Part two concentrates on the management of leased property, repairs, service charges and rent reviews and the statutory framework within which the landlord and tenant relationship has developed. Part three is concerned with the positive management covering both technical skills, such as portfolio performance, and the professional practice environment in which they are exercised. Stapleton's Real Estate Management Practice is written both for advanced students and practitioners. It provides a firm basis for management affecting the decision-making hierarchy from tenant to property, to portfolio, to proprietary unit. While retaining the format of previous editions, it has been updated to reflect the many changes in the law, practice, technology and the market place since the previous edition. In addition, this new edition highlights factors that influence the enhancement of different types of property and the various strategies involved in managing properties from both owners' and occupiers' point of view.

Caste in India, despite its historical resilience, has been undergoing transformation since independence. If caste as a system of rigid stratification has been on the decline, castes as autonomous interest-serving groups have been on ascendance. This book critically engages with the changing notions of caste and its intersection with public policy in India. It discusses key issues such as social security, internal reservation, the idea of Most Backward Classes, caste issues among non-Hindu religious communities, caste in census, caste in market, and service castes and urban planning. Drawing on in-depth case studies from states including Andhra Pradesh, Delhi, Karnataka, Punjab, Tamil Nadu, Telangana, and West Bengal, the volume explores the cyclical process of how caste drives policies, and how policies in turn shape the reality of caste in India. It looks at the impact of factors like protective discrimination, adult franchise and democratic decentralization, horizontal and vertical mobilisation, land reforms, and religious conversion on social mobility, and traditional hierarchy in India. Empirically rich and analytically rigorous, this book will be an excellent reference for scholars and researchers of public policy, public administration, sociology, exclusion studies, social work, law, history, economics, political science, development studies, social anthropology, and political sociology. It will also be of interest to public policy and development practitioners.
