Two dark and creepy tales by Anthony Horowitz, a master storyteller and the bestselling author of the Alex Rider series. David's mobile won't stop ringing, but these are no ordinary callers. He seems to have a hotline to heaven - or is it to hell? Isabel has a nasty feeling that the Victorian bath her parents have installed is waiting for her - and it isn't for a bubble bath, more a blood bath...

The odd thing about Walter Schoen, German born but now running a butcher shop in Detroit, he's a dead ringer for Heinrich Himmler, head of the SS and the Gestapo. They even share the same birthday. Honey Deal, Walter's American wife, doesn't know that Walter is a member of a spy ring that sends U.S. war production data to Germany and gives shelter to escaped German prisoners of war. But she's tired of telling him jokes he doesn't understand—it's time to get a divorce. Along comes Carl Webster, the hot kid of the Marshals Service. He's looking for Jurgen Schrenk, a former Afrika Korps officer who escaped from a POW camp in Oklahoma. Carl's pretty sure Walter's involved with keeping Schrenk hidden, so Carl gets to know Honey, hoping she'll take him to Walter. Carl then meets Vera Mezwa, the nifty Ukrainian head of the spy ring who's better looking than Mata Hari, and her tricky lover Bohdan with the Buster Brown haircut and a sly way of killing. Honey's a free spirit; she likes the hot kid marshal and

doesn't much care that he's married. But all Carl wants is to get Jurgen Schrenk without getting shot. And then there's Otto—the Waffen-SS major who runs away with a nice Jewish girl. It's Elmore Leonard's world—gritty, funny, and full of surprises.

#1 NEW YORK TIMES BESTSELLER • “ This book delivers completely new and refreshing ideas on how to create value in the world. ” —Mark Zuckerberg, CEO of Meta “ Peter Thiel has built multiple breakthrough companies, and Zero to One shows how. ” —Elon Musk, CEO of SpaceX and Tesla The great secret of our time is that there are still uncharted frontiers to explore and new inventions to create. In Zero to One, legendary entrepreneur and investor Peter Thiel shows how we can find singular ways to create those new things. Thiel begins with the contrarian premise that we live in an age of technological stagnation, even if we ' re too distracted by shiny mobile devices to notice. Information technology has improved rapidly, but there is no reason why progress should be limited to computers or Silicon Valley. Progress can be achieved in any industry or area of business. It comes from the most important skill that every leader must master: learning to think for yourself. Doing what someone else already knows how to do takes the world from 1 to n, adding more of something familiar. But when you do something new, you go from 0 to 1. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won ' t make a search engine. Tomorrow ' s champions will not win by competing ruthlessly in today ' s marketplace. They will escape competition altogether, because their businesses will be unique. Zero to One presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to find value in unexpected places.

Two spine-chilling short stories by Anthony Horowitz, a master-storyteller and the best-selling author of the Alex Rider series. Jamie is pleased with the camera he finds at a car boot sale - that is until he realises everything he photographs breaks . . . or dies. Henry soon finds out that his new computer has a life of its own - and it's not afraid to gamble with people's lives.

From bestselling writer David Graeber— “ a master of opening up thought and stimulating debate ” (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013, David Graeber asked this question in a playful, provocative essay titled “ On the Phenomenon of Bullshit Jobs. ” It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society ' s most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. “ Clever and charismatic ” (The New Yorker), Bullshit Jobs gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into

an avocation and “ a thought-provoking examination of our working lives ” (Financial Times).

The Hitchhiker

Many of us embark on the spiritual search seeking relief from depression and anxiety. In this revealing and deeply meaningful book, Mitch makes a frank and responsible survey of how the spiritual path can aid or impede you in this journey. As Mitch reveals from his many years as a writer, publisher, and seeker, the spiritual culture does not always respond wisely to the needs of people seeking emotional health. Nor can spiritual progress and emotional health necessarily be equated. Mitch lays out a new paradigm for how you can combine traditional, alternative, and self-designed approaches to find the right path forward in your search for the higher and need for emotional wellbeing.

Twelve-year-old Joe Warden isn't happy. Sure, he's rich, but his parents don't care about him. His grandmother should make everything better, except that Joe's granny is a nightmare. She's not just physically repulsive, she's horribly mean. Everyone thinks she's just a dotty old woman, but Joe knows the truth. He's seen behind her mask and glimpsed the wicked glimmer in her eyes - she is pure evil. And now she's out to get Joe, unless he can stop her and her band of nasty grannies first.

Ever pictured your own funeral? You won't be able to help it when you read some of the stories in this nightmarish collection, where things are never what they appear. Funerals are just the beginning. How about a day at the beach that ends in a mischievous murder? Or a cell phone that has a direct dial to . . . the dead? From the creator of the blockbuster Alex Rider Adventures and The Diamond Brothers Mysteries comes eight more fantastically frightening tales. Whatever you do, don't take this book to bed with you!

Three sinister and creepy tales by Anthony Horowitz, a master storyteller and the bestselling author of the Alex Rider series. Gary hates the countryside - why did his mum have to bring him here to stay with his gran? It's boring and prickly and field after field, it all looks the same - especially when you're lost... Kevin loves computer games, but this latest game (Smash Crash Slash 500 Plus) breaks all the rules, and now Kevin is part of the game... Howard is in Heaven, strange after a life spent bullying, stealing and playing truant - so why is he so unhappy?

Set in the gloriously rugged backwoods of the Pacific Northwest in the 1970s, Nina Shengold's gripping debut novel follows three people in search of new lives deep into uncharted terrain of the body and heart. When rough-hewn loner Earley Ritter picks up a hitchhiker one rainy night, he can't imagine how much it will change his life. A "shake-rat" who salvages cedar stumps left when loggers clearcut, Earley seems to have little in common with Reed Alton, a gifted Berkeley

dropout. But when Earley meets Zan, the fiery and mysterious woman Reed has been following, erotic sparks fly in unexpected directions. Thrown together in the splendid isolation of the woods, with passions and tensions mounting, the unlikely trio achieves a fragile balance that--like their idyllic patch of forest--will be shattered by violence. At once a page-turning psychological drama and a colorful, wildly comic recreation of a lost time and place, Clearcut explores the boundaries that divide us, and what it takes to cross them. "Follows the Reverend Jesse Custer on his epic quest to track down an absent God and force him to answer for the sufferings of his creation"--from the publisher.

This is the first comprehensive history of films made in or about Iowa. It reflects some twenty years of collecting, lecturing, and talking with some of Iowa's current generation of independent filmmakers. It covers the span from 1918 to 2013 and gives important background information on dozens of high profile films such as the STATE FAIR films of 1933 and 1945, THE BRIDGES OF MADISON COUNTY, FIELD OF DREAMS, and many others. It is designed as a companion for the State Historical Society's blockbuster "Hollywood in the Heartland" exhibition in Des Moines that is scheduled to run at least through 2016. The book has an interpretive essay covering the entire history as well as paragraph length descriptions of each film. A user-friendly feature is the Index of Films, which makes it easy to locate discussions of individual films. Marty Knepper is a featured commentator on video screens in the "Hollywood in the Heartland" exhibition.

"Anything but elementary, this clever thriller is sure to please Sherlock fans." — People Magazine, Book of the Week Review "Anthony Horowitz throws down the gauntlet in his infernally clever Sherlock Holmes pastiche." — Marilyn Stasio, New York Times Book Review Internationally bestselling author Anthony Horowitz's nail-biting new novel plunges us back into the dark and complex world of detective Sherlock Holmes and Moriarty—dubbed the Napoleon of crime" by Holmes—in the aftermath of their fateful struggle at the Reichenbach Falls. Days

after the encounter at the Swiss waterfall, Pinkerton detective agent Frederick Chase arrives in Europe from New York. Moriarty's death has left an immediate, poisonous vacuum in the criminal underworld, and there is no shortage of candidates to take his place—including one particularly fiendish criminal mastermind. Chase and Scotland Yard Inspector Athelney Jones, a devoted student of Holmes's methods of investigation and deduction originally introduced by Conan Doyle in "The Sign of Four", must forge a path through the darkest corners of England's capital—from the elegant squares of Mayfair to the shadowy wharfs and alleyways of the London Docks—in pursuit of this sinister figure, a man much feared but seldom seen, who is determined to stake his claim as Moriarty's successor. A riveting, deeply atmospheric tale of murder and menace from one of the only writers to earn the seal of approval from Conan Doyle's estate, Moriarty breathes life into Holmes's dark and fascinating world. Bullshit Jobs

Imagine that Alice had walked into a bar instead of falling down the rabbit hole. In the tradition of J. R. Moehringer's *The Tender Bar* and the classic reportage of Joseph Mitchell, here is an indelible portrait of what is quite possibly the greatest bar in the world—and the mercurial, magnificent man behind it. The first time he saw Sunny's Bar, in 1995, Tim Sultan was lost, thirsty for a drink, and intrigued by the single bar sign among the forlorn warehouses lining the Brooklyn waterfront. Inside, he found a dimly lit room crammed with maritime artifacts, a dozen well-seasoned drinkers, and, strangely, a projector playing a classic Martha Graham dance performance. Sultan knew he had stumbled upon someplace special. What he didn't know was that he had just found his new home. Soon enough, Sultan has quit his office job to bartend full-time for Sunny Balzano, the bar's owner. A wild-haired Tony Bennett lookalike with a fondness for quoting Shakespeare and Samuel Beckett, Sunny is truly one of a kind. Born next to the saloon that has been in his family for one hundred years, Sunny has over the years partied with Andy Warhol, spent time in India at the feet of a guru, and painted abstract expressionist originals. But his masterpiece is the bar itself, a place where a sublime mix of artists, mobsters, honky-tonk musicians, neighborhood drunks, nuns, longshoremen, and assorted eccentrics rub elbows. Set against the backdrop of a rapidly transforming

city, Sunny's Nights is a loving and singular portrait of the dream experience we're all searching for every time we walk into a bar, and an enchanting memoir of an unlikely and abiding friendship. Praise for Sunny's Nights "Fantastic . . . [Sultan takes] material that might seem familiar and [mixes] a perfect, insightful cocktail: full-bodied, multitextured and delicious. . . . Simply beautiful."—The New York Times Book Review "Sultan's love of Red Hook shines through, and it's hard not to be swept along on the ebb and flow of his emotions. . . . Sultan's book is, among other things, a meditation on the fragility of the moment and the passage of time. . . . Wistful, funny and biting, Sunny's Nights rewards you with its evocation of a certain place in time and, as Sultan calls him, 'the most original man I have ever met.'"—Newsday "An affectionate portrait of the idiosyncratic Sunny's Bar."—USA Today "Sultan finds Sunny . . . a real character, a poet, a cinephile, a philosopher, bluegrass maestro and (Rheingold) beer server."—New York Post ("Required Reading") "Captivating . . . a classic story about a local bar."—The Buffalo News "An enchanting memoir, a profound meditation on place and a beautiful story of an unlikely and abiding friendship."—Brooklyn Daily Eagle "[A] polished, affecting look at remarkable barkeep Sunny Balzano . . . In elegant prose, Sultan deploys laconic humor, an instinct for telling details, a taste for eccentricity, and above all, clear-eyed compassion for our all-too-human failings."—Publishers Weekly (starred review) "Beautifully wrought . . . an indelible portrait of an unusual man and a nearly forgotten part of NYC."—Booklist "More than an elegy for a bar and a neighborhood—it's also a vivid and loving portrait of the larger-than-life eccentric who gave the bar its name and its spirit."—Tom Perrotta, author of *The Leftovers*

Can artificial intelligence learn mathematics? The question is at the heart of this original monograph bringing together theoretical physics, modern geometry, and data science. The study of Calabi-Yau manifolds lies at an exciting intersection between physics and mathematics. Recently, there has been much activity in applying machine learning to solve otherwise intractable problems, to conjecture new formulae, or to understand the underlying structure of mathematics. In this book, insights from string and quantum field theory are combined with powerful techniques from

complex and algebraic geometry, then translated into algorithms with the ultimate aim of deriving new information about Calabi–Yau manifolds. While the motivation comes from mathematical physics, the techniques are purely mathematical and the theme is that of explicit calculations. The reader is guided through the theory and provided with explicit computer code in standard software such as SageMath, Python and Mathematica to gain hands-on experience in applications of artificial intelligence to geometry. Driven by data and written in an informal style, *The Calabi–Yau Landscape* makes cutting-edge topics in mathematical physics, geometry and machine learning readily accessible to graduate students and beyond. The overriding ambition is to introduce some modern mathematics to the physicist, some modern physics to the mathematician, and machine learning to both.

"Gut-wrenching force...A majestic, fiery epic. *The Given Day* is a huge, impassioned, intensively researched book that brings history alive." - The New York Times
Dennis Lehane, the New York Times bestselling author of *Live by Night*—now a Warner Bros. movie starring Ben Affleck—offers an unflinching family epic that captures the political unrest of a nation caught between a well-patterned past and an unpredictable future. This beautifully written novel of American history tells the story of two families—one black, one white—swept up in a maelstrom of revolutionaries and anarchists, immigrants and ward bosses, Brahmins and ordinary citizens, all engaged in a battle for survival and power at the end of World War I.

Paul Wood and his girlfriend, Talena, were just tourists in Sarajevo, a city still reeling from the aftermath of civil war. But an unexpected encounter makes them a desperate woman's only hope of escape. Now, to get her to safety, they must navigate through the minefield of warlords, criminals, and peacekeepers that is postwar Bosnia. Pursued by brutal gangsters and unable to leave the country legally, Paul agrees to do a job for a shadowy group of people smugglers in exchange for safe passage. The smugglers seem friendly. The job seems harmless. But when he discovers the secrets seething beneath, the repercussions will propel him on a perilous journey around the world -- from a warlord's compound in lawless Albania, through the jungles of Latin America, and toward an explosive confrontation at the extraordinary Burning Man festival in the Nevada desert.

The computer unlike other inventions is universal; you can use a computer for many tasks: writing, composing music, designing buildings, creating movies, inhabiting virtual worlds, communicating... This popular science history isn't just about technology but introduces the pioneers: Babbage, Turing, Apple's Wozniak and Jobs, Bill Gates, Tim Berners-Lee, Mark Zuckerberg. This story is about people and the changes computers have caused. In the future ubiquitous computing, AI, quantum and molecular computing could even make us immortal. The computer has been a radical invention. In less than a single human life computers are transforming economies and societies like no human invention before. Calabi-Yau spaces are complex spaces with a vanishing first Chern class, or equivalently, with trivial canonical bundle (canonical class). They are used to construct possibly realistic (super)string models and are thus being studied vigorously in the recent physics literature. In the main part of the Book, collected and reviewed are relevant results on (1) several major techniques of constructing such spaces and (2) computation of physically relevant quantities such as massless field spectra and their Yukawa interactions. Issues of (3) stringy corrections and (4) moduli space and its geometry are still in the stage of rapid and continuing development, whence there is more emphasis on open problems here. Also is included a preliminary discussion of the conjectured universal moduli space and related open problems. Finally, several detailed models and sample computations are included throughout the Book to exemplify the techniques and the general discussion. The Book also contains a Lexicon (28 pages) of 150 assorted terms, key-words and main results and theorems, well suited for a handy reference. Although cross-referenced with the main part of the Book, the Lexicon can also be used independently. The level of mathematics is guided and developed between that of the popular Physics Reports of Eguchi, Gilkey and Hanson and the book Superstrings (Vol. 2) by Green, Schwarz and Witten on one end and Principles of Algebraic Geometry of Griffiths and Harris on the other. This is the first systematic exposition in book form of the material on Calabi-Yau spaces, related mathematics and the physics application, otherwise scattered through research articles in journals and conference proceedings.

Cupid, the spoiled and mischievous god of love, is attracted to and marries the beautiful mortal, Psyche, and both learn many lessons about the nature of love.

Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be

irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's stoytelling blaze through every page.

Sunny's Nights

After Hazen Wood kidnaps twelve-year-old Gemma Sullivan, the two embark upon a cross-country journey that tests the limits of Gemma's endurance. In scenes of physical and sexual violence, Hazen tries to destroy the young girl's will. When she does manage to escape he drags her back and threatens to have her arrested for the violent acts he performs. It is only Gemma's resilience and fertile imagination that protects her from the worst of the trauma she suffers. And, in the end, it is the healing power of unconditional love that gives Gemma the courage to speak out against her abuser at last and claim the life she deserves. Alternating between the voices of Gemma and Hazen Wood, Meg Tilly has brilliantly brought to life powerful and unforgettable characters that will leave you thinking about them long after you turn the last page.
