Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This volume, first published in 1977, contains columns published in the magazine from 1965-1968. This 1990 MAA edition contains a foreword by Persi Diaconis and Ron Graham and a postscript and extended bibliography added by Gardner for this edition.

David Copperfield's History of Magic

A magician named Amazing Daisy comes to town and teaches Molly how to do magic tricks.

"A magic show, card tricks, and a disappearing rabbit named Professor Hoffman--the Treski kids are at it again as they try to put on a show in the face of an approaching hurricane. But nothing prepares them for what blows into town next: their long-lost dad"--

An illustrated, illuminating insight into the world of illusion from the world's greatest and most successful magician, capturing its audacious and inventive practitioners, and showcasing the art form's most famous artifacts housed at David Copperfield's secret museum. In his personal journey through a unique and remarkable performing art, David Copperfield profiles twenty-eight of the world's most groundbreaking magicians. From the 16th-century magistrate who wrote the first book on conjuring to the roaring twenties and the man who fooled Houdini, to the woman who levitated, vanished, and caught bullets in her teeth, David Copperfield's History of Magic takes you on a wild journey through the remarkable feats of the greatest magicians in history. These magicians were all outsiders in their own way, many of them determined to use magic to escape the strictures of class and convention. But they all transformed popular culture, adapted to social change, discovered the inner workings of the human mind, embraced the latest technological and scientific discoveries, and took the art of magic to unprecedented heights. The incredible stories are complemented by over 100 never-before-seen photographs of artifacts from Copperfield's exclusive Museum of Magic, including a 16th-century manual on sleight of hand, Houdini's straightjackets, handcuffs, and water torture chamber, Dante's famous sawing-in-half apparatus, Alexander's high-tech turban that allowed him to read people's minds, and even some coins that may have magically passed through the hands of Abraham Lincoln. By the end of the book, you'll be sure to share Copperfield's passion for the power of magic.

Magic Show demonstrates how visual artists adopt the perception-shifting tactics of the theatrical magician to explore questions of creative agency, the power of suggestion, and the fragility of belief. Artists, like magicians, manipulate and mystify not simply for entertainment, but to redress fundamental relationships within the social, political or cultural realm. This richly illustrated book, with over 100 colour reproductions, contains essays that elaborate on the intersections between art and magic by Jonathan Allen and Sally O'Reilly, as well as texts on each of the 24 featured artists. It also contains new writing on arcane images and esoteric ideas from the cultural history of magic by Simon During, Brigitte Felderer, Peter Lamont, Pierre Taillefer, Helen Varola and Marina Warner; a fold-out collation of texts and images exploring the dynamics of magic, art and power; and an illustrated selection of curious props and off-beat ephemera from the world of theatrical magic.

"Most of the magic tricks presented here are easily understood and appear to be simple to learn and to execute with ample practice. Disappearing coins, rope tricks, a genie in a bottle, and many others provide interesting stunts to amaze and mystify one's friends." SLJ.
