*Jan Hauke Holste analyzes how a company can innovate and change its business model to the degree that it can climb up the value chain. His research synthesizes a combination of the global value chain and the business model literature to create a new framework of local firm upgrading. The findings of an empirical test of the model indicate that local firms are more than just a link within a global value chain. Each firm has a choice and inter-firm differences indicate that there is a strong firm level factor. Next to other factors, the founder is the key driver of local firm upgrading. He is possibly the most important element within a firm.*

Upgrade Your Life - Small Changes, Easy Actions, Big Success!**

Being successful at whatever you want to do or be in life isn't all that difficult if you know where you're going and how to get there. Most people fail because they don't realize how much negative programming they've had since early childhood. No matter how hard you try, goals are always out of reach or given up on again and again. Poor subconscious programming creates a mind that's unfocused and unable to take positive actions that will bring you the lifestyle you desire and deserve. It doesn't have to be this way! Once you learn how to use your mind correctly, you can achieve anything you desire, and I'll show you how. In Upgrade Your Life – Small Changes, Easy Actions, Big Success I've covered the most common areas people struggle with and want to succeed at. We'll tackle everything from finding love and making money to losing weight and discovering your ideal career, and many subjects in between.

Amid a confluence of messages regarding accountability, the Common Core State Standards, teacher effectiveness, and student performance, educators everywhere are looking for ways to revitalize their curriculum design and instructional practice. **Upgrade Your Curriculum: Practical Ways to Transform Units and Engage Students** offers a solution: providing students with meaningful, relevant units of study developed by the educators who actually teach them. The authors, both curriculum experts, advocate a gradual approach to transforming curriculum in which teachers work collaboratively to upgrade one unit at a time. Drawing from a wealth of professional development experiences in schools across the United States and overseas, the authors \* Address the foundational concepts involved in transforming curriculum. \* Introduce their innovative transformational matrix—an essential visual reference that classifies upgrades according to their effect on student learning and engagement. \* Outline the four phases of the collaborative transformational process: appraisal and brainstorming, commitment and communication, reactions and reflections, and revisions. \* Explain how to create units of study that engage students in higher-order thinking, authentically incorporate technology and web-based tools, and align with the Common Core. \* Present transformational snapshots that reflect how real practitioners across all grade levels and subject areas have upgraded curriculum and instruction and increased student ownership of learning. If we view curriculum and assessment choices as indicators of the

direction in which our students are heading, most of us would agree that they're currently traveling back to the 20th century. Clearly, we need to collectively step up our curriculum. This indispensable guide offers strategic, practical knowledge that will enrich your school's curriculum mapping efforts and help you create authentic, engaging learning environments that prepare students for the future.
