

The Entitlement Trap How To Rescue Your Child With A New Family System Of Choosing Earning And Ownership Richard Eyre

A guide for parents whose adult children have cut off contact that reveals the hidden logic of estrangement, explores its cultural causes, and offers practical advice for parents trying to reestablish contact with their adult children. "Finally, here's a hopeful, comprehensive, and compassionate guide to navigating one of the most painful experiences for parents and their adult children alike."—Lori Gottlieb, psychotherapist and New York Times bestselling author of Maybe You Should Talk to Someone Labeled a silent epidemic by a growing number of therapists and researchers, estrangement is one of the most disorienting and painful experiences of a parent's life. Popular opinion typically tells a one-sided story of parents who got what they deserved or overly entitled adult children who wrongly blame their parents. However, the reasons for estrangement are far more complex and varied. As a result of rising rates of individualism, an increasing cultural emphasis on happiness, growing economic insecurity, and a historically recent perception that parents are obstacles to personal growth, many parents find themselves forever shut out of the lives of their adult children and grandchildren. As a trusted psychologist whose own daughter cut off contact for several years and eventually reconciled, Dr. Joshua Coleman is uniquely qualified to guide parents in navigating these fraught interactions. He helps to alleviate the ongoing feelings of shame, hurt, guilt, and sorrow that commonly attend these dynamics. By placing estrangement into a cultural context, Dr. Coleman helps parents better understand the mindset of their adult children and teaches them how to implement the strategies for reconciliation and healing that he has seen work in his forty years of practice. Rules of Estrangement gives parents the language and the emotional tools to engage in meaningful conversation with their child, the framework to cultivate a healthy relationship moving forward, and the ability to move on if reconciliation is no longer possible. While estrangement is a complex and tender topic, Dr. Coleman's insightful approach is based on empathy and understanding for both the parent and the adult child.

#1 NEW YORK TIMES BESTSELLER • From the author of Is Everyone Hanging Out Without Me? and creator of The Mindy Project and Never Have I Ever comes a hilarious collection of essays about her ongoing journey to find contentment and excitement in her adult life. "This is Kaling at the height of her power."—USA Today In Why Not Me?, Kaling shares insightful, deeply personal stories about falling in love at work, seeking new friendships in lonely places, attempting to be the first person in history to lose weight without any behavior modification whatsoever, and believing that you have a place in Hollywood when you're constantly reminded that no one looks like you. In "How to Look Spectacular: A Starlet's Confessions," Kaling gives her tongue-in-cheek secrets for surefire on-camera beauty, ("Your natural hair color may be appropriate for your skin tone, but this isn't the land of appropriate—this is Hollywood, baby. Out here, a dark-skinned woman's traditional hair color is honey blonde.") "Player" tells the story of Kaling being seduced and dumped by a female friend in L.A. ("I had been replaced by a younger model. And now they had matching bangs.") In "Unlikely Leading Lady," she muses on America's fixation with the weight of actresses, ("Most women we see onscreen are either so thin that they're walking clavicles or so huge that their only scenes involve them breaking furniture.") And in "Soup Snakes," Kaling spills some secrets on her relationship with her ex-boyfriend and close friend, B.J. Novak ("I will freely admit: my relationship with B.J. Novak is weird as hell.") Mindy turns the anxieties, the glamour, and the celebrations of her second coming-of-age into a laugh-out-loud funny collection of essays that anyone who's ever been at a turning point in their life or career can relate to. And those who've never been at a turning point can skip to the parts where she talks about meeting Bradley Cooper.

New York Times-Bestselling Author: "The message resonates in today's workaholic culture that rewards hard work and stress with . . . more hard work and stress." —Deseret News In this book, the author of the #1 New York Times bestseller Teaching Your Children Values and The Entitlement Trap, Richard Eyre, contends that the three things today's society desires most—control, ownership, and independence—are, paradoxically, what bring the most discouragement and unhappiness in our lives. Providing a mind-changing exploration of the inherent problems with our fixation on material possessions, control over our lives, and independence from others, Eyre responds with a unique and engaging counterpoint on how to switch to the joy-giving alternatives of serendipity, stewardship, and interdependence and thus live a more verdant and abundant life. The first half, The Happiness Paradox, explores today's challenges to happiness. The second half explores The Happiness Paradigm: How A New View Can Turn Your Life Right-Side Up—and walks us through a mental paradigm shift that can change our lives and our search for lasting joy.

Wall Street Journal best-selling author Jon Acuff reveals the steps to getting unstuck and back onto the path of being awesome. Over the last 100 years, the road to success for most everyone has been divided into five stages that mirror the decades of working life: Your 20s are a period of Learning. This is the decade of trying a thousand things, exploring a multitude of interests, and discovering what really motivates you. Your 30s are a period of Editing. This is the decade of sorting out interests, where you discover what you really care about and who you really are. Your 40s are a period of Mastering. This is the decade of narrowing focus, honing skill sets, and becoming an expert in your field. Your 50s are a period of Harvesting. This is the decade of reaping the benefits of good decisions and enjoying the highest income-earning period in a career. Your 60s are a period of Guiding. This is the decade of mentoring, training, and encouraging others on their own road to success. Every successful person has followed these steps regardless of their occupation. But three things have changed the path to success and erased the decades associated with them: Finish lines are dead - Boomers are realizing that a lot of the things they were promised aren't going to materialize, and they have started second and third careers. Anyone can play - Technology has given access to an unprecedented number of people who are building online empires and changing their lives in ways that would have been impossible years ago. Hope is boss - The days of "success first, significance later," have ended. A new generation doesn't want to change the world eventually; they want to change it now through the wells they kickstart in Africa and the TOMS they wear on their feet. The value system has been flipped upside down. The result is that you've got an entire generation pushing down to start over, another generation pushing up to start for the first time, and in the middle of this collision, the tools to actually change the world. Experience years now trump chronological age. And while none of the five stages can be skipped, they can be shortened and accelerated. There are only two paths in life: average and awesome. The average path is easy because all you have to do is nothing. The awesome path is more challenging, because things like fear only bother you when you do work that matters. The good news is Start gives readers practical, honest, actionable insights to be more awesome, more often. It's time to punch fear in the face, escape average, and do work that matters. It's time to Start.

Dump the allowance-and use a new "Family Economy" to raise responsible children in an age of instant gratification. Number-one New

York Times bestselling authors Richard and Linda Eyre, have spent the last twenty-five years helping parents nurture strong, healthy families. Now they've synthesized their vast experience in an essential blueprint to instilling children with a sense of ownership, responsibility, and self-sufficiency. At the heart of their plan is the "Family Economy" complete with a family bank, checkbooks for kids, and a system of initiative-building responsibilities that teaches kids to earn money for the things they want. The motivation carries over to ownership of their own decisions, values, and goals. Anecdotal, time-tested, and gently humorous, The Entitlement Trap challenges some of the sacred cows of parenting and replaces them with values that will save kids (and their parents) from a lifetime of dependence and disabling debt.

_____ (From the Playboy interview with Jay-Z, April 2003) PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In The 48 Laws of Power, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.

Danger in the Comfort Zone examines the phenomenon of the "entitlement" mentality in the American workforce -- people's preoccupation with their rewards rather than their responsibilities. Bardwick describes three basic mindsets and shows the effect of each on individuals and their organizations: * Entitlement -- people feel entitled to rewards and lethargic about having to earn them; motivation and job satisfaction are low * Fear -- people are paralyzed; the threat of layoffs makes them focus on protecting their jobs rather than doing them well * Earning -- people are energized by challenge; they know their accomplishments will be noticed -- and rewarded In this paperback edition, Bardwick points out that although the "fear" element has undoubtedly grown in the last few years, the entitlement attitude is still firmly entrenched at all levels. She offers additional chapters with new, specific techniques for pulling people out of the quagmire of fear and complacency, and igniting them with the energy of true earning.

Like most parents, Amy and Jeffrey Olrick left the hospital with their first child desperate to know, "What do we do?" But years of parenting three kids and Jeffrey's work as a child psychologist convinced them to ask a better question: "How shall I be with this new person?" In a culture obsessed with parenting formulas, it's easy to miss the fact that science and lived experience have proven that human development and thriving are a matter of relationship. Drawing on decades of psychological research, neuroscience, and their own experience as parents and people of faith, the Olricks present six relational needs for human growth that will transform the way you think about your child--and yourself. Together, the needs form a trustworthy compass to guide you and your child to a path of purpose and relational wholeness. Get ready to have practical conversations on things like purchasing your children's first car and paying for college. In *Intentional Children*, Kalen Bruce simplifies complex topics like budgeting and investing, bringing it all to a level kids can grasp and you can teach. In a conversational tone, Kalen not only covers how to raise money-smart kids, he also covers things you won't find in other books... *The Things That Slip Through the Cracks in Parenting Books* *Intentional Children* relates to where you are. Having five kids of his own, Kalen understands how advice must be practical, actionable, and most importantly, realistic. He shows you how to raise intentional children who know why they are on this earth. Find the answers to questions beyond finance, such as: How can we fit everything into our day with such a busy schedule? How does fewer toys lead to happier children? It's everything you need to know about relating to your children on money and mindset. Do you have anyone in your life who can't seem to stick with a project, meet a deadline, or even clean up after themselves? All of us feel we deserve special treatment sometimes. Some people live with this entitled attitude, such as: Professionals who wander from job to job looking for a boss who will see them as amazing as they consider themselves to be--whether they're productive or not Young adults who refuse to grow up and so go nowhere Spouses or dates who believe, "I'm special, and I deserve more than you're giving me" Leaders who expect special treatment because of their position, not because of their character If you have a difficult relationship with an entitled person, or if you have discovered entitlement in yourself, understand this: It doesn't have to stay this way. There is a cure. It's called the Hard Way and it works. In *The Entitlement Cure*, Dr. John Townsend explains that the Hard Way is a habit that focuses on doing whatever is needed even if it is difficult, uncomfortable, takes longer, and requires more energy. Dr. Townsend offers daily steps, such as risk-taking, to help you or those you love choose the Hard Way. Ultimately, entitlement fails us. We don't develop the character abilities and relationships necessary to reach success and become the people God intended us to be. By contrast, Hard Way people have better relationships, reach their goals, have a clear job direction, enjoy rich spiritual growth, and are equipped to face and solve challenges. As Dr. Townsend writes, "Stand against entitlement in every form in which it manifests itself. Resolve your own tendencies toward the disease. Be a loving and firm force for helping those in its trap to find life and hope. And you will make the world a better place." Discover why the Hard Way is the best way in this practical guide to true success.

Music, Race, and Spatial Entitlement in Los Angeles

In *Spaces of Conflict, Sounds of Solidarity*, Gaye Theresa Johnson examines interracial anti-racist alliances, divisions among aggrieved minority communities, and the cultural expressions and spatial politics that emerge from the mutual struggles of Blacks and Chicanos in Los Angeles from the 1940s to the present. Johnson argues that struggles waged in response to institutional and social repression have created both moments and movements in which Blacks and Chicanos have unmasked power imbalances, sought recognition, and forged solidarities by embracing the strategies, cultures, and politics of each others' experiences. At the center of this study is the theory of spatial entitlement: the spatial strategies and vernaculars utilized by working class youth to resist the demarcations of race and class that emerged in the postwar era. In this important new book, Johnson reveals how racial alliances and antagonisms between Blacks and Chicanos in L.A. had spatial as well as racial dimensions.

This book focuses on the causes of starvation in general and famines in particular. The traditional analysis of famines is shown to be fundamentally defective, and the author develops an alternative analysis.

One of the greatest gifts you can give your children is a strong sense of personal values. Helping your children develop values such as honesty, self-reliance, and dependability is as important a part of their education as teaching them to read or how to cross the street safely. The values you teach your children are their best protection from the influences of peer pressure and the temptations of consumer culture. With their own values clearly defined, your children can make their own decisions -- rather than imitate their friends or the latest fashions. In *Teaching Your Children Values* Linda and Richard Eyre present a practical, proven, month-by-month program of games, family activities, and value-building exercises for kids of all ages.

A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal - that social and economic rewards should follow achievement rather than breeding - reigns supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if, both up and down the social ladder, meritocracy is a sham? Today, meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy, and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes. This is the radical argument that Daniel Markovits prosecutes with rare force. Markovits is well placed to expose the sham of meritocracy. Having spent his life at elite universities, he knows from the inside the corrosive system we are trapped within. Markovits also knows that, if we understand that meritocratic inequality produces near-universal harm, we can cure it. When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine, it also illuminates the first steps outward, towards a new world that might once again afford dignity and prosperity to the American people.

NEW YORK TIMES BESTSELLER AND INSPIRATION FOR THE NETFLIX LIMITED SERIES, HAILED BY ROLLING STONE AS "A GREAT ONE." "A single mother's personal, unflinching look at America's class divide, a description of the tightrope many families walk just to get by, and a reminder of the dignity of all work." -PRESIDENT BARACK OBAMA, Obama's Summer Reading List At 28, Stephanie Land's dreams of attending a university and becoming a writer quickly dissolved when a summer fling turned into an unplanned pregnancy. Before long, she found herself a single mother, scraping by as a housekeeper to make ends meet. *Maid* is an emotionally raw, masterful account of Stephanie's years spent in service to upper middle class America as a "nameless ghost" who quietly shared in her clients' triumphs, tragedies, and deepest secrets. Driven to carve out a better life for her family, she cleaned by day and took online classes by night, writing relentlessly as she worked toward earning a college degree. She wrote of the true stories that weren't being told: of living on food stamps and WIC coupons, of government programs that barely provided housing, of aloof government employees who shamed her for receiving what little assistance she did. Above all else, she wrote about pursuing the myth of the American Dream from the poverty line, all the while slashing through deep-rooted stigmas of the working poor. *Maid* is Stephanie's story, but it's not hers alone. It is an inspiring testament to the courage, determination, and ultimate strength of the human spirit.

Whenever Amy McCreedy mentions the "entitlement epidemic" to a group of parents, she is inevitably met with eye rolls, nodding heads, and loaded comments about affected children. It seems everywhere one looks, there are preschoolers who only behave in the grocery store for a treat, narcissistic teenagers posting selfies across all forms of social media, and adult children living off their parents. Parenting expert McCreedy reveals in this book that the solution is to help kids develop healthy attitudes in life. By setting up limits with consequences and training them in responsible behavior and decision making, parents can rid their homes of the entitlement epidemic and raise confident, resilient, and successful children. Whether parents are starting from scratch with a young toddler or navigating the teen years, they will find in this book proven strategies to effectively quell entitled attitudes in their children.
