We are now living in a world with over one hundred brands of bottled water. Brand Thinking and Other Noble Pursuits contains interviews with the world's leading designers and thinkers in branding. The interviews contain spirited views on how and why humans have branded the world around us, and the ideas, inventions, and insight inherent in the search. Every year, 6 million companies and more than 100,000 products are launched. They all need an awesome name, but many (such as Xobni, Svbtle, and Doostang) look like the results of a drunken Scrabble game. In this entertaining and engaging book, ace naming consultant Alexandra Watkins explains how anyone—even noncreative types—can create memorable and buzz-worthy brand names. No degree in linguistics required. The heart of the book is Watkins's proven SMILE and SCRATCH Test—two acronyms for what makes or breaks a name. She also provides up-to-date advice, like how to make sure that Siri spells your name correctly and how to nab an available domain name. And you'll see dozens of examples—the good, the bad, and the “so bad she gave them an award.” Alexandra Watkins is not afraid to name names.

The world's leading practitioner of branding predicts the future of companies' identities in an ever -changing marketing landscape What is the future for brands and branding? Does globalization mean that variety and individuality will be crushed out of existence by massive multinationals? Will everywhere and everything become similar, like the world of airports today? Or will there still be room for brands that thrive on being different? What about the impact of digital technology and increasing customer feedback through the internet and social media? What, in fact, do customers want? Today's businesses, in addition to thinking about price and authenticity, have to deal with corporate social responsibility. How does this affect the products and services we consume? How does it influence the way we feel about organizations? Are corporations here to maximize profits and grow, or to help society, or both? With the rapid rise of new markets in India, China, Brazil, and elsewhere, will new global brands emerge based around local cultural strengths and heritage? If so, what will this mean for the traditional dominance of brands based on Western cultural norms? Wally Olins's fascinating book looks at every aspect of the world of branding. With his customary flair and no-nonsense prose, he analyzes the problems facing today's organizations, criticizes corporate missteps, praises those companies who seem to be building and sustaining brands efficiently in our brave new world, and predicts the future of branding. No one interested in marketing, business, or contemporary culture will want to be without this book.

The Seven Brand-Building Principles that Separate the Best from the Rest

INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals.

Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what 's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time?

If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

THE BRAND GAP is the first book to present a unified theory of brand-building. Whereas most books on branding are weighted toward either a strategic or creative approach, this book shows how both ways of thinking can unite to produce a “charismatic brand”—a brand that customers feel is essential to their lives. In an entertaining two-hour read you'll learn: • the new definition of brand • the five essential disciplines of brand-building • how branding is changing the dynamics of competition • the three most powerful questions to ask about any brand • why collaboration is the key to brand-building • how design determines a customer's experience • how to test brand concepts quickly and cheaply • the importance of managing brands from the inside • 220-word brand glossary From the back cover: Not since McLuhan's *THE MEDIUM IS THE MESSAGE* has a book compressed so many ideas into so few pages. Using the visual language of the boardroom, Neumeier presents the first unified theory of branding—a set of five disciplines to help companies bridge the gap between brand strategy and customer experience. Those with a grasp of branding will be inspired by the new perspectives they find here, and those who would like to understand it better will suddenly “get it.” This deceptively simple book offers everyone in the company access to “the most powerful business tool since the spreadsheet.”

Part manifesto, part handbook, THE DESIGNFUL COMPANY provides a lively overview of a growing trend in management—design thinking as a business competence. According to the author, traditional managers have relied on a two-step process to make decisions, which he calls “knowing” and “doing.” Yet in today’s innovation-driven marketplace, managers need to insert a middle step, called “making.” Making is a phase in which assumptions are questioned, futures are imagined, and prototypes are tested, producing a wide range of options that didn’t exist before. The reader is challenged to consider the author’s bold assertion: There can be no real innovation without design. Those who are new to Marty Neumeier’s “whiteboard” series may want to ramp up with the first two books, THE BRAND GAP and ZAG. Both are easy reads. Covered in THE DESIGNFUL COMPANY: - the top 10 “wicked problems” that only design can solve - a new, broader definition of design - why designing trumps deciding in an era of change - how to harness the “organic drivetrain” of value creation - how aesthetics add nuance to managing - 16 levers to transform your company - why you should bring design management inside - how to assemble an innovation metateam - how to recognize and reward talent From the back cover: The complex business problems we face today can’t be solved with the same thinking that created them. Instead, we need to start from a place outside traditional management. Forget total quality. Forget top-down strategy. In an era of fast-moving markets and leap-frogging innovations, we can no longer “decide” the way forward. Today we have to “design” the way forward—or risk ending up in the fossil layers of history. Marty Neumeier, author of THE BRAND GAP and ZAG, presents the new management engine that can transform your company into a powerhouse of nonstop innovation. Using the visual language of the boardroom, Marty Neumeier presents the first unified theory of branding - a set of five disciplines to help companies bridge the gap between brand strategy and brand execution. Those with a grasp of branding will be inspired by what they find here, and those who would like to understand it better will suddenly “get it.”

This marketing classic has been expanded to include new commentary, new illustrations, and a bonus book: The 11 Immutable Laws of Internet Branding. Smart and accessible, The 22 Immutable Laws of Branding is the definitive text on branding, pairing anecdotes about some of the best brands in the world, like Rolex, Volvo, and Heineken, with the signature savvy of marketing gurus Al and Laura Ries. Combining The 22 Immutable Laws of Branding and The 11 Immutable Laws of Internet Branding, this book proclaims that the only way to stand out in today’s marketplace is to build your product or service into a brand—and provides the step-by-step instructions you need to do so. The 22 Immutable Laws of Branding also tackles one of the most challenging marketing problems today: branding on the Web. The Rieses divulge the controversial and counterintuitive strategies and secrets that both small and large companies have used to establish internet brands. The 22 Immutable Laws of Branding is the essential primer on building a category-dominating, world-class brand. This book examines the role of military virtues in today’s armed forces. Although long-established military virtues, such as honor, courage and loyalty, are what most armed forces today still use as guiding principles in an effort to enhance the moral behavior of soldiers, much depends on whether the military virtues adhered to by these militaries suit a particular mission or military operation. Clearly, the beneficiaries of these military virtues are the soldiers themselves, fellow-soldiers, and military organizations, yet there is little that regulates the behavior of soldiers towards civilian populations. As a result, troops trained for combat in today’s missions sometimes experience difficulty in adjusting to the less aggressive ways of working needed to win the hearts and minds of local populations after major combat is over. It can be argued that today’s missions call for virtues that are more inclusive than the traditional ones, which are mainly about enhancing military effectiveness, but a convincing case can be made that a lot can already be won by interpreting these traditional virtues in different ways. This volume offers an integrated approach to the main traditional virtues, exploring their possible relevance and proposing new ways of interpretation that are more in line with the military tasks of the 21st century. The book will be of much interest to students of military ethics, philosophy, and war and conflict in general.

The 2020 Porchlight Marketing & Sales Book of the Year The cofounder and chief branding officer of Red Antler, the branding and marketing company for startups and new ventures, explains how hot new brands like Casper, Allbirds, Sweetgreen, and Everlane build devoted fan followings right out of the gate. We’re in the midst of a startup revolution, with new brands popping up every day, taking over our Instagram feeds and vying for our affection. Every category is up for grabs, and traditional brands are seeing their businesses erode as hundreds of small companies encroach on their territory, each hoping to become the next runaway success. But it’s not enough to have a great idea, or a cool logo. Emily Heyward founded Red Antler, the Brooklyn based brand and marketing company, to help entrepreneurs embed brand as a driver of business success from the beginning. In **Obsessed**, Heyward outlines the new principles of what it takes to build and launch a brand that has people queuing up to buy it on opening day. She takes you behind the scenes of the creation of some of today’s hottest new brands, showing you: • How Casper was able to upend the mattress industry by building a beloved brand where none had existed before • How the dating app Hinge won a fanatical user base and great word-of-mouth with the promise that the app was “designed to be deleted” • Why luggage startup Away, now valued at \$1.4 billion, could build their brand around love of travel by launching with just one product—a hard-shell carry-on suitcase—rather than a whole range of luggage offerings. Whether you’re starting a new business, launching a new product line, or looking to refresh a brand for a new generation of customers, **Obsessed** shows you why the old rules of brand-building no longer apply, and what really works for today’s customers. **Ideal for students of design, independent designers, and entrepreneurs who want to expand their understanding of effective design in business, Identity Designed is the definitive guide to visual branding.** Written by best-selling writer and renowned designer David Airey, **Identity Designed** formalizes the process and the benefits of brand identity design and includes a substantial collection of high-caliber projects from a variety of the world’s most talented design studios. You’ll see the history and importance of branding, a contemporary assessment of best practices, and how there’s always more than one way to exceed client expectations. You’ll also learn a range of methods for conducting research, defining strategy, generating ideas, developing touchpoints, implementing style guides, and futureproofing your designs. Each identity case study is followed by a recap of key points. The book includes projects by Lantern, Base, Pharus, OCD, Rice Creative, Foreign Policy, Underline Studio, Fedoriv, Freytag Anderson, Bedow, Robot Food, Together Design, Believe in, Jack Renwick Studio, ico Design, and Lundgren+Lindqvist. **Identity Designed is a must-have, not only for designers, but also for entrepreneurs who want to improve their work with a greater understanding of how good design is good business.**

Who do you want your customers to become? According to MIT innovation expert and thought leader Michael Schrage, if you aren’t asking this question, your strategic marketing and innovation efforts will fail. In his latest HBR Single, Schrage provides a powerful new lens for getting more value out of innovation investment. He argues that asking customers to do something different doesn’t go far enough—serious marketers and innovators must ask them to become something different instead. Even more, you must invest in their capabilities and competencies to help them become better customers. Schrage’s primary insight is that innovation is an investment in your client, not just a transaction with them. To truly innovate today, designing new products or features or services won’t get you there. Only by designing new customers—thinking of their future state, being the conduit to their evolution—will you transform your business. Schrage explains how the above question (what he calls “The Ask”) will incite you and your team to imagine and design ideal customer outcomes as the way to drive your business’s future. The Single is organized around six key insights and includes practical exercises to help you apply the question to your current situation. Schrage also includes examples from well-known companies—Google, Facebook, Disney, Starbucks, Apple, IKEA, Dyson, Ryanair, and others—to illustrate just what is possible when you apply “The Ask.” Marketing executives, brand managers, strategic innovators, and entrepreneurs alike should understand how successful innovation rebrands the client and not the product. A requisite question for its time, **Who Do You Want Your Customers To Become** will liberate you and your team from ‘innovation myopia’—and turn your innovation efforts on their head. **HBR Singles provide brief yet potent business ideas, in digital form, for today’s thinking professional.**

Best-selling brand expert Marty Neumeier shows you how to make the leap from a company-driven past to the consumer-driven future. You’ll learn how to flip your brand from offering products to offering meaning, from value protection to value creation, from cost-based pricing to relationship pricing, from market segments to brand tribes, and from customer satisfaction to customer empowerment. In the 13 years since Neumeier wrote The Brand Gap, the influence of social media has proven his core theory: “A brand isn’t what you say it is - it’s what they say it is.” People are no longer consumers or market segments or tiny blips in big data. They don’t buy brands. They join brands. They want a vote in what gets produced and how it gets delivered. They’re willing to roll up their sleeves and help out—not only by promoting the brand to their friends, but by contributing content, volunteering ideas, and even selling products or services. At the center of the book is the Brand Commitment Matrix, a simple tool for organizing the six primary components of a brand. Your brand community is your tribe. How will you lead it?

A fundamental paradigm shift has occurred in marketing and branding. Today the most successful CEOs, executives, entrepreneurs and enterprises set their sites on developing a long-term platform instead of a short-term strategy that supports and builds buzz for their personal or business brand. That ’s really the key to the new business mindset — the recognition that branding and marketing are an ongoing, steady stream of small efforts, not a series of gigantic pushes. Social media, blogging and other business development activities — both online and off — are about the persistent, ongoing process of building a platform, creating credibility and increasing the number of people that you funnel into your potential client and network pipeline. Converting those people into clients or fans may take a month, a year or two years, but the new mindset leads you to strategies that will keep that pipeline full. In short, you need to start a bunch of small fires to keep your brand burning hot. How can today ’s CEOs, executives and entrepreneurs keep these fires going and powerfully get their messages across, motivate others to action and be authentic — all while simultaneously shepherding initiatives from creation to implementation in high-demand markets? CEO, executive and team branding are key factors that enable effective leaders to achieve peak performance, gain greater influence in their industries and generate increased engagement within their companies. By creating a brand (business or personal) by design instead of default, leaders and companies bring their brand promise into every interaction across the board. A personal, team or business brand is not just a single statement or a clever quip but a multilayered, congruent narrative told across multiple channels — online and off — within the organization and to the business community at large. The power is in knowing how to tell the story. The book will introduce CEOs and executives in Fortune 500 companies and entrepreneurs in SMBs to the SMG Brand Mapping Process®, a process that will guide them in creating personal, team and business brands that work in harmony and parallel with each other.
