applies to the Fairy Godmother Academy—her golden ticket to societal acceptance. But Ellie's dreams are squashed when she receives the dreaded draft letter to serve as a knight of King Arthur's legendary Round Table. She can get out of the draft—but only if she saves a lost cause. Enter Caedmon, a boy from Wisconsin struggling with the death of his best friend. He first dismisses the draft as ridiculous; magic can't possibly exist. But when Merlin's ancient magic foretells his family's death if he doesn't follow through, he travels to the knights' castle, where he learns of a wicked curse leeching the knights of their power. To break the curse, Ellie and Caedmon must pass a series of deathly trials and reforge the lost, shattered sword of Excalibur. And unless Ellie accepts her witch magic and Caedmon rises to become the knight he's meant to be, they will both fail—and the world will fall to the same darkness that brought King Arthur and Camelot to ruin.
