The Dark At The Top Of The Stairs

Master storyteller Stephen King presents the classic “wondrously frightening” (Publishers Weekly) #1 New York Times bestseller about a writer’s horrific and haunting pseudonym. “I’m back...I’m back from the dead and you don’t seem glad to see me at all, you ungrateful son of a bitch.” After thirteen years of international bestseller stardom with his works of violent crime fiction, author George Stark is officially declared dead—revealed by a national magazine to have been killed at the hands of the man who

created him: the once well-regarded but now obscure writer Thad Beaumont. Thad's even gone so far as to stage a mock burial of his wildly successful pseudonym, complete with tombstone and the epitaph "Not a Very Nice Guy." Although on the surface, it seems that Thad can finally concentrate on his own novels, there's a certain unease at the prospect of leaving George Stark behind. But that's nothing compared to the horror about to descend upon Thad's new life. There are the vicious, out-of-control nightmares, for starters. And how is he able to explain the fact that everyone connected to George Stark's

untimely demise is now meeting a brutal end of their own in a pattern of homicidal savagery...and why each blood-soaked crime scene has Thad's fingerprints all over it? Thad Beaumont may have once believed that George Stark was running out of things to say, but he's going to find out just how wrong he is...

Eminent cartographers from around the world discuss the grammar and the syntax of the cartographic language in light of recent theoretical, practical and technological developments within the broad context of cartographic design. Special attention is placed on the opportunities, challenges and the responses cartographers are facing that have been created by the new technologies in the information era. Written by some of the world's leading authorities in the field of cartography, this book makes essential reading for practising and academic cartographers, GIS professionals and those who are interested in the logic of map design. authoritarian regime behind it: Do Not Disturb upends the narrative that Rwanda sold the world after one of the deadliest genocides of the twentieth century. We think we know the story of Africa's Great Lakes region. Following the Rwandan genocide, an idealistic group of young rebels overthrew the brutal regime in Kigali, ushering in an era of peace and stability that made Rwanda the donor darling of the West, winning comparisons with Switzerland and Singapore. But the truth was considerably more sinister. Vividly sourcing her story with direct testimony from key participants, Wrong uses the story of the murder of Patrick Karegeya, once Rwanda's head of external intelligence and a quicksilver operator of supple charm, to paint the portrait of a modern African dictatorship created in the chilling likeness

Iconic actress Hayley Mills shares personal memories from her storied childhood, growing up in a famous acting family and becoming a Disney child star, trying to grow up in a world that wanted her to stay forever young. The daughter of acclaimed British actor Sir John Mills was still a preteen when she began her acting career and was quickly thrust into the spotlight. Under the wing of Walt Disney himself, Hayley Mills was transformed into one of the biggest child starlets of the 1960s through her iconic roles in Pollyanna, The Parent Trap, and many more. She became one of only twelve actors in history to be bestowed with the Academy Juvenile Award, presented at the Oscars

by its first recipient, Shirley Temple, and went on to win a number of awards including a Golden Globe, multiple BAFTAs, and a Disney Legacy Award. Now, in her charming and forthright memoir, she provides a unique window into when Hollywood was still 'Tinseltown' and the great Walt Disney was at his zenith, ruling over what was (at least in his own head) still a family business. This behind-the-scenes look at the drama of having a skyrocketing career as a young teen in an esteemed acting family will offer both her childhood impressions of the wild and glamorous world she was swept into, and the wisdom and broader knowledge that time has given her. Hayley will delve intimately into her relationship with

Astrophysical observations implying the existence of Dark Matter and Dark Energy, which are not described by the Standard Model (SM) of particle physics, have led to extensions of the SM predicting new particles that could be directly produced at the Large Hadron Collider (LHC) at CERN. Based on 2015 and 2016 ATLAS proton-proton collision data, this thesis presents searches for the supersymmetric partner of the top quark, for Dark Matter, and for DarkEnergy, in signatures with jets and missing transverse energy. The efficiency with which muons can be detected with the ATLAS detector is measured using Z boson decays. The performance of high-precision Monitored Drift Tube muon chambers under background rates similar to the ones expected for the High Luminosity-LHC is studied.
