Minos and the Moderns considers three mythological complexes that enjoyed a unique surge of interest in early twentieth-century European art and literature: Europa and the bull, the minotaur and the labyrinth, and Daedalus and Icarus. All three are situated on the island of Crete and are linked by the figure of King Minos. Drawing examples from fiction, poetry, drama, painting, sculpture, opera, and ballet, *Minos and the Moderns* is the first book of its kind to treat the role of the Cretan myths in the modern imagination. Beginning with the resurgence of Crete in the modern consciousness in 1900 following the excavations of Sir Arthur Evans, Theodore Ziolkowski shows how the tale of Europa-in poetry, drama, and art, but also in cartoons, advertising, and currency-was initially seized upon as a story of sexual awakening, then as a vehicle for social and political satire, and finally as a symbol of European unity.

In contrast, the minotaur provided artists ranging from Picasso to Dürrenmatt with an image of the artist's sense of alienation, while the labyrinth suggested to many writers the threatening sociopolitical world of the twentieth century. Ziolkowski also considers the roles of such modern figures as Marx, Nietzsche, and Freud; of travelers to Greece and Crete from Isadora Duncan to Henry Miller; and of the theorists and writers, including T. S. Eliot and Thomas Mann, who hailed the use of myth in modern literature. *Minos and the Moderns* concludes with a summary of the manners in which the economic, aesthetic, psychological, and anthropological revisions enabled precisely these myths to be taken up as a mirror of modern consciousness. The book will appeal to all readers interested in the classical tradition and its continuing relevance and especially to scholars of Classics and modern literatures.

This is an account of everyday life in ancient Egypt, as seen through the eyes of a real person, Vizier Rekhmire, whose tomb still exists. It takes the reader on a fascinating tour exploring Egyptian history, the City of the Dead, Thebes and the Valley of the Kings, and the pyramids.

Los trabajos que se recogen en este volumen sexto de la serie monográfica Treballs d'Etnoarqueologia son desarrollos de las contribuciones presentadas al Congreso Internacional "Etnología de la Prehistoria: más allá de la analogía", que tuvo lugar en Barcelona del 1 al 3 de septiembre de 2004. La interpretación arqueológica sobre la forma de vida de las sociedades prehistóricas presenta aspectos difíciles de demostrar. La Etnoarqueología trata de evaluar la validez del método arqueológico por medio del estudio de los grupos sociales que todavía hoy conservan costumbres parecidas a las prehistóricas. Los tres grandes temas que se trataron en el Congreso (conceptos y definiciones de Etnoarqueología, Etnoarqueología aplicada, y Arqueología etnohistórica) se corresponden con otras tantas partes del libro que sirven como marco a los distintos trabajos. El volumen se cierra con un resumen de las sesiones de debate y con las conclusiones del encuentro.

The Civil War changed the United States in many ways—economic, political, and social. Of these changes, none was more important than Emancipation. Besides freeing nearly four million slaves, it brought agricultural wage labor to a reluctant South and gave a vote to black adult males in the former slave states. It also offered former slaves new opportunities in education, property ownership—and military service. From late 1862 to the spring of 1865, as the Civil War raged on, the federal government accepted more than 180,000 black men as soldiers, something it had never done before on such a scale. Known collectively as the United States Colored Troops and organized in segregated regiments led by white officers, some of these soldiers guarded army posts along major rivers; others fought Confederate raiders

to protect Union supply trains, and still others took part in major operations like the Siege of Petersburg and the Battle of Nashville. After the war, many of the black regiments took up posts in the former Confederacy to enforce federal Reconstruction policy. *Freedom by the Sword* tells the story of these soldiers' recruitment, organization, and service. Thanks to its broad focus on every theater of the war and concentration on what black soldiers actually contributed to Union victory, this volume stands alone among histories of the U.S. Colored Troops.

Art and Spiritual Transformation

Minos and the Moderns

The primal role of art in awakening and liberating the soul of humanity • Presents a seven-stage journey of transformation moving from the darkened soul to the light of spiritual illumination • Provides a meditation practice to experience the spiritual energy embedded within art • Includes artists Alex Grey, Jackson Pollock, Mark Rothko, Walter Gaudnek, and others *Art and Spiritual Transformation* presents a seven-stage journey from the darkened soul to the light of spiritual illumination that is possible through the world of art. Finley Eversole introduces a meditation practice that moves beyond the visual content of an art form in order to connect with its embedded spiritual energy, allowing the viewer to tap in to the deeper consciousness inherent in the artwork and awaken dormant powers in the depths of the viewer's soul. Examining modern and postmodern artwork from 1945 onward, Eversole

reveals the influences of ancient Egypt, India, China, and alchemy on this art. He draws extensively on philosophy, myth and symbolism, literature, and metaphysics to explain the seven stages of spiritual death and rebirth of the soul possible through art: the experience of self-loss, the journey into the underworld, the experience of the dark night of the soul, the conflict with and triumph over evil, the awakening of new life in the depths of being, and the return and reintegration of consciousness on a higher plane of being, resulting finally in ecstasy, transfiguration, illumination, and liberation. To illustrate these stages, Eversole includes works by abstract expressionists Jackson Pollock, Willem de Kooning, and Mark Rothko and modern visionary artists Alex Grey and Ernst Fuchs, among others, to reveal the powerful and liberating forces art contributes to the transformation and evolution of human consciousness.

The third volume of a comprehensive reference work detailing every play written by a British author during the English Renaissance. The years covered in this volume saw the start of Shakespeare's career as a dramatist.

This title explores the most remote beginnings of the Mediterranean civilizations that became classical Greece, and produces evidence to show that Homer's kings and heroes were almost certainly flesh and bone. It is the story of the great archaeological discoveries in Crete and Greece, made by Heinrich Schliemann and Sir Arthur Evans, who brought to light the burnt-out ruins of Troy, the Palace and treasure-filled tombs of the Mycenaean Kings, and the vast Palace of Sea Kings at Knossos. Chapters include The Treasure of Priam, Golden Mycenae, Island of Legend, and Palace of the Sea Kings. Pithily written, rich in anecdote and superbly illustrated with

examples of ancient craftsmanship, this book by an archaeologist of world renown ranges freely over the civilisations of the last five thousand years. The theme is a fascinating one. Why is it, Professor Clark asks, that human beings value precious metals, gems and a few organic materials like ivory and pearls so highly? All are difficult to obtain and largely useless for practical purposes. Yet the prestige associated with possession down the ages is undoubted. Position, sanctity and - by extension - the social and political hierarchies of entire societies have become embodied in these materials. Though first exploited to the full in the service of early cults and rulers, their appreciation has survived social change, and personal jewellery and insignia of rank are today more common than ever before. The reasons why are authoritatively explored in a remarkable book.
