Until the nineteenth century, telescopes, spectrometers, and photographic plates constituted a relatively simple set of tools which had been refined to a high degree of perfection by the joint

Indeed these
tools helped at
the birth of
modern
astrophysics:
the discovery of
the expansion
of the Universe.
Then came
radioastronomy
and the advent

of electronics;
the last thirty
years have seen
the application
to astrophysics
of a wealth of
new experimental
