*Great Trials and the Law in the Historical Imagination: A Law and Humanities Approach* introduces readers to the history of law and issues in historical, legal, and artistic interpretation by examining six well-known historical trials through works of art that portray them. *Great Trials* provides readers with an accessible, non-dogmatic introduction to the interdisciplinary 'law and humanities' approach to law, legal history, and legal interpretation. By examining how six famous/notorious trials in Western history have been portrayed in six major works of art, the book shows how issues of legal, historical, and artistic interpretation can become intertwined: the different ways we embed law in narrative, how we bring conscious and subconscious conceptions of history to our interpretation of law, and how aesthetic predilections and moral commitments to the law may influence our views of history. The book studies well-known depictions of the trials of Socrates, Cicero, Jesus, Thomas More, the Salem 'witches', and John Scopes and provides innovative analyses of those works. The epilogue examines how historical methodology and historical imagination are crucial to both our understanding of the law and our aesthetic choices through various readings

Clint Emerson, retired Navy SEAL and author of the bestselling *100 Deadly Skills*, presents an explosive, darkly funny, and often twisted account of being part of an elite team of operatives whose mission was to keep America safe by whatever means necessary. Clint Emerson is the only SEAL ever inducted into the International Spy Museum. Operating from the shadows, with an instinct for running towards trouble, his unique skill set made him the perfect hybrid operator. Emerson spent his career on the bleeding edge of intelligence and operations, often specializing in missions that took advantage of subterfuge, improvisation, the best in recon and surveillance tech to combat the changing global battlefield. MacGyvering everyday objects into working spyware was routine, and fellow SEALs referred to his activities simply as “special shit.” His parameters were: find, fix, and finish—and of course, leave no trace. *The Right Kind of Crazy* is unlike any military memoir you’ve ever read because Emerson is upfront about the fact that what makes you a great soldier and sometimes hero doesn’t always make you the best guy—but it does make for damn good stories.

session, both you and your client need to show up in the therapy room. Really show up. And this kind of mindful presence can be a lot harder than it sounds. Mindfulness for Two is a practical and theoretical guide to the role mindfulness plays in psychotherapy, specifically acceptance and commitment therapy (ACT). In the book, author Kelly Wilson carefully defines mindfulness from an ACT perspective and explores its relationship to the six ACT processes and to the therapeutic relationship itself. With unprecedented clarity, he explains the principles that anchor the ACT model to basic behavioral science. The latter half of the book is a practical guide to observing and fostering mindfulness in your clients and in yourself—good advice you can put to use in your practice right away. Wilson, coauthor of the seminal Acceptance and Commitment Therapy, guides you through this sometimes-challenging material with the clarity, humor, and warmth for which he is known around the world. More than any other resource available, Mindfulness for Two gets at the heart of Wilson's unique brand of experiential ACT training. The book includes a DVD-ROM with more than six hours of sample therapy sessions with a variety of therapists on QuickTime video, DRM-free audio tracks of Wilson leading guided mindfulness exercises, and more. ***Recent developments in biotechnology and genetic research are raising complex ethical questions concerning the legitimate scope and limits of genetic intervention. As we begin to contemplate the possibility of intervening in the human genome to prevent diseases, we cannot help but feel that the human species might soon be able to take its biological evolution in its own hands. 'Playing God' is the metaphor commonly used for this self-transformation of the species, which, it seems, might soon be within our grasp. In this important new book, Jürgen Habermas – the most influential philosopher and social thinker in Germany today – takes up the question of genetic engineering and its ethical implications and subjects it to careful philosophical scrutiny. His analysis is guided by the view that genetic manipulation is bound up with the identity and self-understanding of the species. We cannot rule out the possibility that knowledge of one's own hereditary factors may prove to be restrictive for the choice of an individual's way of life and***

About the Novel: The Crucible is the award-winning play written by Arthur Miller about the Salem witch trials of 1692. One night in Salem Massachusetts, a group of girls are caught dancing in the woods by Reverend Parris. His own daughter falls into a coma soon after, and the town is ablaze with talks of witchcraft. The Reverend sends for Reverend Hale to examine the girl for witchcraft. Hale concludes that the town of Salem is in fact engulfed in witchcraft as one by one the girls accuse other townspeople of communing with the devil. A trial ensues causing those accused to either deny these allegations, or confess, thus accusing someone else. This cycle finally culminates in the death of several innocent townsfolk. A new Penguin Plays edition of the forgotten classic that launched the career of one of America ' s greatest playwrights It took more than fifty years for *The Man Who Had All the Luck* to be appreciated for what it truly is: the first stirrings of a genius that would go on to blossom in such masterpieces as *Death of a Salesman* and *The Crucible*. This striking new edition finally adds Miller ' s first major play to the Penguin Plays series—now in beautifully redesigned covers. Infused with the moral malaise of the Depression era, this parable-like drama centers on David Beeves, a man before whom every obstacle to personal and professional success seems to crumble with ease. But his good fortune merely serves to reveal the tragedies of those around him in greater relief, offering what David believes to be evidence of a capricious god or, worse, a godless, arbitrary universe. David ' s journey toward fulfillment becomes a nightmare of existential doubts, a desperate grasp for reason in a cosmos seemingly devoid of any, and a struggle that will take him to the brink of madness.

shootings On January 8, 2011, twenty-two-year-old Jared Lee Loughner opened fire at a Tucson meet-and-greet held by U.S. Representative Gabrielle Giffords. The incident left six people dead and eighteen injured, including Giffords, whom he shot in the head. Award-winning author and fifth generation Arizonan Tom Zoellner, a longtime friend of Giffords's and a field organizer on her Congressional campaign, uses the tragedy as a jumping-off point to expose the fault lines in Arizona's political and socioeconomic landscape that allowed this to happen: the harmful political rhetoric, the inept state government, the lingering effects of the housing market's boom and bust, the proliferation and accessibility of guns, the lack of established communities, and the hysteria surrounding issues of race and immigration. Zoellner's account includes interviews with those directly involved and effected, including Arizona's controversial Sheriff Joe Arpaio. Zoellner offers a revealing portrait of the Southwestern state at a critical moment in history- and as a symbol of the nation's discontents and uncertainties. Ultimately, it is his rallying cry for a saner, more civil way of life

**Presentation Patterns is the first book on presentations that categorizes and organizes the building blocks (or patterns) that you'll need to communicate effectively using presentation tools like Keynote and PowerPoint. Patterns are like the lower-level steps found inside recipes; they are the techniques you must master to be considered a master chef or master presenter. You can use the patterns in this book to construct your own recipes for different contexts, such as business meetings, technical demonstrations, scientific expositions, and keynotes, just to name a few. Although there are no such things as antirecipes, this book shows you lots of antipatterns—things you should avoid doing in presentations. Modern presentation tools often encourage ineffective presentation techniques, but this book shows you how to avoid them. Each pattern is introduced with a memorable name, a definition, and a brief explanation of motivation. Readers learn where the pattern applies, the consequences of applying it, and how to apply it. The authors also identify critical**

## **An exploration of ways of looking in Renaissance Florence, where works of art were part of a complex process of social exchange**

**Renaissance Florence, of endless fascination for the beauty of its art and architecture, is no less intriguing for its dynamic political, economic, and social life. In this book Patricia Lee Rubin crosses the boundaries of all these areas to arrive at an original and comprehensive view of the place of images in Florentine society. The author asks an array of questions: Why were works of art made? Who were the artists who made them, and who commissioned them? How did they look, and how were they looked at? She demonstrates that the answers to such questions illuminate the contexts in which works of art were created, and how they were valued and viewed. Rubin seeks out the meeting places of meaning in churches, in palaces, in piazzas--places of exchange where identities were taken on and transformed, often with the mediation of images. She concentrates on questions of vision and visuality, on "seeing and being seen." With a blend of exceptional illustrations; close analyses of sacred and secular paintings by artists including Fra Angelico, Fra Filippo Lippi, Filippino Lippi, and Botticelli; and wide-ranging bibliographic essays, the book shines new light on fifteenth-century Florence, a special place that made beauty one of its defining features.**

**A riveting history of the city that led the West out of the ruins of the Roman Empire At the end of the fourth century, as the power of Rome faded and Constantinople became the seat of empire, a new capital city was rising in the West. For three centuries, the city attracted scholars, lawyers, craftsmen, and religious luminaries, becoming a true cultural and political capital. Bringing this extraordinary history marvelously to life, Judith Herrin rewrites the history of East and West in the Mediterranean world before the rise of Islam and shows how, thanks to Byzantine influence, Ravenna played a crucial role in the development of medieval Christendom.
