The Serpent King

In the fall of 1999, New York Times education reporter Jacques Steinberg was given an unprecedented opportunity to observe the admissions process at prestigious Wesleyan University. Over the course of nearly a year, Steinberg accompanied admissions officer Ralph Figueroa on a tour to assess and recruit the most promising students in the country. The Gatekeepers follows a diverse group of prospective students as they compete for places in the nation's most elite colleges. The first book to reveal the college admission process in such behind-the-scenes detail, The Gatekeepers will be required reading for every parent of a high school-age child and for every student facing the arduous and anxious task of applying to college. "[The Gatekeepers] provides the deep insight that is missing from the myriad how-to books on admissions that try to identify the formula for getting into the best colleges...I really didn't want the book to end." —The New York Times

Make sense of college admissions and prepare a successful application Admission Matters offers comprehensive, expert, and practical advice for parents and students to guide them through the college admissions process. From building a college list, to understanding standardized tests, to obtaining financial aid, to crafting personal statements, to making a final decision, this book guides you every step of the way with clear, sensible advice and practical tips. This new fourth edition has been completely updated to reflect the latest changes in college admissions. including new developments in standardized testing, applications, financial aid and more. process.. With the answers you need and a down-to-earth perspective, this book provides an invaluable resource for stressed-out students and parents everywhere. Applying to college can be competitive and complex. Admission Matters offers real-world expert advice for all students, whether you're aiming an Ivy or the state school close to home. It also includes much needed guidance for students with special circumstances, including students with disabilities, international students, and transfer students. In addition, athletes, artists and performers, and homeschoolers will find valuable guidance as they plan for and apply to college. Understand how the admissions process works and what you can and cannot control Learn how to build a strong list of good-fit colleges Craft a strong application package with a compelling personal statement Get expert advice on early admissions, financial aid, standardized testing, and much more Make a final decision that is the right one for you Whether you think you've got applying to college under control or don't even know where to begin, Admission Matters is your expert guide throughout the college admissions process.

A user-friendly guide written for the college shopper. A book of lists, this is the way to identify colleges where students will get in and fit in; includes the best schools in various fields, hidden gems, best dorm food, great low-cost colleges, best places to study abroad, and activist campuses.

"Dr. Allison McWilliams has hit the nail right on the head and provides focused, effective and actionable ideas for recent college grads who are getting too much inspiration and too little useable help addressing the substantial challenge of building their lives after college. Much of the literature for this audience patronizingly over-compliments them ("You are amazing and can do anything ") or over-criticizes them ("Today's young adults are so entitled - they're impossible ").

Neither of these categorizations is accurate or helpful - quite the opposite. Dr. McWilliams distills her substantial experience in working in some of the most advanced career-preparatory institutions in the country well by picking five key areas for grads to focus their efforts in building a life they own and can love. Her assessments of what's needed directly complements our decade-plus of work in the Stanford Life Design Lab. Her counsel spans the wide swath of necessary critical skills ranging from forming deep habits of personal reflection to navigating the tactical constraints of that tough first job out of college many grads will get. She tells it like it is without making assumptions or judgments about her reader and balances artfully conversing with her reader and challenging them via exercises to do the work. Like Dr. McWilliams, our team believes that successfully journeying those first five years after graduation (and defining what success is wisely ) is terrifically important. If you love anyone who is currently or about to be in those five years, do them the kindness of giving them this book." Dave Evans, Co-Author, New York Times #1 Bestseller *Designing Your Life*, and Co-Founder, Stanford Life Design Lab \*\*\* Young adults making their way from college to life-after-college face a multitude of decisions, challenges, and opportunities. How do you build skills and experiences that will benefit you in the future, when you are on the lowest rung of the professional ladder, or in a job that doesn't seem to be going anywhere? How do you balance creating a life with professional demands when your time is not your own? How do you ensure you are practicing self-care - physically, mentally, financially, and emotionally - when you don't know what the resources are to do that? How do you build community and find friends? How do you build your network and find mentors? And, how do you take ownership for what comes next? These and many others are the questions that all young professionals should be asking themselves, especially in the critical first five years out of college.

This is the time when you will discover more about yourself than at any other point in your life. You will discover strengths, interests, and beliefs that will guide your future career and life decisions. You will learn professional and life skills and habits that will be the foundation for your future professional selves. You will begin to discern what matters to you, and begin to define what a meaningful life looks like, for you. And, you largely will be expected to do all of this work on your own. Where do you begin? FIVE FOR YOUR FIRST FIVE is based on twenty years of experience working with college students and young adults as they make this sometimes challenging and overwhelming transition from college to life-after-college. It combines real-life stories and experiences, from young adults who have already navigated through these waters, with tools, strategies, discussion, and reflection questions. The reader is encouraged to do real, intentional work while exploring the five key areas: Do the Work, Build a Life, Create Community, Practice Reflection, and Own What's Next. Part workbook, part wise counselor and mentor, FIVE FOR YOUR FIRST FIVE provides meaningful insight into what can happen when you truly take ownership for your career and life. \*\*\*

*exception. From 2010 to 2013, Alexandra Logue, then chief academic officer of The City University of New York, led a controversial reform initiative known as Pathways. The program aimed to facilitate the transfer of credits among the university's nineteen constituent colleges in order to improve graduation rates—a long-recognized problem for public universities such as CUNY. Hotly debated, Pathways met with vociferous resistance from many faculty members, drew the attention of local and national media, and resulted in lengthy legal action. In Pathways to Reform, Logue, the figure at the center of the maelstrom, blends vivid personal narrative with an objective perspective to tell how this hard-fought plan was successfully implemented at the third-largest university in the United States. Logue vividly illustrates why change does or does not take place in higher education, and the professional and personal tolls exacted. Looking through the lens of the Pathways program and factoring in key players, she analyzes how governance structures and conflicting interests, along with other*

In this environment, she argues, it is shared governance, combined with a strong, central decision-making authority, that best facilitates necessary reform. ### *The Complete Book of Colleges*

Selects three hundred and eighty one of the best schools in the United States based on student feedback, and provides information on tuition, financial aid, housing, admission requirements, and similar statistics.

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

"Discover colleges that offer exceptional return on investment: a great education at a great price with great career prospects!"--Cover.

**Is the end in sight for college tuition hikes? Tuition and fees at public colleges and universities consistently have risen twice or even three times as fast as comparable increases in the Consumer Price Index in recent years. The results have been rapidly rising student debt (now \$1.4 trillion nationally), rising delinquencies in debt repayment, and a**

**dysfunctional stratification of public college student bodies on the basis of family incomes. This is a broken, unsustainable model for the majority of public colleges. Why has this occurred? The multiple causes include declining state support, the avaricious behavior of individual institutions, their reluctance to adopt productivity-increasing innovations, their cost-increasing competition for higher U.S. News ratings, and misdirected federal student financial aid policies. The key actors are the 50,000 members of the governing boards of public colleges, who too often forget that their primary responsibility is to citizens, taxpayers, and the 15 million students. Instead, board members are co-opted by clever administrators into approving tuition and fee increases well beyond what is needed to make up for declining state funding. Concerted, informed public pressure on governors, legislators, and board members is necessary to move institutions in more positive directions. Higher education funding and tuition and fee inflation are complicated matters that very few people understand well. The Impoverishment of the American College**

Happy Teachers Change the World is the first official, authoritative manual of the Thich Nhat Hanh/Plum Village approach to mindfulness in education. Spanning the whole range of schools and grade levels, from preschool through higher education, these techniques are grounded in the everyday world of schools, colleges, and universities. Beginning firmly with teachers and all those working with students, including administrators, counselors, and other personnel, the Plum Village approach stresses that educators must first establish their own mindfulness practice since everything they do in the classroom will be based on that foundation. The book includes easy-to-follow, step-by-step techniques perfected by educators to teach themselves and to apply to their work with students and colleagues, along with

inspirational stories of the ways in which teachers have made mindfulness practice alive and relevant for themselves and their students across the school and out into the community. The instructions in *Happy Teachers Change the World* are offered as basic practices taught by Thich Nhat Hanh, followed by guidance from educators using these practices in their classrooms, with ample in-class interpretations, activities, tips, and instructions. Woven throughout are stories from members of the Plum Village community around the world who are applying these teachings in their own lives and educational contexts.

Ten years in the works, a masterpiece of reportage, this is the definitive account of the Columbine massacre, its

aftermath, and its significance, from the acclaimed journalist who followed the story from the outset. "The tragedies keep coming. As we reel from the latest horror . . ." So begins a new epilogue, illustrating how Columbine became the template for nearly two decades of "spectacle murders." It is a false script, seized upon by a generation of new killers. In the wake of Newtown, Aurora, and Virginia Tech, the imperative to understand the crime that sparked this plague grows more urgent every year. What really happened April 20, 1999? The horror left an indelible stamp on the American psyche, but most of what we "know" is wrong. It wasn't about jocks, Goths, or the Trench Coat Mafia. Dave Cullen was one of the first reporters on scene, and spent ten years on this book—widely recognized as the definitive account. With a keen investigative eye and psychological acumen, he draws on mountains of evidence, insight from the world's leading forensic psychologists, and the killers' own words and drawings—several reproduced in a new appendix. Cullen paints raw portraits of two polar opposite killers.

They contrast starkly with the flashes of resilience and redemption among the survivors. Expanded with a New Epilogue This is the 21st Volume in the series Memorial Tributes compiled by the National Academy of Engineering as a personal remembrance of the lives and outstanding achievements of its members and foreign associates. These volumes are intended to stand as an enduring record of the many contributions of engineers and engineering to the benefit of humankind. In most cases, the authors of the tributes are contemporaries or colleagues who had personal knowledge of the interests and the engineering accomplishments of the deceased. Through its members and foreign associates, the Academy carries out the responsibilities for which it was established in 1964. Under the charter of the National Academy of Sciences, the National Academy of Engineering was formed as a parallel organization of outstanding engineers. Members are elected on the basis of significant contributions to engineering theory and practice and to the literature of engineering or

on the basis of demonstrated unusual accomplishments in the pioneering of new and developing fields of technology. The National Academies share a responsibility to advise the federal government on matters of science and technology. The expertise and credibility that the National Academy of Engineering brings to that task stem directly from the abilities, interests, and achievements of our members and foreign associates, our colleagues and friends, whose special gifts we remember in this book.

on the over five million students who cross geographical, cultural, and educational borders for higher education outside of their home countries. This book consists of nineteen chapters spread across four sections. Throughout the book, contributors question the existing assumptions and values of international student programs and services, reexamine and explore new perspectives to present the emerging challenges and critical evaluations of student experiences and their identities. Offering a rich understanding of these students and their global college experiences in Africa, Asia, Australia, Europe and Americas, this book offers research-based strategies to effectively recruit, engage, support, and retain international students as they participate in higher educational settings around the world. This book provides resource material to benefit educators, policymakers, and staff who work closely with international students in higher education.
