

The European Investment Bank

The inside story of the European Fund for Strategic Investments from 2015 to 2020 told through interviews with the Managing Director, Deputy Managing Director, members of the Investment Committee and final beneficiaries across Europe. The architects of this €500 billion-plus programme, the head of the EU bank and the president of the European Commission, describe the genesis of this financial pillar of the Investment Plan for Europe. Then the people who ran one of the biggest

Read Online The European Investment Bank

economic stimulus programmes in history detail how they did it—and what the lessons are for policymakers responding to new crises, including the economic shock caused by the COVID-19 pandemic. The European Fund for Strategic Investments has been one of the good news stories to emerge in a decade of economic uncertainty. It has gone well beyond its highly ambitious target of €500 billion in mobilised investments. The Juncker Plan has made a strong contribution to the 14 million jobs created in the EU between 2015 and 2020. It has become a success in co-financing projects that

Read Online The European Investment Bank

otherwise might not have been carried through. It has also charted the path towards new ways of financing. This is not only the case in relatively conventional areas, such as infrastructure, but also in sectors like research and innovation or the contribution to climate change mitigation. This is exactly what makes EFSI so ground-breaking: responding to the needs of the market through continuous financial innovation. The principle of the European Fund for Strategic Investments is here to stay. It has paved the way for its successor, the InvestEU programme, which is to be deployed under the

The Investment Report, issued annually by the European Investment Bank, provides a comprehensive overview and analysis of investment and the financing of investment in the European Union. It combines the exploration of investment trends with in-depth analysis, focusing especially on the drivers and barriers to investment activity. The report leverages on a unique set of databases and survey data, including EIBIS, an annual survey of 12 500 firms in Europe, which focuses on their assessment of investment and investment finance conditions, and which allows analysis

with firm balance sheet information. The report provides critical inputs to policy debates on the need for public action on investment, and on the types of intervention that can have the greatest impact. This year's report addresses a moment of economic recovery in which investment growth, overall, is strong, but downside risks to the economic outlook are rising. It identifies many ways in which current investment is still structurally inadequate, given the legacy effects of the recent crisis and the great challenges that lie ahead. There is an urgent need to re-tool Europe, from its infrastructure and innovation ecosystem, through to its businesses and workers, to enhance prosperity and social cohesion.

Deciphering the European Investment Bank: History, Politics and Economics examines the European Investment Bank (EIB), the European Union's financial institution and the largest lender and borrower among the International Financial Institutions. Since its establishment in 1958, the EIB has developed without becoming front-page news and has remained highly invisible. By putting together fourteen chapters that analyze topical and meaningful moments and aspects of the bank, this edited book offers the first comprehensive analysis of its origins and its evolution in terms of its mandate, governance, structures, policy activity, and performance. Written by acknowledged experts from various disciplines, the chapters weave

together history, economics, law, and political science to provide a multidisciplinary examination and capture the complexity of the EIB. The book is a timely initiative for understanding the EIB, whose role has been ever increasing for contributing to the recent global economic challenges, including the economic and financial crisis, climate change and COVID-19 pandemic. The chapters are written at a level which will be comprehensible to undergraduates in economics, history, and international political economy. It will also be a valuable source of reference for academics, policy makers, bankers, and other practitioners interested in regional development banks and their role in the global economy.

European Investment Bank Group Sustainability Report 2019

This book tells one set of stories from the many that could be told about the European Investment Bank. There are six, one for each decade of the EIB story. These stories show how the EIB stood behind the key developments in Europe's economy, responding to the changes in the continent and the Union of which it is a crucial part. They are the story of how the EIB helped turn good intentions into reality.

world. Figures are expected outcomes of financed new operations signed in 2020 for the first time based on available data at this stage. All figures are unaudited and provisional. Banking historiography often does not sufficiently take into account bankers' deliberations of their decision making, but rather limits investigation to considerations of profit maximisation. This book shows that the decision-making processes of nineteenth-century bankers contemplating high-risk financial markets like Greece are just as complex as present-day investment decisions. The book,
