Travel back in time to find out about the fantastical wildlife that lived on Earth before we did. From the first living cells to fearsome dinosaurs and giant mammals, take a journey through prehistory to find out about the supersized, the scary, and the downright bizarre animals and plants that inhabited Earth in ancient times. Broken down by animal or plant type, there are profiles on more than 40 key species. With famous favourites such as mighty Tyrannosaurus and huge woolly mammoths, as well as lesser-known organisms, including five-eyed Opabinia and aeroplane-sized pterosaur Quetzalcoatlus, children won't fail to be captivated by the amazing range of beasts on display. Learn about the primeval world itself and how the Earth has changed over time, why fossils form, and the arrival of early humans. Detailed artworks bring the past to life, while pronunciation guides help with tricky names, and a visual index provides a quick overview of every species in the ebook. My Book of Dinosaurs and Prehistoric Life is an ideal first ebook about early plants and animals, and is sure to be a hit with fact-obsessed young fans of all things dinosaurs and other prehistoric life.

An exciting read for any dinosaur lover, The Largest Dinosaurs shares the greatest giants to have walked the Earth with the reader.

Discusses the physical characteristics, behavior, territory, life cycle, and different types of dinosaurs; how they became extinct; and how scientists have learned about them through fossils.

The Dragons of Eden

My First Big Book of Dinosaurs

The Case for Capitalism
Little Kids First Big Book of Dinosaurs

The dinosaurs were the biggest creatures ever to walk on the Earth. Open the huge fold-out pages to discover some of the longest, heaviest and most terrifying of all creatures—from the mighty brachiosaurus to the fearsome tyrannosaurus.

The well-known astronomer and astrobiologist surveys current knowledge of the development of intelligence on Earth in various forms of life and explains his persuasion that intelligence must have developed along similar lines throughout the universe

The First Big Book Collector's Set includes three volumes -- Animals; Dinosaurs; and Why? -- providing fascinating, level-appropriate facts alongside bright and colorful photographs and illustrations. Each book encourages interactivity, satisfies curiosity, and launches kids into a lifetime of exploration!

Did you know that you have a little bit of dinosaur in you? And it's your mother's fault. She fed you that cheese sandwich, which had a calcium atom that used to be in the bones of a T-rex. This humorous story follows a calcium atom as it journeys from dry bones to your jawbone! Inspired by U.S. environmentalist Aldo Leopoldo, this story follows a little bit of dinosaur, a calcium atom, as it travels over time from a dinosaur to a child. In his 1949 classic, A Sand County Almanac, Leopoldo beautifully discussed how man and nature are interconnected. This amazing circle of life is illustrated with humour and a touch of empathy. Sisters Elleen Hutcheson and Darcy Pattison team up to bring Leopoldo's circle of life to kids. Hutcheson is a high school biology teacher; five of Pattison's picture books have been named NSTA Outstanding Science Trade Books. Each is shaking her finger at their mother wondering why she fed them that cheese sandwich.
