

The Iceman True Story Of A Cold Blooded Killer Anthony Bruno

'He was like a vampire. We believe he killed over sixty people.' - James J. Hunt, Assistant Special Agent , New York DEA 9 July 1990: The DEA makes the gruesome discovery of nine bodies, dismembered, stuffed into cheap suitcases and buried in a secluded bird sanctuary near Gravesend, Brooklyn. It was tommy Pitera's personal cemetery. When John Gotti put out a contract on informer Willie Bo outside his home, Pitera not only murdered for the mob, he took pleasure in killing and did so at whim - the slightest insult could provoke him to fire. A cold-blooded, homicidal maniac with a fascination for the macabre, he had an autopsy table in his basement and regularly dismembered his victims, expertly cutting them into six pieces: the ear responsible for over sixty; Philip Carlo, author of the bestselling memoirs of the horrendous crimes of drug kingpin and merciless mob killer Thomas Pitera, and the New York DEA's three-year battle to bring him to justice. "I didn't quite understand what was going on until I saw him in front of me. His body just lay there, without moving. I called out to him several times, but to no success. He was dead. Now I knew I was next. I knew my daddy would make sure I couldn't tell what REALLY happened." So says Richard Kuklinski, better kown as the Iceman. The Devil himself. The monster. In describing his younger brother's life, he tells us how he got into the mob, how he got on to kill over 125 people - some just for fun. Another prime example of our own society - sometimes beginning at home, with one's own parents - creating our own monsters, serial killers. Some would call Richard Kuklinski a "hitman," while others would refer to him as one of the prolific serial murderers of our time. Or was he both? Did he suffer from anti-social and paranoid personality disorder? Or was he in his blood?

"The inside story of a single Brooklyn gang that killed more Americans than the Iraqi army."—Mike McAlary, columnist, New York Post They were the DeMeo gang—the most deadly hit men in organized crime. Their Mafia higher-ups came to know, use, and ultimately fear them as the Murder Machine. They killed for profit and for pleasure, following cold-blooded plans and wild whims, from the meat market to the docks. Now complete with personal revelations of one of the key players, this is the savage story that leaves no corpse unturned in its terrifying telling. INCLUDES PHOTOGRAPHS

The true story of Richard Kuklinski, the notorious contract killer and family man. When finally arrested in 1986, neither his wife nor daughters have any clue about his real profession.

Richard Kuklinski lied watching them die. Seeing the light in their eyes go out. He enjoyed knowing that the last thing they saw before dying was his face, looking down on them, wearing a big shit-eating grin. He really enjoyed these trips to Manhattan. Pyke's practice in different ways of killing people. He enjoyed the exercise too. To him, this was all the exercise he needed. Killing people and dumping their bodies off a bridge or slicing their guts open with his knife- to prevent any body gases from building up, so if they were dumped in a body of water they would be sure to sink instead of floating to the surface - and watching them die a slow, excruciating death. He was slowly but surely perfecting his craft. He was only nineteen years old. His reign of terror in within the New Jersey organized crime underworld would last for over two decades before he was put behind bars, but not before he left behind a legacy of murder and mayhem unlike anything the authorities had ever seen. In COLD AS ICE, author David Boyer digs deep into the life - and mind - of one of America's most famous yet feared contract killers, a man so cold and unfeeling toward his victims he was nicknamed The Iceman.

William Bonin: the True Story of the Freeway Killer

The Mob, Witness Protection, and Life on the Run

The real story behind the murder of a Manhattan schoolteacher that became a symbol of the dangers of casual sex: " A first-rate achievement " (Truman Capote). In 1973, Rosann Quinn, an Irish-Catholic teacher at a school for deaf children, was killed in New York City after bringing a man home to her apartment from an Upper West Side pub. The crime made headlines and the ensuing case quickly evolved into a cultural phenomenon, spanning both a #1 New York Times – bestselling novel and a film adaptation starring Diane Keaton and Richard Gere, and sparking debates about the sexual revolution and the perils of the " pickup scene " at what were popularly known as singles bars. In this groundbreaking true crime tale, Lacey Foburgh, the New York Times reporter first assigned to the story, utilizes an inventive dramatization technique, in which she gives the victim a different name, to veer between the chilling, suspenseful personal interactions leading up to the brutal stabbing and the gritty details of its aftermath, including the NYPD investigation and the arrest of John Wayne Wilson. An Edgar Award finalist for Best Fact Crime, this classic of the genre is " more riveting, and more tragic, than the Judith Rossner novel—and 1977 movie Looking for Mr. Goodbar " (Men ' s Journal).

Featuring a new Afterword, this is the spectacular story of the 1991 discovery of a Stone Age man in the Alps, a lonely frozen figure who offers clues about the world of 3000 B.C. 38 halitones. In the 1970s and early 1980s, southern California was shocked when dead boys began turning up with disturbing regularity alongside some of the picturesque state's most heavily traveled freeways. Victims of sadistic torture, the dead boys and young men had been raped and strangled, and their untimely deaths were eventually attributed to the Freeway Killer, an elusive psychopath whose trail of death would go down in California history as one of the worst true crime stories in the country. While the Freeway Killer ultimately turned out to be three different men, one of them was truck driver William Bonin, one of the most prolific and sadistic among American serial killers. Bonin usually preferred to work with an accomplice, and the lust killer and his cronies brutally raped and tortured his victims - Bonin loved the sounds of their screams - before strangling them and dumping them on the side of the road like garbage. Bonin confessed to committing 21 murders in the span of just a year, although many experts believe he was responsible for the deaths of many more missing young men. He was executed in 1996, and in this detailed serial killer biography, you'll learn the background that might offer some understanding of what makes a man go off the rails and become a deranged lust killer. Of course, spine-tingling story of a man whose youngest victim was a

12-year-old who was waiting for a bus to take him to Disneyland might be one that causes you to sleep with the lights on for weeks after turning the final gruesome page.

"The new American way of war is here, but the debate about it has only just begun. In The Way of the Knife, Mr Mazzetti has made a valuable contribution to it." —The Economist A Pulitzer Prize–winning reporter’s riveting account of the transformation of the CIA and America’s special operations forces into man-hunting and killing machines in the world’s dark spaces: the new American way of war. The most momentous change in American warfare over the past decade has taken place away from the battlefields of Afghanistan and Iraq, in the corners of the world where large armies can’t go.

The Way of the Knife is the untold story of that shadow war: a campaign that has blurred the lines between soldiers and spies and lowered the bar for waging war across the globe. America has pursued its enemies with killer drones and special operations troops: trained privaters for assassination missions and used them to set up clandestine spying networks; and relied on mercenary dictators, untrustworthy foreign intelligence services, and proxy armies. This new approach to war has been embraced by Washington as a lower risk, lower cost alternative to the messy wars of occupation and has been championed as a clean and surgical way of conflict. But the knife has created enemies just as it has killed them. It has fomented resentments among allies, fueled instability, and created new weapons unbound by the normal rules of accountability during wartime. Mark Mazzetti tracks an astonishing cast of characters on the ground in the shadow war, from a CIA officer dropped into the tribal areas to learn the hard way how the spy games in Pakistan are played to the chain-smoking Pentagon official running an off-the-books spy operation, from a Virginia socialite whom the Pentagon hired to gather intelligence about militants in Somalia to a CIA contractor imprisoned in Lahore after going off the leash. At the heart of the book is the story of two proud and rival entities, the CIA and the American military, elbowing each other for supremacy. Sometimes, as with the raid that killed Osama bin Laden, their efforts have been perfectly coordinated. Other times, including the failed operations disclosed here for the first time, they have not. For better or worse, their struggles will define American national security in the years to come.

The truth behind the twisted crimes that inspired the films Psycho, The Texas Chain Saw Massacre, and The Silence of the Lambs... From "America's principal chronicler of its greatest psychopathic killers" (The Boston Book Review) comes the definitive account of Ed Gein, a mild-mannered Wisconsin farmhand who stunned an unsuspecting nation—and redefined the meaning of the word "psycho." The year was 1957. The place was an ordinary farmhouse in America's heartland, filled with extraordinary evidence of unthinkable depravity. The man behind the massacre was a slight, unassuming Midwesterner with a strange smile—and even stranger attachment to his domineering mother. After her death and a failed attempt to dig up his mother's body from the local cemetery, Gein turned to other grave robberies and, ultimately, multiple murders. Driven to commit gruesome and bizarre acts beyond all imagining, Ed Gein remains one of the most deranged minds in the annals of American homicide. This is his story—recounted in fascinating and chilling detail by Harold Schechter, one of the most acclaimed true-crime storytellers of our time.

The Killer Book of Cold Cases

The True Story

On November 8, 1985, 18-year-old Tom Odle brutally murdered his parents and three siblings in the small southern Illinois town of Mount Vernon, sending shockwaves throughout the nation. The murder of the Odle family remains one of the most horrific family mass murders in U.S. history. Odle was sentenced to death and, after seventeen years on death row, expected a lethal injection to end his life. However, Illinois governor George Ryan's moratorium on the death penalty in 2000, and later commutation of all death sentences in 2003, changed Odle's sentence to natural life. The commutation of his death sentence was an epiphany for Odle, who has been taught to fear the cold: "Don't forget your jacket! You don't want hypothermia, do you?" "Put your gloves on before you get frostbite!" Of course, these are consequences of extreme cold exposure, but with the proper understanding, anyone can learn to use the cold a result, he realized that he needed to understand why he murdered his family. He reached out to Dr. Robert Hanlon, a neuropsychologist who had examined him in the past. Dr. Hanlon engaged Odle in a therapeutic process of introspection and self-reflection, which became the basis of their collaboration on this book. Hanlon tells a gripping story of Odle's life as an abused child, the life experiences that formed his personality, and his tragic homicidal escalation to mass murder, seamlessly weaving into the narrative Odle's unadorned reflections of his childhood, finding a new family on death row, and his belief in the powers of redemption. As our nation attempts to understand the continual mass murders occurring in the U.S., Survived by One sheds some light on the psychological aspects of why and how such acts of extreme carnage may occur. However, Survived by One offers a never-been-told perspective from the mass murderer himself, as he searches for the answers concurrently being asked by the nation and the world.

From the author of the Sunday Times bestseller, M: Maxwell Knight, MI5's Greatest Spymaster In the World War II era, Geoffrey Pyke was described as one of the world's great minds. He earned a fortune on the stock market, founded an influential pre-school, and is seen as the father of the U.S. Special Forces. In 1942, he convinced Winston Churchill to build an aircraft carrier out of reinforced ice. He escaped from a German WWII prison camp, wrote a bestseller, and aided Republicans in the Spanish Civil War. He even launched a private attempt to avert the outbreak of the Second World War by sending into Nazi Germany a group of pollsters disguised as golfers. The Iceman is an action-packed World War II military thriller featuring a daring United States Navy submarine commander during the Pacific war in 1942-43. In 1942, off the port city of St. Nazaire in occupied France, a United States Navy S-class submarine assigned to the Royal Navy lurks just outside the borders of the minefield protecting a German U-boat base. Lieutenant Commander Malachi Stormes, the boat's skipper, patrols dangerously close to the minefield entrance and manages to trap and sink three outgoing U-boats in one spectacular attack. Britain decorates him, the U.S. Navy promotes him and then gives him command of a brand new class of submarine, a fleet boat called Firefish. Based in Perth, Australia, having been driven out of the Philippines by the Japanese juggernaut, the Perth boats are the only American forces capable of hitting the Japanese in the western Pacific. Stormes, with his cold, steely-eyed focus on killing Japanese ships, is an enigma to his officers and crew, especially when it becomes clear that he is willing to take huge chances to achieve results. Firefish sinks more ships than any Perth boat on her first war patrol, but Stormes' unconventional tactics literally frighten his crew. Driven by a past steeped in the whiskey-haunted violence of the Kentucky coal fields, whose psychological scars torment his sleep and close him off from personal relationships, Stormes is nicknamed The Iceman. His crew is proud of their boat's accomplishments, but wonder if their iron-willed skipper will bring them home alive. With intense action and featuring authentic submarine tactics in the early years of the Pacific war, The Iceman continues P. T. Deutermann's masterful, award-winning cycle of thrillers set during World War II.

The prostitutes working New York City's Times Square were more than a little bit nervous. A deranged serial killer who apparently melted into the crowd was picking up hookers and sadistically torturing them, leaving some girls wondering if there was a real-life Dr. Frankenstein out there attempting to create his own personal plaything from pieces of his dismembered victims. Some working girls were butchered in seedy hotel rooms, their heads, hands or breasts sliced off, their remains then set ablaze in an effort to dispose of any incriminating evidence. Others narrowly escaped death, but only after enduring hours of terrifying torture that included brutal bite marks, surface knife slashes and stab wounds that all served as bloody foreplay for frenzied sexual assaults. Survivors were found bleeding and delirious, unable to remember much due to the cocktail of drugs they'd been given by their assailant. But their bodies told a horrific story that was almost worse than death, and the sadistic calling cards left by the serial killer would eventually tie together victims in this true crime murder spree that crossed two states. It wasn't until one victim's screams grew loud enough that Richard Cottingham, an American serial killer who was part narcissist, part sadist and all evil, was finally caught by police as he fled his hotel room carrying his bag of torture devices. His capture allowed them to close the books on some of the most horrific murder cases in U.S. history. This serial killer biography not only unearths Cottingham's sick, twisted crime spree, it also delves into the murderer's psyche, attempting to reveal why an insurance company IT guy's seemingly normal life would devolve into madness. Among true crime stories, Richard Cottingham is particularly brutal, and will likely make you look twice at your own coworkers, and wonder what sick secrets they might be keeping.

Over the course of twenty-five years, Dr. Helen Morrison has profiled more than eighty serial killers around the world. What she learned about them will shatter every assumption you've ever had about the most notorious criminals known to man.Judging by appearances, Dr. Helen Morrison has an ordinary life in the suburbs of a major city. She has a physician husband, two children, and a thriving psychiatric clinic. But her life is much more than that. She is one of the country's leading experts on serial killers, and has spent as many as four hundred hours alone in a room with depraved murderers, digging deep into killers' psyches in ways no profiler before ever has. In My Life Among the Serial Killers, Dr. Morrison relates how she profiled the Mad Biter, Richard Otto Macek, who chewed on his victims' body parts, stalked Dr. Morrison, then believed she was his wife. She did the last interview with Ed Gein, who was the inspiration for Alfred Hitchcock's Psycho. John Wayne Gacy, the clown-obsessed killer of young men, sent her crazed Christmas cards and gave her his paintings as presents. Then there was Atlanta child killer Wayne Williams; rapist turned murderer Bobby Joe Long; England's Fred and Rosemary West, who killed girls and women in their "House of Horrors"; and Brazil's deadliest killer of children, Marcelo Costa de Andrade. Dr. Morrison has received hundreds of letters from killers, read their diaries and journals, evaluated crime scenes, testified at their trials, and studied photos of the gruesome carnage. She has interviewed the families of the victims — and the spouses and parents of the killers — to gain a deeper understanding of the killing environment and the public persona they adopt. She has also studied serial killers throughout history and shows how this is not a recent phenomenon with psychological autopsies of the fifteenth-century French war hero Gilles de Rais; the sixteenth-century Hungarian Countess Bathory, H. H. Holmes of the late nineteenth century, and Albert Fish of the Roaring Twenties. Through it all, Dr. Morrison has been on a mission to discover the reasons why serial killers are compelled to murder, how they choose their victims, and what we can do to prevent their crimes in the future. Her provocative conclusions will stun you.

The names of notorious serial killers are usually well-known; they echo in the news and in public consciousness. But most people have never heard of Israel Keyes, one of the most ambitious and terrifying serial killers in modern history. The FBI considered his behavior unprecedented. Described by a prosecutor as "a force of pure evil," Keyes was a predator who struck all over the United States. He buried his victims—cash, weapons, and body-disposal tools—in remote locations across the country. Over the course of fourteen years, Keyes would fly to a city, rent a car, and drive thousands of miles in order to use his kits. He would break into a stranger's house, abduct his victims in broad daylight, and kill and dispose of them in mere hours. And then he would return home to Alaska, resuming life as a quiet, reliable construction worker devoted to his only daughter. When journalist Maureen Callahan first heard about Israel Keyes in 2012, she was captivated by how a killer of this magnitude could go undetected by law enforcement for over a decade. And so began a project that consumed her: for the next several years, uncovering the true story behind how the FBI ultimately caught him, and trying to understand what it means for a killer like Keyes to exist. A killer who left a path of monstrous, randomly committed crimes in his wake—many of which remain unsolved to this day. American Predator is the ambitious culmination of years of interviews with key figures in law enforcement and in Keyes's life, and research uncovered from classified FBI files. Callahan takes us on a journey into the chilling, nightmarish mind of a relentless killer, and to the limitations of traditional law enforcement.

"The Iceman Speaks: Choices and Consequences" is an autobiography written to deter teenagers and young adults from a lifestyle of drugs, gangs, violence, and criminal activities. It focuses youth toward education, rewarding relationships with parents, making wise decisions, and the consequences of going down the wrong path. It consists how youths can avoid the traps that lurk in the shadows of society. This book speaks boldly about the rights of victims and the fate of criminals, and the uncensored graphic descriptions of life behind bars is expressed in detail. In today's society, far too many teenagers glorify themselves in violence and a renegade way of life, and far too many end up in jail and prisons. This extraordinary book is designed to combat such negativity. It charts the life of a man, a man with excellent advice. Straightforward, no nonsense, thought provoking.

NEW YORK TIMES BESTSELLER " A fascinating account of a double tragedy: one physical, the other psychological." —Truman Capote This is the frighteningly true story of two young cops and two young robbers whose separate destinies fatally cross one March night in a bizarre execution in a deserted Los Angeles field. "A complex story of more ambition than In Cold Blood and equally compelling!"—The New York Times "Once the action begins it is difficult to put the book down. . . . Wambsgater's compelling account of this true story is destined for the bestseller lists."—Library Journal

This is the extraordinary story of Geoffrey Pyke, an inventor, war reporter, escaped prisoner, campaigner, father, educator—and all-around misunderstood genius. In his day, he was described as one of the world's great minds, to rank alongside Einstein, yet he remains virtually unknown today. Pyke was an unlikely hero of both world wars as seen today as the father of the U.S. Special Forces. He changed the landscape of British pre-school education, earned a fortune on the stock market, wrote a bestseller and in 1942 convinced Winston Churchill to build an aircraft carrier out of reinforced ice. He escaped from a German WWII prison camp, devised an ingenious plan to help Britain during World War, and launched a private attempt to avert the outbreak of the Second World War by sending into Nazi Germany a group of pollsters disguised as golfers. Despite his brilliance, Pyke ultimately could not find peace, committing suicide in 1948. Yet the full scope of his story remained secret even after his death: in 2009, MI5 suggested that Pyke was in fact a senior official in the Soviet Comintern. In 1951 papers relating to Pyke were found in the flat of Cambridge Spy Guy Burgess after his defection to Moscow. MI5 had "watchers" follow Pyke through the bombed-out streets of London, his letters were opened and listening devices picked up clues to his r Spanish agent codenamed Professor P. MI5 helped to bring his career to an end. It is only now, more than sixty years after his death, that Geoffrey Pyke's astonishing story can be told in full. The Ingenious Mr. Pyke is a many-faceted account of this enigmatic man's genius, and reveals him as one of the great innovators of the last century. Philip Carlo's The Ice Man spent over six weeks on the New York Times Bestseller List. Top Mob Hitman. Devoted Family Man. Dotting Father. For thirty years, Richard "The Iceman" Kuklinski led a shocking double life, becoming the most notorious professional assassin in American history while happily hosting neighborhood barbecues in suburban New Jersey. Sammy the Bull Gravano's partner in the killing of Paul Castellano, then head of the Gambino crime family, at Sparks Steakhouse. Mob boss John Gotti hired him to torture and kill the neighbor who accidentally ran over his child. For an additional price, Kuklinski would make his victims suffer: he conducted this sadistic business and shocking efficiency, never disappointing his customers. By his own estimate, he killed over two hundred men, taking enormous pride in his variety and ferocity of technique. This trail of murder lasted over thirty years and took Kuklinski all over America and to the far corners of the earth, Brazil, Africa, and Europe. Along the way, he married a beautiful wife and made money to burn. When the law finally caught up with him in 1994, Casso became the thing he hated most—an informer. From his blood feud with John Gotti to his dealings with the "Mafia cops," decorated NYPD officers Lou Eppolito and Stephen Caracappa, to the Windows case, which marked the beginning of the end for the New York Mob, Gaspipe is Anthony Casso's shocking

thing. Richard Kuklinski is now the subject of the major motion picture titled "The Iceman"(2013), starring James Franco, Winona Ryder, Ray Liotta, and Chris Evans.
