Mickey Baker's Complete Course in Jazz Guitar

The Jazz Stylings of Howard Roberts consists of transcriptions of melody, solo, comping examples and ensemble passages from Howard's extensive solo albums spanning from the '50's to the '70's in accurate detail. There is a bio of HR (as he was affectionately known to all of his acquaintances and fans) with personal comments from Pete Jolly, well known LA jazz and studio pianist who was best friends with Howard going back to their early days in Phoenix. an extensive section covers the history and development of the Epiphone© and Gibson© signature guitars that Howard created along with the Benson® amp story, which is told by Howard's original partner, Ron Benson, the first of the 'boutique' amplifier companies, so common today. Along the way, Howard's involvement with guitar education and publishing is described culminating in the opening of the Guitar Institute of Technology (now the Musicians Institute) in 1977. A discography of Howard's solo albums as well as the key hit records he played on and a list of the major motion picture soundtracks he participated in as a studio musician in Los Angeles are also included.

Provides exercises for jazz guitar techniques, including jazz riffs, breaks, fill-ins, and solos.

Barry Galbraith was one of the best jazz guitarists of the 1950's. He was also a fine music reader who would write out his own arrangements of standards for his students. Both his playing and his writing are very straightforward. This book takes thirteen of Barry's rough, hand-written arrangements and adds chord symbols, left-hand fingering, and tablature. The companion CD was recorded by John Purse. Also included in the book are quotes about Barry from many other famous musicians, a 7-page article on Barry by his son Don, an obituary by George Russell, and numerous pictures of Barry at different times in his life.

The art of improvising chord-style solos is an important part of any musician's resources. This book has been written to improve that art for

guitar, vibes and all keyboard instruments. A careful study of these solos will give you a thorough understanding of chordal playing and substitutions. It is great for voicing as well as improvisation.

In the tradition of *Silent Spring* and *The Sixth Extinction*, an urgent, meticulously researched, and groundbreaking book about the ways in which chemicals in the modern environment are changing—and endangering—human sexuality and fertility on the grandest scale, from renowned epidemiologist Shanna Swan. In 2017, author Shanna Swan and her team of researchers completed a major study. They found that over the past four decades, sperm levels among men in Western countries have dropped by more than 50 percent. They came to this conclusion after examining 185 studies involving close to 45,000 healthy men. The result sent shockwaves around the globe—but the story didn't end there. It turns out our sexual development is changing in broader ways, for both men and women and even other species, and that the modern world is on pace to become an infertile one. How and why could this happen? What is hijacking our fertility and our health? *Count Down* unpacks these questions, revealing what Swan and other researchers have learned about how both lifestyle and chemical exposures are affecting our fertility, sexual development—potentially including the

increase in gender fluidity—and general health as a species. Engagingly explaining the science and repercussions of these worldwide threats and providing simple and practical guidelines for effectively avoiding chemical goods (from water bottles to shaving cream) both as individuals and societies, *Count Down* is at once an urgent wake-up call, an illuminating read, and a vital tool for the protection of our future.
