takes all the risk and does all the work, while having to evict tenants and clean up their mess after they've left. But there is a new, unique and innovative method of investing in real estate. A Real Estate Option gives you control of a piece of real estate without actually purchasing it. By having an option on a piece of property, you have the exclusive right to buy that property or not. A real estate option is simply a contract between the seller and buyer giving you the legal right not obligation to buy the property at a set price for a predetermined time. When you find a buyer for the property, you cash in your option and deposit a large check. Most real estate investment methods require you to sink a lot of your money, time, and effort

into your investments. And it is a slow process, usually one property at a time, often part-time. Using an option instead of purchasing means you do not have to deal with rental property, tenants, maintenance and repairs, taxes, mortgage payments, commissions, or closing costs. In this new book you will learn how to control a vast real estate portfolio without ever buying the property. Let the owner keep paying the mortgage, dealing with tenants and all of the costs. You zero in on the profits. Here is an example, you locate a duplex worth \$400,000, you purchase an option to buy it for \$340,000 anytime within the next 120 days. On Day 60, you find a buyer who will pay the full \$400,000., you activate the option, pay the seller \$340,000,

enormous versatility that exists, it has been proven that trading with financial options is one of the most profitable ways to trade. Options are a fundamental tool that we must know if we want to be truly successful in the market, since they perfectly complement stocks, creating the opportunity to carry out spectacularly profitable strategies. For example, did you know that with options, it is possible to face half the risk in a trade compared to the one that a shareholder is exposed to? Also, did you know that there are ways to collect a profit when you have a portfolio of stocks that are not producing the results you expected?
