Between the 18th and 19th centuries, Britain experienced massive leaps in technological, scientific, and economical advancement

"Addictive, intelligent, edge-of-your seat writing; as urgent and gripping as it gets."- Oliver Harris, bestselling author of the Nick Belsey thrillers. It takes a cult leader to kill a cult. On the run from past colleagues, cult leader and ex-CIA agent Christopher Wren walks into a white supremacist bar in northern Utah, looking only to get beaten up. What he uncovers instead is repugnant; the beginning threads of a vast human trafficking organization run with ruthless corporate precision, funneling thousands of homeless people from the streets to... Nobody knows. Nobody cares. They should. A civil war is brewing in the wilds of America. One spark in the tinderkeg could ignite the inferno, and now Wren finds himself alone in the dark, watching the spark fall. If you love Jack Reacher, John Milton or Alex Cross you'll love this book. Get it today to plunge into Wren's battle for America's soul.

Security escorted me out of the building, not even allowing me to go back to my desk to clear out my belongings. I walked to the parking garage across the street stunned, angry, confused. Then I called my dad. I'll never forget the first question he asked me. "Was it worth it?" Without a beat of hesitation, I answered, "Yes." When she landed a contract position at Facebook, Cassandra Spencer thought her life was finally coming together. It was her dream job, until one day, when she started to notice odd notes on the accounts of prominent

conservatives on the platform. Knowing that people deserved to learn the truth, she entrusted the evidence to Project Veritas-and was promptly fired from Facebook. Almost overnight, she found herself in poverty, unemployable, and everything she cared about, including her daughter, taken away from her. This book is not a Project Veritas tell-all. This book is the story of a single mother who, unwilling to give up on life, became an undercover journalist who exposed the dishonesty of companies like Facebook and Google, as well as politicians like Beto O'Rourke and Bernie Sanders, all while continuing to fight a family court system stacked against her. Searing, hopeful, and honest, Cassandra's story is one we can all relate to in our current social climate.

Through journal entries, sixteen-year-old Miranda describes her family's struggle to survive after a meteor hits the moon, causing worldwide tsunamis, earthquakes, and volcanic eruptions.

Impact

If you've ever felt too overwhelmed to make a difference, or just unsure of how to apply your unique skills to a bigger purpose, this book is ready to unlock your potential. When you feel that pull to be part of social change, where do you start? How can you ensure that your good intentions create a positive impact? How do you focus your scattered efforts? And how do

you sustain yourself throughout? Impact brings you the answers. Drawing on their network and experience as founders of She's the First, Christen Brandt and Tammy Tibbetts show you how to create your own impact strategy, one that fits into your life and allows you to match what you have with what the world needs. Their guidance, paired with interactive activities, will lead you to identify your North Star, find the right partners, and plug into movements for long-term, systemic change. Equally important, you'll learn how to address biases, practice allyship, and shift power to become more inclusive and effective in your journey.

Allergies, asthma, obesity, acne: these are just a few of the conditions that may be caused—and someday cured—by the microscopic life inside us. The key is to understand how this groundbreaking science influences your health, mood, and more. In just the last few years, scientists have shown how the microscopic life within our bodies— particularly within our intestines—has an astonishing impact on our lives. Your health, mood, sleep patterns, eating preferences—even your likelihood of getting bitten by mosquitoes—can be traced in part to the tiny creatures that live on and inside of us. In *Follow Your Gut*, pioneering scientist Rob Knight pairs with award-winning science journalist Brendan Buhler to explain—with good humor and easy-to-grasp examples—why these new findings matter to everyone. They lead a detailed tour of the previously unseen world inside our bodies, calling out the diseases and conditions believed to be most directly impacted by

them. With a practical eye toward deeper knowledge and better decisions, they also explore the known effects of antibiotics, probiotics, diet choice and even birth method on our children ' s lifelong health. Ultimately, this pioneering book explains how to learn about your own microbiome and take steps toward understanding and improving your health, using the latest research as a guide.

The inspiration for the USA Network series *Shooter* He was one the best Marine snipers in Vietnam. Today, twenty years later, disgruntled hero of an unheroic war, all Bob Lee Swagger wants to be left alone and to leave the killing behind. But with consummate psychological skill, a shadowy military organization seduces Bob into leaving his beloved Arkansas hills for one last mission for his country, unaware until too late that the game is rigged. The assassination plot is executed to perfection—until Bob Lee Swagger, alleged lone gunman, comes out of the operation alive, the target of a nationwide manhunt, his only allies a woman he just met and a discredited FBI agent. Now Bob Lee Swagger is on the run, using his lethal skills once more—but this time to track down the men who set him up and to break a dark conspiracy aimed at the very heart of America.

This practical guide shows how to facilitate collaboration among diverse individuals and organizations to navigate complexity and create

change in our interconnected world. The social and environmental challenges we face today are not only complex, they are also systemic and structural and have no obvious solutions. They require diverse combinations of people, organizations, and sectors to coordinate actions and work together even when the way forward is unclear. Even so, collaborative efforts often fail because they attempt to navigate complexity with traditional strategic plans, created by hierarchies that ignore the way people naturally connect. By embracing a living-systems approach to organizing, impact networks bring people together to build relationships across boundaries; leverage the existing work, skills, and motivations of the group; and make progress amid unpredictable and ever-changing conditions. As a powerful and flexible organizing system that can span regions, organizations, and silos of all kinds, impact networks underlie some of the most impressive and large-scale efforts to create change across the globe. David Ehrlichman draws on his experience as a network builder; interviews with dozens of network leaders; and insights from the fields of network science, community building, and systems thinking to provide a clear process for creating and developing impact networks. Given the increasing complexity of our society and the issues we face, our ability to form, grow, and work through networks has never been more essential.

The Atlantic A vibrant story collection about Cambodian-American life—immersive and comic, yet unsparing—that offers profound insight into the intimacy of queer and immigrant communities

Seamlessly transitioning between the absurd and the tenderhearted, balancing acerbic humor with sharp emotional depth, Afterparties

offers an expansive portrait of the lives of Cambodian-Americans. As the children of refugees carve out radical new paths for themselves in California, they shoulder the inherited weight of the Khmer Rouge genocide and grapple with the complexities of race, sexuality,

friendship, and family. A high school badminton coach and failing grocery store owner tries to relive his glory days by beating a rising star teenage player. Two drunken brothers attend a wedding afterparty and hatch a plan to expose their shady uncle's snubbing of the bride and groom. A queer love affair sparks between an older tech entrepreneur trying to launch a "safe space" app and a disillusioned young teacher obsessed with Moby-Dick. And in the sweeping final story, a nine-year-old child learns that his mother survived a racist school shooter. The stories in Afterparties, "powered by So's skill with the telling detail, are like beams of wry, affectionate light, falling from different directions on a complicated, struggling, beloved American community" (George Saunders).

The night sky has stopped bleeding. Everyone has made it home safe, if not sound. The National Guard has arrived with food and water. The people of Snow Hill have an opportunity to prepare for winter, and what lies beyond. But the desperation, violence, and fear haven't abated. Break-ins and vandalism terrify the residents. Thieves slip between houses in the thick of night. People are turning up dead. Using his expanded powers, the Mayor creates a new local police force to bring the townspeople under his control. Not everyone appreciates the effort. It soon becomes clear that when a malevolent government tightens its grip, it is liberty that suffers. There's a storm on the horizon, but no one sees it coming. A kind old woman will find neighbors can

become enemies, an old war dog will show he still has teeth, and a monster will recover his humanity.

"This book's great service is that it challenges us to consider the ways in which our institutions and systems, and the assumptions, positions and divisions that undergird them, leave us ill prepared for the next crisis."—Robert Rubin, *The New York Times Book Review*

"Full of valuable insight and telling details, this may well be the best thing to read if you want to know what happened in 2020." --Paul Krugman, New York Review of Books

Deftly weaving finance, politics, business, and the global human experience into one tight narrative, a tour-de-force account of 2020, the year that changed everything--from the acclaimed author of Crashed. The shocks of 2020 have been great and small, disrupting the world economy, international relations and the daily lives of virtually everyone on the planet.

Never before has the entire world economy contracted by 20 percent in a matter of weeks nor in the historic record of modern capitalism has there been a moment in which 95 percent of the world's economies were suffering all at the same time. Across the world hundreds of millions have lost their jobs. And over it all looms the specter of pandemic, and death. Adam Tooze, whose last book was universally lauded for guiding us coherently through the chaos of the 2008 crash, now brings his bravura analytical and narrative skills to a panoramic and synthetic overview of our current crisis. By focusing on finance and business, he sets the pandemic story in a

frame that casts a sobering new light on how unprepared the world was to fight the crisis, and how deep the ruptures in our way of living and doing business are. The virus has attacked the economy with as much ferocity as it has our health, and there is no vaccine arriving to address that. Tooze's special gift is to show how social organization, political interests, and economic policy interact with devastating human consequences, from your local hospital to the World Bank. He moves fluidly from the impact of currency fluctuations to the decimation of institutions--such as health-care systems, schools, and social services--in the name of efficiency. He starkly analyzes what happened when the pandemic collided with domestic politics (China's party conferences; the American elections), what the unintended consequences of the vaccine race might be, and the role climate change played in the pandemic. Finally, he proves how no unilateral declaration of 'independence' or isolation can extricate any modern country from the global web of travel, goods, services, and finance.

Beyond Measure

A powerful manifesto for CEOs and employees alike: Influential and award-winning business leader Margaret Hefernan reveals

how organizations can build ideal workplace cultures and create seismic shifts by making deceptively small changes. By implementing sweeping changes, businesses often think it's possible to do better, to earn more, and have happier employees. So why does engagement prove so difficult and productivity so elusive? In Beyond Measure, Margaret Heffernan looks back over her decades spent overseeing different organizations and comes to a counterintuitive conclusion: it's the small shifts that have the greatest impact. Heffernan argues that building the strongest organization can be accelerated by implementing seemingly small changes, such as embracing conflict as a creative catalyst; using every mind on the team; celebrating mistakes; speaking up and listening more; and encouraging time off from work. Packed with incredible anecdotes and startling statistics, Beyond Measure takes us on a fascinating tour across the globe, highlighting disparate businesses and revealing how they've managed to change themselves in big ways through incremental shifts. How did the CIA revolutionize their intelligence gathering with one simple question? How did one organization increase their revenue by \$15 million by instituting a short coffee break? How can a day-long hackathon change the culture of a company? Told with wry wit and knowing humor, Heffernan proves that it's often the small changes that make the greatest, most lasting impact.

In 1450, all Europe's books were handcopied and amounted to only a few thousand. By 1500 they were printed, and numbered in their millions. The invention of one man - Johann Gutenberg - had caused a revolution. Printing by movable type was a discovery waiting to happen. Born in 1400 in Mainz, Germany, Gutenberg struggled against a background of plague and religious upheaval to bring his remarkable invention to light. His story is full of paradox: his ambition was to reunite all Christendom, but his invention shattered it; he aimed to make a fortune, but was cruelly denied the fruits of his life's work. Yet history remembers him as a visionary; his discovery marks the beginning of the modern world.

The New York Times bestselling authors of *Switch* and *Made to Stick* explore why certain brief experiences can jolt us and elevate us and change us—and how we can learn to create such extraordinary moments in our life and work. While human lives are endlessly variable, our most memorable positive moments are dominated by four elements: elevation, insight, pride, and connection. If we embrace these elements, we can conjure more moments that matter. What if a teacher could design a lesson that he knew his students would remember twenty years later? What if a manager knew how to create an experience that would delight customers? What if you had a better sense of how to create memories that matter for your children? This book delves into some fascinating mysteries of experience: Why we tend to remember the best or worst moment of an experience, as well as the last moment, and forget the rest. Why “we feel most comfortable when things are certain, but we feel most alive when they’re not.” And why our most cherished memories are clustered into a brief period during our youth. Readers discover how brief experiences can change lives, such as the experiment in which two strangers meet in a room, and forty-five minutes later, they leave as best friends. (What happens in that time?) Or the tale of the world’s youngest female billionaire, who credits her resilience to something her father asked the family at the dinner table. (What was that simple question?) Many of the defining moments in our lives are the result of accident or luck—but why would we leave our most meaningful, memorable moments to chance when we can create them? *The Power of Moments* shows us how to be the author of richer experiences.

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and

implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

The Impact of Printing 1451800

The Fourth Industrial Revolution

We are in an unprecedented transition in human history. The way societies and organizations have developed over the past two millennia has run its course. With the advent of the digital age, we have the tools, knowledge, and resources to act upon our desires to create, innovate, and collaborate in ways not available to anyone—before now.

Transformation has everything to do with how we give of ourselves to one another and the difference that makes. It is about how we live together, work together, change together, and lead together. Part of this transition is the transformation of human purpose. Do we define ourselves by the roles that we serve in institutions? Or, do we define ourselves by the impact we seek to create? Your personal circle of impact is not about what you want to have, but what we can create—together.

'Unpredictable, challenging and compelling' Sophie Hannah A terrible car accident - or calculated murder? An evening out for five students ends in tragedy, with two dead and one critically injured. Nicci Waldock survives, but her life is left in tatters. Years later, a sighting of Jack Bailey, the brother of her dead friend, leaves her with a shocking realisation about the night of the accident. Helped by former journalist Celia Henry, Nicci sets out to learn the truth about what really happened, and discovers a series of lies and dangerous secrets that have distorted everything she thinks she knows. In uncovering the tangled truth of what happened that night three years ago, Nicci must decide who she can trust, and who is about to kill again. And she realises that everything can be saved or lost in the

moment before impact. Praise for Alison Bruce 'As always, Bruce produces a rewarding read' The Times 'I Did It For Us held me from the off. It's compelling, slickly plotted and brilliantly written' Amanda Jennings 'One of our most interesting crime writers' Daily Mail

Edgar Award Winner: A teenager and his family must uncover the haunting historical legacy of their Civil War-era house. Shortly after moving into an old, spooky home, thirteen-year-old Thomas Small and his family start hearing strange noises. The house has a past, and when Thomas discovers a hidden passageway that may have been part of the Underground Railroad, the family realizes the house has a history as well. To find out all there is to know about the House of Dies Drear, Thomas must explore secret rooms—and the secrets of lives lived centuries before, lives that tell the story of America's troubled early years. Despite enormous investments of time and money, are we making a dent on the social and environmental challenges of our time? What if we could exponentially increase our impact? Around the world, a new generation is looking beyond greater profits, for meaningful purpose. But, unlike business, few social interventions have achieved significant impact at scale. Inspired by the

modern innovation practices, popularized by bestseller The Lean Startup, that have fueled technology breakthroughs touching every aspect of our lives, Lean Impact turns our attention to a new goal - radically greater social good. Social change is far more complicated than building a new app. It requires more listening, more care, and more stakeholders. To make a lasting difference, solutions must be embraced by beneficiaries, address root causes, and include an engine that can accelerate growth to reach the scale of the need. Lean Impact offers bold ideas to reach audacious goals through customer insight, rapid experimentation and iteration, and a relentless pursuit of impact. Ann Mei Chang brings a unique perspective from across sectors, from her years as a tech executive in Silicon Valley to her most recent experience as the Chief Innovation Officer at USAID. She vividly illustrates the book with real stories from interviews with over 200 organizations across the US and around the world. Whether you are a nonprofit, social enterprise, triple bottom line company, foundation, government agency, philanthropist, impact investor, or simply donate your time and money, Lean Impact is an essential guide to maximizing social impact and scale.

A piercing and scientifically grounded look at the emergence of the coronavirus pandemic and how it will change the way we live—"excellent and timely." (The New Yorker) Apollo's Arrow offers a riveting account of the impact of the coronavirus pandemic as it swept through American society in 2020, and of how the recovery will unfold in the coming years. Drawing on momentous (yet dimly remembered) historical epidemics, contemporary analyses, and cutting-edge research from a range of scientific disciplines, bestselling author, physician, sociologist, and public health expert Nicholas A. Christakis explores what it means to live in a time of plague—an experience that is paradoxically uncommon to the vast majority of humans who are alive, yet deeply fundamental to our species. Unleashing new divisions in our society as well as opportunities for cooperation, this 21st-century pandemic has upended our lives in ways that will test, but not vanquish, our already frayed collective culture. Featuring new, provocative arguments and vivid examples ranging across medicine, history, sociology, epidemiology, data science, and genetics, Apollo's Arrow envisions what happens when the great force of a deadly germ meets the enduring reality of our evolved social nature.

An insider's guide to the coming philanthropic revolution Meet the next generation of big donors—the Gen X and Millennial philanthropists who will be the most significant donors ever and

will shape our world in profound ways. Hear them describe their ambitious plans to revolutionize giving so it achieves greater impact. And learn how to help them succeed in a world that needs smart, effective donors now more than ever. As “next gen donors” step into their philanthropic roles, they have not only unprecedented financial resources, but also big ideas for how to wield their financial power. They want to disrupt the traditional world of charitable giving, and they want to do so now, not after they retire to a life of philanthropic leisure. Generation Impact pulls back the curtain on these rising leaders and their “Impact Revolution,” offering both extensive firsthand accounts and expert analysis of the hands-on, boundary-pushing, unconventional strategies next gen donors are beginning to pursue. This fascinating book also shows another side of the donors in Generation Impact: they want to respect the past even as they transform the future. They are determined to honor the philanthropic legacies and values they’ve inherited by making big giving more effective than ever before. If they succeed, they can make historic progress on causes from education to the environment, from human rights to health care. Based on years of research and close engagement with next gen donors, Generation Impact offers a unique profile of the new faces of philanthropy. Find out, directly from them: How they want to revolutionize giving to expand its positive impact on our lives and our communities. Which causes interest them, how they want to engage with those causes ... and, perhaps more important, how they do not want to engage. Which new tools and strategies for change excite them most. What they are learning from previous generations, and what they want to bring to their work alongside those generations. How we can all ensure their historic potential is channeled in ways that make our world better. The Impact

Revolution will be messy, but it could also result in solutions for some of our most persistent problems. Generation Impact offers targeted, practical advice to parents, families, and their advisors, as well as nonprofit professionals—those who work closest with these next gen donors—on how to engage, nurture, and encourage them as they reshape major giving and make their mark on history. Help them channel their enthusiasm—and their wealth—to make the most positive difference in a world with such great need.

*A powerful and redemptive story of how the dazzling world of roller derby helped one young woman transform her fear and self-doubt into gutsy, big-hearted, adventurous living “A universal story of healing and triumph, made all the more beautiful, wild, and free by Gabe’s fierce love for roller derby and her team, who become her family.”—ABBY WAMBACH, Olympian, activist, and author of the #1 New York Times bestseller *Wolfpack* Growing up queer in a conservative Midwestern town, Gabe Montesanti never felt comfortable in her own skin. A competitive swimmer, she turned to perfectionism and self-control to create a sense of safety, only to develop an eating disorder and constantly second-guess her instincts. When she enters graduate school in St. Louis, she is determined to put the baggage of her childhood behind her. With no prior experience, she joins Arch Rival, one of the top-ranked roller derby leagues in the world. Gabe instantly falls in love with the sport’s roughness, intensity, and open embrace of people who are literally and figuratively scarred. She soon finds community and a sense of belonging, reveling in the tattoos, glitter, and campiness. But when Gabe suffers a catastrophic injury, she can no longer ignore the parallels between the physicality of roller derby and the unresolved trauma of her upbringing. Rendered*

inactive, forced to be still, Gabe realizes she needs to heal her emotional wounds as much as her physical ones; she must confront her fear and self-diminishment in order to feel truly alive. Told with unflinching honesty and a giant dose of wonder, Brace for Impact is a tender, inspiring memoir about the everyday heroism of pursuing a life less ordinary, and the deeply human need to be at peace with who you are.

High-Impact ePortfolio Practice

A Step-by-Step Plan to Create the World You Want to Live In

At a moment when over half of US colleges are employing ePortfolios, the time is ripe to develop their full potential to advance integrative learning and broad institutional change. The authors outline how to deploy the ePortfolio as a high-impact practice and describe widely-applicable models of effective ePortfolio pedagogy and implementation that

demonstrably improve student learning across multiple settings. Drawing on the campus ePortfolio projects developed by a constellation of institutions that participated in the Connect to Learning network, Eynon and Gambino present a wealth of data and revealing case studies. Their broad-based evidence demonstrates that, implemented with a purposeful framework, ePortfolios correlate strongly with increased retention and graduation rates, broadened student engagement in deep learning processes, and advanced faculty and institutional learning. The core of the book presents a comprehensive research-based framework, along with practical examples and strategies for implementation, and identifies the key considerations that need to be addressed in the areas of Pedagogy, Professional Development, Outcomes Assessment, Technology and Scaling Up. The authors identify how the ePortfolio experience enhances other high-impact practices (HIPs) by creating unique opportunities for connection and synthesis across courses, semesters and co-curricular experiences. Using ePortfolio to integrate learning across multiple HIPs enables students reflect and construct a cohesive signature learning experience. This is an invaluable resource for classroom faculty and educational leaders interested in transformative education for 21st century learners. This book is the first publication to provide a comprehensive overview about the market, financial instruments and the associated impact assessment for interested practitioners and academics. Specifically, it will introduce the concept of impact investing within the broader field of social finance as

well as the relevant actors, present current financing instruments and the various tools to assess the impact of the investing strategy. This useful reference tool will be of interest to academics and researchers in the field of impact investing. Impact investing is a dynamic field that has been recently been discussed as a supplemental funding source for addressing societal problems. The topic has generated significant interest and is presumed to achieve double-digit growth rates for the coming years.

Research shows that enriching learning experiences such as learning communities, service-learning, undergraduate research, internships, and senior culminating experiences - collectively known as High-Impact Practices (HIPs) - are positively associated with student engagement; deep, and integrated learning; and personal and educational gains for all students - particularly for historically underserved students, including first-generation students and racially minoritized populations. While HIPs' potential benefits for student learning, retention, and graduation are recognized and are being increasingly integrated across higher education programs, much of that potential remains unrealized; and their implementation frequently uneven. Colleges are eager to use the HIP nomenclature for recruitment, promoting equity for traditionally underserved student populations, and preparing lifelong learners and successful professionals. However, HIPs defy easy categorization or standardized implementation. They rely on fidelity, quality, and consistency - being "done well" - to achieve their learning outcomes; and, above all, require attention to access and

equity if they are to fulfill their promise of benefitting all student populations equally. The goal of *Delivering on the Promise of High-Impact Practices* is to provide examples from around the country of the ways educators are advancing equity, promoting fidelity, achieving scale, and strengthening assessment of their own local high-impact practices. Its chapters bring together the best current scholarship, methodologies, and evidence-based practices within the HIPs field, illustrating new approaches to faculty professional development, culture and coalition building, research and assessment, and continuous improvement that help institutions understand and extend practices with a demonstrated high impact. For proponents and practitioners this book offers perspectives, data and critiques to interrogate and improve practice. For administrators it provides an understanding of what's needed to deliver the necessary support.

Books, and the printed word more generally, are aspects of modern life that are all too often taken for granted. Yet the emergence of the book was a process of immense historical importance and heralded the dawning of the epoch of modernity. In this much praised history of that process, Lucien Febvre and Henri-Jean Martin mesh together economic and technological history, sociology and anthropology, as well as the study of modes of consciousness, to root the development of the printed word in the changing social relations and ideological struggles of Western Europe.

The world must change, but we cannot change it by throwing money at old ideas that no longer work. We need a new path to a new world where inequality is shrinking, where natural resources

are regenerated, and people can benefit from shared prosperity. This is the world being created by the Impact Revolution. Preeminent international investor, entrepreneur, philanthropist, and social finance innovator, Sir Ronald Cohen, has dedicated two decades to leading the Impact Revolution to achieve real social and environmental change. As one of the founders of venture capital, which ushered in the Tech Revolution, he builds on his years of personal experience to deliver a compelling account of how impact investing is reshaping capitalism. So, whether you're: an aspiring young entrepreneur an established business person an investor a philanthropist or somebody in government or are interested, as a consumer or employee, in companies doing good and doing well at the same time - this book is a sure-fire way to find out how you can play a role in changing the world. All royalties from the sale of this book are donated to impact charities. "A powerful case for a movement that is gaining traction in society" - Andrew Jack, The Financial Times "[IMPACT's] aim is nothing less than to create a new type of capitalism infused with a social purpose. The book deserves to be read by anybody interested in such a revolution."- Martin Wolf, The Financial Times "A fascinating blueprint for a hope-filled future underpinned by the social power of impact investing."-- Kristalina Georgieva, Managing Director, International Monetary Fund, Former CEO, World Bank Group

Grant Phillips has always been a team player. He lives his life for the Force and worked hard to land a

coveted spot with Team Bravo. He follows the rules, keeps his head down, and never causes trouble. Grant does everything for everyone else and wants for very little. The mission always comes first, until she waltzes into his life. Taylor Maxwell is a wild card. A thrill seeker. A rogue wolf. She lives her life only looking out for number one, there's little she won't do for the next paycheck. When she gets contracted to steal a priceless heirloom from the vault of a well-known drug lord, she readily accepts. This time it's personal as she knows the prize contains ancient knowledge of shifters, and its current owner is about to exploit it. Taylor has spent months cultivating the perfect cover for the assignment and embedding herself as close as possible. But the sudden appearance of Westin Force, a well-known shifter paramilitary group, could destroy all she's worked for. She has two options: work with them, or against them. Joining forces sounds easy, but there is nothing easy about the strong, silent wolf shifter with the smoldering gray eyes who's overbearing presence throws her off her game. Grant's focus has always been on the team, but not this time. For him the mission has changed, and his eyes are firmly focused on the one thing he never thought he wanted-his true mate.

The riotous story of a guilty liberal who snaps, swears off plastic, goes organic, turns off his power, and becomes a bicycle nut in an effort to make zero environmental impact Manhattanite Colin Beavan spent a year trying to live without a net environmental impact, and he dragged his baby daughter and Prada-

*loving wife along for the ride (bicycle-powered, of course). In other words, no trash, no toxins in the water, no elevators, no subway, no products in packaging, no air conditioning, no television...What would it be like to try to live a no-impact lifestyle? Is it possible? Could it catch on? Is living this way more satisfying or less satisfying? Is it worthwhile or senseless? These are the questions at the heart of this whole mad endeavour, which ultimately challenges each of us to embrace green living. * The publisher has aimed for sustainability in all aspects of this book's production. For example, the interior paper is 100% post-consumer recycled, processed without chlorine, and certified by both the Forest Stewardship Council and EcoLogo. Instead of a jacket, the cover boards are stamped directly with ink, and the boards themselves are made from 100% recycled and FSC-certified materials.*

pursue, the research methods they use and how they publish their findings over the coming decade, but how much is currently known about how social science research has made a mark on society? Based on a three year research project studying the impact of 360 UK-based academics on business, government and civil society sectors, this groundbreaking new book undertakes the most thorough analysis yet of how academic research in the social sciences achieves public policy impacts, contributes to economic prosperity, and informs public understanding of policy issues as well as economic and social changes. *The Impact of the Social Sciences* addresses and engages with key issues, including: identifying ways to conceptualise and model impact in the social sciences developing more sophisticated ways to measure academic and external impacts of social science research explaining how impacts from individual academics, research units and universities can be improved. This book is essential reading for researchers, academics and anyone involved in discussions about how to improve the value and impact of funded research. Humankind may have won the battle, but a new threat looms larger than ever before... Earth's armed forces have stopped the Lanky advance and chased their ships out of the solar system, but for CDC officer Andrew Grayson, the war feels anything but won. On Mars, the grinding duty of flushing out the twenty-meter-tall alien

invaders from their burrows underground is wearing down troops and equipment at an alarming rate. And for the remaining extrasolar colonies, the threat of a Lanky attack is ever present. Earth's game changer? New advanced ships and weapons, designed to hunt and kill Lankies and place humanity's militaries on equal footing with their formidable foes. Andrew and his wife, Halley, both now burdened with command responsibilities and in charge of more lives than just their own, are once again in humanity's vanguard as they prepare for this new phase in the war. But the Lankies have their own agenda...and in war, the enemy doesn't usually wait until you are prepared. As Andrew is once again plunged into the chaos and violence of war with an unyielding species, he is forced to confront the toll this endless conflict is taking on them all, and the high price of survival...at any cost.
