The Future of the Ancient World

Archaeology of the Night

The Ancient World, Teacher's Edition

The Ancient World : Reading and Vocabulary Study Guide

The sacred consciousness that prevailed in antiquity is the key to unlocking our future • Shows how scientific consciousness, which gives primacy to the sense of sight, estranged us from the participatory spiritual consciousness of antiquity • Explores the vital importance of the imagination in reconnecting us to the spirit world The Future of the Ancient World sheds new light on the evolution of consciousness from antiquity to modern times. The twelve essays in this book examine developments in human consciousness over the past five thousand years that most history books do not touch. In ancient times, human beings were finely attuned to the invisible world of the gods, spirits, and ancestors. Today, by contrast, our modern scientific consciousness regards what is physically imperceptible as unreal. Our experience of the natural world has shifted from an awareness of the divine presence animating all things to the mere scientific analyses of physical attributes, a deadened mode of awareness that relies on our ability to believe only in what we can see. In these richly illustrated and wide-ranging essays that span the cultures of ancient Egypt, Mesopotamia, Greece, Rome, and the early Christian period, Jeremy Naydler shows how the consciousness that prevailed in ancient times may inspire us toward a future in which we once again reconnect with invisible realms. If the history of consciousness bears witness to the loss of visionary and participatory awareness, it also shows a new possibility--the possibility of developing a free and objective relationship to the spirit world. Naydler urges us not only to draw inspiration from the wisdom of the ancients but to carry this wisdom forward into the future in a renewed relationship to the spiritual that is based on human freedom and responsibility. A Historical Perspective

Prentice Hall World Studies

Prentice Hall World History

How did ancient peoples experience, view, and portray the night? What was it like to live in the past when total nocturnal darkness was the norm? Archaeology of the Night explores the archaeology, anthropology, mythology, iconography, and epigraphy of nocturnal practices and questions the dominant models of daily ancient life. A diverse team of experienced scholars uses a variety of methods and resources to reconstruct how ancient peoples navigated the night and what their associated daily—and nightly—practices were. This collection challenges modern ideas and misconceptions regarding the night and what darkness and night symbolized in the ancient world, and it highlights the inherent research bias in favor of “daytime” archaeology. Numerous case studies from around the world (including Oman, Mesoamerica, Scandinavia, Rome, Great Zimbabwe, Indus Valley, Peru, and Cahokia) illuminate subversive, social, ritual, domestic, and work activities, such as witchcraft, ceremonies, feasting, sleeping, nocturnal agriculture, and much more. Were there artifacts particularly associated with the night? Authors investigate individuals and groups (both real and mythological) who share a special connection to nighttime life. Reconsidering the archaeological record, Archaeology of the Night views sites, artifacts, features, and cultures from a unique perspective. This book is relevant to anthropologists and archaeologists and also to scholars of human geography, history, astronomy, sensory studies, human biology, folklore, and mythology. Ancient World

Ancient Civilizations

This book discusses education in the social, economic, political and religious context in which it developed, beginning with education in the time of the ancient Greeks. The focus on "bridges", or connections from past to present, is emphasized throughout. Connections are clearly explained in each chapter. Tables summarize these connections, and the educators whose ideas we use today are profiled in the "Shapers of Education" feature used in each chapter. Discussion questions, a list of suggested activities, a list of annotated websites, suggestions for further reading

timeline of significant dates, learning objectives, and "Shapers of Education" feature and tables.
