

### The Long Tail How Endless Choice Is Creating Unlimited Demand

3D Robotics co-founder and bestselling author Chris Anderson takes you to the front lines of a new industrial revolution as today’s entrepreneurs, using open source design and 3-D printing, bring manufacturing to the desktop. In an age of custom-fabricated, do-it-yourself product design and creation, the collective potential of a million garage tinkerers and enthusiasts is about to be unleashed, driving a resurgence of American manufacturing. A generation of “Makers” using the Web’s innovation model will help drive the next big wave in the global economy, as the new technologies of digital design and rapid prototyping gives everyone the power to invent—creating “the long tail of things”.

Do you sometimes wonder how your teen is ever going to survive on his or her own as an adult? Does your high school junior seem oblivious to the challenges that lie ahead? Does your academically successful nineteen-year-old still expect you to “just take care of” even the most basic life tasks? Welcome to the stunted world of the Endless Adolescence. Recent studies show that today’s teenagers are more anxious and stressed and less independent and motivated to grow up than ever before. Twenty-five is rapidly becoming the new fifteen for a generation suffering from a debilitating “failure to launch.” Now two preeminent clinical psychologists tell us why and chart a groundbreaking escape route for teens and parents. Drawing on their extensive research and practice, Joseph Allen and Claudia Worrell Allen show that most teen problems are not hardwired into teens’ brains and hormones but grow instead out of a “Nurture Paradox” in which our efforts to support our teens by shielding them from the growth-spurring rigors and rewards of the adult world have backfired badly. With compelling examples and practical and profound suggestions, the authors outline a novel approach for producing dramatic leaps forward in teen maturity, including
• Turn Consumers into Contributors Help teens experience adult maturity—its bumps and its joys—through the right kind of employment or volunteer activity.
• Feed Them with Feedback Let teens see and hear how the larger world perceives them. Shielding them from criticism—constructive or otherwise—will only leave them unequipped to deal with it when they get to the “real world.”
• Provide Adult Connections Even though they’ll deny it, teens desperately need to interact with adults (including parents) on a more mature level—and such interaction will help them blossom!
• Stretch the Teen Envelope Do fewer things for teens that they can do for themselves, and give them tasks just beyond their current level of competence and comfort. Today’s teens are starved for the lost fundamentals they need to really grow: adult connections and the adult rewards of autonomy, competence, and mastery. Restoring these will help them unlearn their adolescent helplessness and grow into adults who can make you—and themselves—proud.

ABOUT THE BOOK Sporting the provocative subtitle: “Why The Future of Business Is Selling Less of More,” The Long Tail is a watershed moment in how we think about business in the Internet Age. Twentieth Century businesses founded on the idea of “hits” emphasized the top ten, twenty, fifty — pick a number — of almost anything that could be sold. Movie box office, music, or new cars were judged by sales rankings, and those rankings were equated with quality, desirability, and value. Author Chris Anderson, in many ways a true man of the 21st Century, has a different theory. He posits that in an age of vast digital storage capacities, Internet staples like Amazon, iTunes, Ebay and others have forever altered how customers consider what to buy. In 2004, as Editor-in-Chief of Wired magazine, he first wrote an article entitled “The Long Tail,” which asserted that “endless choice” creates “unlimited demand.” Translation: if you have everything in stock, you can keep selling it. In this new reality, instead of a business model driven solely by hits, Anderson held that the new digital model would depend as much or more upon “niche” buying, because product that took up a physical space could be kept available for sale virtually forever. MEET THE AUTHOR Tom Sciolosi graduated from UCLA in 1972 with a degree in English literature. After a short stint in advertising, he wrote for television beginning in 1976, and has continued to the present, logging over 100 episodes of both drama and comedy. Tom has also written five motion pictures, four novels, and taught screenwriting at UCLA Extension for six years. Tom loves baseball, writing, books, and politics, though not necessarily in that order. Most recently, he has been exploring the world of e-books. He is married, has two sons, and lives in Los Angeles. EXCERPT FROM THE BOOK Chris Anderson himself says it best in The Long Tail: “The theory of the Long Tail can be boiled down to this: Our culture and economy are increasingly shifting away from a focus on a relatively small number of hits (mainstream products and markets) at the head of the demand curve, and moving toward a huge number of niches in the tail.” These niches, according to Anderson, are “everything else.” No wonder it’s long. Very little of what’s out there is hot at any particular moment. What is hot, a “hit,” comprises the front, or head, of that demand curve. Everything else is part of the tail. You can sell less of a hit if small quantities of all those other things keep moving, and the research says they do. First, Anderson explains how the Internet has “unified elements of a supply-chain revolution that had been brewing for decades.” At lightning speed, TV and top-40 radio lost much of their taste-shaping clout to the computer and its secret weapon, the Internet. The book that inspired the major new motion picture Mandela: Long Walk to Freedom. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa’s antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. LONG WALK TO FREEDOM is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history’s greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life—an epic of struggle, setback, renewed hope, and ultimate triumph.

**Since the beginning of broadcasting, radio and television producers have pushed their shows to audiences in controlled environments that end in a discrete and quantifiable site to be transformed into advertising rates. Today’s viewers program their DVR’s to create their own viewing schedules, wait to watch entire seasons in marathon DVD viewing sessions and stream shows to their mobile devices. The rise of a curatorial culture where viewers create their own entertainment packages and select from a buffet of viewing options and venues has caused a seismic shift for the traditional television industry. While audiences clamor for more story-driven and scripted entertainment, their new viewing habits undermine the dominant economic structures that fund quality episodic series.Television on Demand examines how we have reached this present moment; and considers the viable alternatives of this crucial culture industry. This leads to an understanding of an empowered audience that realizes its means of control of how it consumes media, as well as a new way of looking at the industry we have traditionally and currently call “television.”**

**What happens when there is almost unlimited choice? When everything becomes available to everyone? And when the combined value of the millions of items that only sell in small quantities equals or even exceeds the value of a handful of best-sellers? In this ground-breaking book, Chris Anderson shows that the future of business does not lie in hits - the high-volume end of a traditional demand curve - but in what used to be regarded as misses - the endlessly long tail of that same curve. As our world is transformed by the Internet and the near infinite choice it offers consumers, so traditional business models are being overturned and new truths revealed about what consumers want and how they want to get it. Chris Anderson first explored the Long Tail in an article in Wired magazine that has become one of the most influential business essays of our time. Now, in this eagerly anticipated book, he takes a closer look at the new economics of the Internet age, showing where business is going and exploring the huge opportunities that exist: for new producers, new e-tailers, and new tastemakers. He demonstrates how long tail economics apply to industries ranging from the toy business to advertising to kitchen appliances. He sets down the rules for operating in a long tail economy. And he provides a glimpse of a future that’s already here.**

NEW YORK TIMES BESTSELLER "A legal thriller that's comparable to classics such as Scott Turow's Presumed Innocent ... , tragic and shocking."—Associated Press NOW AN EMMY-NOMINATED ORIGINAL STREAMING SERIES • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Entertainment Weekly • Boston Globe • Kansas City Star Andy Barber has been an assistant district attorney for two decades. He is respected. Admired in the courtroom. Happy at home with the loves of his life: his wife, Laurie, and their teenage son, Jacob. Then Andy's quiet suburb is stunned by a shocking crime: a young boy stabbed to death in a leafy park. And an even greater shock: The accused is Andy's own son, the enigmatic Jacob. And, believes in Jacob's innocence. Any parent would. But the pressure mounts. Dunning evidence. Doubt. A fabricating marriage. The neighbors' contempt. A murder trial that threatens to obliterate Andy's family. It is the ultimate test for any parent: How far would you go to protect your child? It is a test of devotion. A test of how well a parent can know a child. For Andy Barber, a man with an iron will and a dark secret, it is a test of guilt and innocence in the deepest sense. How far would you go? Praise for Defending Jacob "A novel like this comes along maybe once a decade . . . a tour de force, a full-blooded legal thriller about a murder trial and the way it shatters a family. With its relentless suspense, its mesmerizing prose, and a shocking twist at the end, it's every bit as good as Scott Turow's great Presumed Innocent. But it's also something more: an indelible domestic drama that calls to mind Ordinary People and We Need to Talk About Kevin. A spellbinding and unforgettable literary crime novel."—Joseph Finder "Defending Jacob is smart, sophisticated, and suspenseful—capturing both the complexity and stunning fragility of family life."—Lee Child "Powerful. . . leaves you gasping breathlessly at each shocking revelation."—Lisa Gardner "Disturbing, complex, and gripping. Defending Jacob is impossible to put down. William Landay is a stunning talent."—Carla Neggers "Riveting, suspenseful, and emotionally searing."—Linwood Barclay

Graphic novel adaptation of Chris Anderson's "The Long Tail: Why the Future of Business is Selling Less of More." Shows how the future of commerce and culture isn't in the high-volume head of a traditional demand curve, but in what used to be regarded as misses--the endlessly long tail of that same curve.--Publisher.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—inventing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

"World's Toughest Motorcycle Riders"—long-distance motorcycling is not a pastime but an obsession. In this candid, eloquent, sharply observed book, Melissa Holbrook Pierson introduces us to this strange endeavor and the men and women who live to ride impossibly long distances, eating up road, almost without cease. And who find it nothing but fun. Perhaps the most determined of them is John Ryan, a magnetic, enigmatic man who loves nothing better than breaking records of amazing distance—at no small risk to himself and his health. But why? Pierson, who rediscovered the joys of motorcycling in the midst of a personal crisis, puts on her helmet and joins Ryan in his element in order to understand his singular desire and discipline, his passion and his obsession. The Man Who Would Stop at Nothing offers an intimate glimpse of an unusually independent yet supportive community as well as a revealing, unforgettable portrait of its most daring member. In electric, pitch-perfect prose, Pierson gives us rare insights into not only a subculture but also the deeply human craving for something more that drives it.

A funny, mind-altering comedy about the Pursuit of Happiness in America Set in an addict's halfway house and a tennis academy, and featuring the most endearingly screwed-up family to come along in recent fiction, Infinite Jest explores essential questions about what entertainment is and why it has come to so dominate our lives; about how our desire for entertainment affects our need to connect with other people; and about what the pleasures we choose say about who we are. Equal parts philosophical quest and screwball comedy, Infinite Jest bends every rule of fiction without sacrificing for a moment its own entertainment value. It is an exuberant, uniquely American exploration of the passions that make us human - and one of those rare books that renew the idea of what a novel can do. The next step in fiction. . . .Edgy, accurate, and darkly witty. . . .Think Beckett, think Pynchon, think Gaddis. Think. " . . .Sven Birkerts. The Atlantic.

This is the FIRST short story in a set of short space stories from Orb Central Library. In the far reaches of the Canis Major Dwarf, on planet Orb, a young longtail named Denver works at Orb Central Library as a librarian, where he fights fake news alongside his fellow longtail species and collects moments (otherwise known as stories) to submit to the Orb Central Library for all of eternity. With dreams of rising up the ranks and becoming a space collector - just like his grandfather - so that he can one day travel the universe to collect moments from outer space, Denver decides to break longtail tradition and form a crack-fake-news team made up of the uniquely American of planet Orb to help him in his mission - a decision that is to set off a cataclysmic chain of events. In this short space story, Denver meets his new recruits and starts his first day as team leader of the newly formed story division when he goes and makes one huge mistake on his walk to work - a mistake that could cost him his job. With Orb hitting a panic scale seven, a team of dysfunctional new recruits, a bunch of spiritual mogey burners out to sacrifice him, and Vince, a fellow team leader who has it in for him, hot on his tail, Denver has his work cut out to submit his first-ever moment to the Orb Central Library before sunset.

A young girl learns she's half mermaid and plunges into a scheme to reunite with her father in this entrancing, satisfying tale that beckons readers far below the waves. For as long as she can remember, twelve-year-old Emily Windsnap has lived on a boat. And, oddly enough, for just as long, her mother has seemed anxious to keep Emily away from the water. But when Mom finally agrees to let her take swimming lessons, Emily makes a startling discovery — about her own identity, the mysterious father she’s never met, and the thrilling possibilities and perils shimmering deep below the water’s surface. With a sure sense of suspense and richly imaginative details, first-time author Liz Kessler lures us into a glorious undersea world where mermaids study shipwrecks at school and Neptune rules with an iron trident — an enchanting fantasy about family secrets, loyal friendship, and the convention-defying power of love.

In this e-book edition, Tomie dePaola retells his classic story against a charming musical score. Strega Nona—"Grandma Witch"—is the source for potions, cures, magic, and comfort in her Calabrian town. Her magical ever-full pasta pot is especially intriguing to hungry Big Anthony. Big Anthony is supposed to look after her house and tend her garden, but one day, when she goes over the mountain to visit Strega Amelia, he recites the magic verse over the pasta pot, with disastrous results.

The first biography of Yo La Tengo, the massively influential band who all but defined indie music. Yo La Tengo has lit up the indie scene for three decades, part of an underground revolution that defied corporate music conglomerates, eschewed pop radio, and found a third way. Going behind the scenes of one of the most remarkable eras in American music history, Big Day Coming traces the patient rise of husband-and-wife team Ira Kaplan and Georgia Hubley, who—over three decades—helped forge a spandex-and-hairspray-free path to the global stage, selling millions of records along the way and influencing countless bands. Using the continuously vital Yo La Tengo as a springboard, Big Day Coming uncovers the history of the legendary clubs, bands, zines, labels, record stores, college radio stations, fans, and pivotal figures that built the infrastructure of the now-prevalent indie rock world. Journalist and freeform radio DJ Jesse Jarnow draws on all-access interviews and archives for mesmerizing trip through contemporary music history told through one of its most creative and singular acts.

**One of the most influential works of this century. The Myth of Sisyphus and Other Essays is a crucial exposition of existentialist thought. Influenced by works such as Don Juan and the novels of Kafka, these essays begin with a meditation on suicide; the question of living or not living in a universe devoid of order or meaning. With lyric eloquence, Albert Camus brilliantly posits a way out of despair, reaffirming the value of personal existence, and the possibility of life lived with dignity and authenticity.**

**A tale about the link between knowledge, “finely balanced between pathos and comedy,” from one of Czechoslovakia’s most popular authors (Los Angeles Times). Every evening, he rescues books from the jaws of his hydraulic press, carries them home, and fills his house with them. Haniú may be an idiot, as his boss calls him, but he is an idiot with a difference—the ability to quote the Talmud, Hegel, and Lao-Tzu. In this “irresistibly eccentric romp,” the author Milan Kundera has called “our very best writer today” celebrates the power and the destructibility of the written word (The New York Times Book Review).**

**Around the late 1870’s red deer from the Scottish Highlands were transported to New Zealand and released into both Islands for the purpose of the odd bit of sport and knock doubt for a bit of variety to the pot. Under total protection for eighteen years the numbers increased along with the spread and by the 1930’s the population had become beyond the ability of the Acclimatisation Society to contain the rapid expansion. The Internal affairs department took over the task from 1930 to 1956, and then the DPF, Department Protection Forest division of the culling. During the war with no hunting pressure the deer in the bush and high country had become enormous herds beginning to do some serious damage. Under the control of the Internal affairs department hunters were sent into the back country with pack horses, ex-army 303 Lee-Endfields and endless supplies of 303 ammunition. The hunters were required to take the deer skins and were paid an expense of ten bob per skin. After about 1955 tail tallies were taken, the price per tail from ten bob to a couple of quid depending on the area being hunted. Young men from all around the globe and all walks of life were drawn to the adventure of being paid (not a lot) to hunt in some of New Zealand’s remotest country. As the hunting became more challenging with the deer expanding into the remotest area of the country the forest Service set up a training camp for hunters in a remote “Wairau Valley” called Dip Flat. Three months of extensive training was under taken by prospective hunters who had first past a selection course. Days were spent on the range learning basic fire arm skills, first aid, cooking, river crossings, and all the skills needed to be able to work for long periods on your own. Over the three months trainees were assessed as to the type of hunting areas they were best suited for, mountain, country, bush or more open country, then sent to blocks all around the country. However the job was partially suited to the individual loner type or bloke who tended to rely on himself and is aware of his own capabilities and some people are just not at ease working and living for long periods alone. There is no accounting for it; it’s just the way it is so although having passed through Dip Flat, hunter turnover was still an average of three to four months.**

\*Magnificent.\* (Anthony Doerr, author of All the Light We Cannot See) From Annie Proulx, the Pulitzer Prize- and National Book Award-winning author of The Shipping News and “Brokeback Mountain” comes her masterpiece: an epic, dazzling, violent, marvelously dramatic novel about the destruction of the world’s forests. In the late seventeenth century, two penniless young Frenchmen, René Sel and Charles Duquet, arrive in Canada, then known as New France. Bound to a feudal lord, a seigneur, for three years in exchange for hardship, oppressed by the forest he is charged with clearing. He is forced to marry a Mi’kmaw woman, and their descendants live trapped between two hostile cultures. Duquet, crafty and ruthless, runs away from the seigneur, becomes a fur trader, then sets up a timber business. Proulx tells the stories of the descendants of Sel and Duquet over three hundred years—their travels across North America, to Europe, China and New Zealand under stunningly brutal conditions—the revenge of rivals, accidents, pestilence, resource, leaving the modern-day characters face-to-face with possible ecological collapse. Proulx’s inimitable genius is her creation of characters who are so vivid—in their greed, lust, vengefulness or their compassion and hope—that we follow them with fierce attention. Annie Proulx is one of the most formidable and compelling American writers, and Barkskins is her greatest novel, a superb marriage of history and imagination.

The winner of the Man Booker Prize, this “expertly written, perfectly constructed” bestseller (The Guardian) is now a Starz miniseries. It is 1866, and Walter Moody has come to stake his claim in New Zealand’s booming gold rush. On the stormy night of his arrival, he stumbles across a tense gathering of 12 local men who have met in secret to discuss a series of unexplained events: a wealthy man has vanished, a prostitute has tried to end her life, and an enormous cache of gold has been discovered in the home of an exquisitely ornate as the night sky. Richly evoking a mid-nineteenth-century world of shipping, banking, and gold rush boom and bust, The Luminaries is at once a fiendishly clever ghost story, a gripping page-turner, and a thrilling novelistic achievement. It richly confirms that Eleanor Catton is one of the brightest stars in the international literary firmament.

*The agents at the IRS Regional Examination Center in Peoria, Illinois, appear ordinary enough to newly arrived trainee David Foster Wallace. But as he immerses himself in a routine so tedious and repetitive that new employees receive boredom-survival training, he learns of the extraordinary variety of personalities drawn to this strange calling. And he has arrived at a moment when forces within the IRS are plotting to eliminate even what little humanity and dignity the work still has. The Pale King remained unfinished at the time of David Foster Wallace's death, but it is a deeply compelling and satisfying novel, hilarious and fearless and as original as anything Wallace ever undertook. It grapples directly with ultimate questions--questions of life's meaning and of the value of work and society--through characters imagined with the interior force and generosity that were Wallace's unique gifts. Along the way it suggests a new idea of heroism and commands infinite respect for one of the most daring writers of our time.*

*What happens when the bottlenecks that stand between supply and demand in our culture go away and everything becomes available to everyone? "The Long Tail" is a powerful new force in our economy: the rise of the niche. As the cost of reaching consumers drops dramatically, our markets are shifting from a one-size-fits-all model of mass appeal to one of unlimited variety for unique tastes. From supermarket shelves to advertising agencies, the ability to offer vast choice is changing everything, and causing us to rethink where our markets lie and how to get to them. Unlimited selection is revealing truths about what consumers want and how they want to get it, from DVDs at Netflix to songs on iTunes to advertising on Google. However, this is not just a virtue of online marketplaces; it is an example of an entirely new economic model for business, one that is just beginning to show its power. After a century of obsessing over the few products at the head of the demand curve, the new economics of distribution allow us to turn our focus to the many more products in the tail, which collectively can create a new market as big as the one we already know. The Long Tail is really about the economics of abundance. New efficiencies in distribution, manufacturing, and marketing are essentially resetting the definition of what's commercially viable across the board. If the 20th century was about hits, the 21st will be equally about niches.*
