

The Fall Book 7 Cherub

When James is recently orphaned, he is recruited by a secret agency for his math skills and must undergo one hundred days of grueling training.

Meet Jay, Summer and Dylan. Jay plays guitar, writes songs and dreams of being a rock star, but his ambitions are stifled by seven siblings and a terrible drummer. Summer works hard at school, looks after her nan and has a one-in-a-million singing voice - but can her talent triumph over her nerves? Dylan is happiest lying on his bunk smoking, but his school rugby coach has other ideas, and Dylan reluctantly joins a band to avoid crunching tackles and icy mud. They're about to enter the biggest battle of their lives - and there's everything to play for.

Sent on a mission to stop the largest terrorist plot ever orchestrated, Ryan, a member of the secret organization CHERUB, plans a high-stakes counter-defense that depends for its success on his youthful appearance and his agency's official non-existence.

James Adams returns in the last ever CHERUB book! Ryan Sharma is a CHERUB agent. Working undercover, he can slip under adult radar and get information that sends criminals and terrorists to jail. Now he's investigating a double kidnapping, working with mission controller and old guard, James Adams. An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down
