Now in its second edition, EU GDPR - An Implementation and Compliance Guide is a clear and comprehensive guide to this new data protection law.

The General Data Protection Regulation (GDPR) had already passed the EU Parliament in 2016 without any rejections or amendments. Since May 25, 2018, therefore, a new, uniform data protection law has been officially adopted in. The new regulation constitutes an effective instrument that will rapidly increase the need for consultation - both for medium-sized companies and large corporations. Benefit from this development as soon as possible by

will raise major problems in the near future. Moreover, it is not currently certain how United Kingdom will treat the international law internally after Brexit, as Article 3 GDPR is limiting the spatial application area to the European Union and processes taking place in this terrain. I will outline these problems here.

In this book, the protection of personal data is compared for eight EU member states, namely France, Germany, the United Kingdom, Ireland, Romania, Italy, Sweden and the Netherlands. The comparison of the countries is focused on government policies for the protection of personal data, the applicable laws and regulations, implementation of those laws and regulations, and supervision and enforcement. Although the General Data Protection Regulation (GDPR) harmonizes the protection of personal data across the EU as of May 2018, its open norms in combination with cultural

and applicable from May 2018, the GDPR is the centrepiece of the recent reform of the EU regulatory framework for protection of personal data. It replaces the 1995 EU Data Protection Directive and has become the most significant piece of data protection legislation anywhere in the world. The book is edited by three leading authorities and written by a team of expert specialists in the field from around the EU and representing different sectors (including academia, the EU institutions, data protection authorities, and the private sector), thus providing a pan-European analysis of the GDPR. It examines

each article of the GDPR in sequential order and explains how its provisions work, thus allowing the reader to easily and quickly elucidate the meaning of individual articles. An introductory chapter provides an overview of the background to the GDPR and its place in the greater structure of EU law and human rights law. Account is also taken of closely linked legal instruments, such as the Directive on Data Protection and Law Enforcement that was adopted concurrently with the GDPR, and of the ongoing work on the proposed new E-Privacy Regulation. What is the nature of the relationship

between the fields of new technology and EU law? What challenges do new technologies pose for the internal market and the fundamental principles of the EU? The first part of the collection explores the EU's approach to the regulation of scientific and technological risk, and the link between the regulation of technology and the internal market. In detail, the chapters analyse the interaction between EU law, bioethics and medical and health technologies. The second part of the collection enhances on this, and the chapters scrutinize specific policy areas in order to explain the alternate ways in which EU policy

Nearly two decades after the EU first enacted data protection rules, key questions about the nature and scope of this EU policy, and the harms it seeks to prevent, remain unanswered. The inclusion of a Right to Data Protection in the EU Charter has increased the salience of these questions, which must be addressed in order to ensure the legitimacy, effectiveness and development of this Charter right and the EU data protection regime more generally. The Foundations of EU Data Protection Law is a timely and important work which sheds new light on this neglected

area of law, challenging the widespread assumption that data protection is merely a subset of the right to privacy. By positioning EU data protection law within a comprehensive conceptual framework, it argues that data protection has evolved from a regulatory instrument into a fundamental right in the EU legal order and that this right grants individuals more control over more forms of data than the right to privacy. It suggests that this dimension of the right to data protection should be explicitly recognised, while identifying the practical and conceptual limits of individual control

over personal data. At a time when EU data protection law is sitting firmly in the international spotlight, this book offers academics, policy-makers, and practitioners a coherent vision for the future of this key policy and fundamental right in the EU legal order, and how best to realise it.

These rules will have a significant impact on registry based research protocols, and will define what and how data can be collected. Registries are an important source of data for measuring the impact of stroke care initiatives, and provide an evidence base for defining clinical best practice. Legislation must balance patient privacy with the need for data collection which facilitates improvements in patient care. Methods u2013 We examined the full GDPR text, as well as current interpretations of the stated rules, in combination with

The GDPR rules were then applied to the Registry for Stroke Care Quality (RES-Q), an ESO-EAST initiative for measuring the quality of stroke in Europe. Relevant sections in GDPR were identified, and compared with RES-Qu2019s existing data management strategy. Results u2013 Necessary modifications to RES-Qu2019s existing policies which were clearly identified were implemented and a new data protection policy was developed. Specific areas where ambiguity was identified included; 1) Informed consent, 2) Anonymization, 3) Pseudonymization, 4) Data

preservation and destruction. Conclusion u2013 GDPR makes significant changes to existing EU and national legislation, and contains many clauses which are intentionally unclear and open to future legal challenges. It is possible to adapt ongoing protocols to comply with GDPR, however the ambiguity currently present has the potential to forestall important research as penalties for non-compliance with GDPR are severe.

intensive work, accompanied with charged political discussions and wide societal echo, the European Union's (EU) Data Protection Reform has finally become a reality. The new framework consists of a General Data Protection Regulation (GDPR), which replaced the former Data Protection Directive, and a new Directive for the police and criminal justice sector. They came into force in May 2016 and became applicable law in May 2018. The reform aims at modernizing and harmonizing data protection across the EU and is an essential element of the broader and particularly ambitious Digital Single Market Strategy that the EU launched in parallel and whose far-reaching

consequences will unfold in the years to come. As this new European Data Protection Regulation will obviously entail many changes for all kinds of companies in the EU and thus Germany, the aim of this seminar paper is to answer the following question: “What measures do German companies have to implement in order to meet the data protection requirements of the new EU GDPR, which is applicable since May 25th 2018?” To answer this question, first some important terms that play a role in the regulation are defined (e.g. privacy by design / privacy by default). Then a systematic literature analysis is carried out to identify the most important contents of the GDPR,

such as possible penalties for non-compliance. In addition, it will be described how companies outside the EU will be affected by this European legislation. Next, it will be examined which are the crucial differences of the GDPR compared to the former German Bundesdatenschutzgesetz (BDSG), which documentary measures companies must implement as well as which infringements must be reported to supervisory authorities. Furthermore, the state of sources for this most current topic will be discussed by reviewing the various types of literature (journals, scientific papers, professional service firm literature) used in this seminar paper. Last but not least, the most

Steven MacDonald gives us a helpful explanation: "The General Data Protection Regulation (GDPR) is a new digital privacy regulation being introduced on the 25th May, 2018. It standardizes a wide range of different privacy legislations across the EU into one central set of regulations that will protect users in all member states." Put simply, this means companies will now be required to build in privacy settings into their digital products and websites - and have them switched on by default. Companies also need to regularly conduct privacy

impact assessments, strengthen the way they seek permission to use the data, document the ways they use personal data and improve the way they communicate data breaches." And, because it's a regulation and not a directive, it is legally binding - meaning it cannot be opted out of, or ignored. In fact, failing to comply could lead to fines of up to e20 million or 4% of your global turnover."

Mariusz Krzysztofek Personal data protection has become one of the central issues in any understanding of the current world system. In this connection, the European Union (EU) has created the most sophisticated regime currently in force with the General Data Protection Regulation (GDPR) (EU) 2016/679. Following the GDPR's recent reform – the most extensive since the first EU laws in this area were adopted and implemented into the legal orders of the Member States – this book offers a comprehensive discussion of all principles of personal data processing, obligations of data controllers, and rights of data subjects, providing a thorough, up-to-date account

of the legal and practical aspects of personal data protection in the EU. Coverage includes the recent Court of Justice of the European Union (CJEU) judgment on data transfers and new or updated data protection authorities' guidelines in the EU Member States. Among the broad spectrum of aspects of the subject covered are the following: – right to privacy judgments of the CJEU and the European Court of Human Rights; – scope of the GDPR and its key definitions, key principles of personal data processing; – legal bases for the processing of personal data; – direct and digital marketing, cookies, and online behavioural advertising; – processing of personal

Because the global scale and evolution of information technologies

have changed the data processing environment and brought new challenges, and because many non-EU jurisdictions have adopted equivalent regimes or largely analogous regulations, the book will be of great usefulness worldwide. Multinational corporations and their customers and contractors will benefit enormously from consulting and using this book, especially in conducting case law, guidelines and best practices formulated by European data protection authorities. For lawyers and academics researching or advising clients on this area, this book provides an indispensable source of practical guidance and information for many years to come.

Applied Sciences in The Netherlands. Introduction. As of May 2018, a new European privacy law -called the General Data Protection Regulation (GDPR)- is in order. With this law, every organization operating in the European Union (EU), needs to adhere to a strict set of rules concerning collection and processing of personal data. Aim. This article explores the consequences of this law for data collection at mass gatherings in the European Union. Method. Since the law was published on 27th of April 2016, a thorough reading of

the law was conducted by 4 persons with a background in mass gathering health. The GDPR consists of 99 articles, organized into 11 chapters. There are also 173 recitals to further explain certain ambiguities. Key articles and recitals relating to healthcare and scientific research were identified. Possible pitfalls and opportunities for data collection and processing at mass gatherings were noted. Discussion. Under article 4, key definitions are noted. There is a clear definition of u201cdata concerning healthu201d. According to the GDPR, health

There are a few safeguards in place, as laid out in article 89. One interesting point is that according to article 89(2), certain derogations can take place if the law interferes with scientific research. Conclusion. The GDPR has major consequences for data collection and processing in the EU. However, with the use of certain safeguards (eg.

the EU, and offers guidance on best practices for compliance with the GDPR so as to avoid possible violations and potential penalties. The GDPR applies to all organizations that obtain, handle, process, store, or otherwise deal with or have control over the personal data of EU residents via automated methods, as well as where such data is part of a hardcopy filing system. As appropriate, this Guide suggests examples of how existing procedures or processes may be at risk for leading to violations and best practices for mitigating those risks.

of Things. Adopted in 2016, the General Data Protection Regulation will come into force in May 2018. It provides for numerous new and intensified data protection obligations, as well as a significant increase in fines (up to 20 million euros). As a result, not only companies located within the European Union will have to change their approach to data security; due to the GDPR's broad, transnational scope of application, it will affect numerous companies worldwide. EU and EEA. This recently-enacted law allows the imposition of fines of up to 5% of global revenue for privacy and data protection violations. Despite the massive potential for steep fines and regulatory penalties, there is a distressing lack of awareness of the GDPR within the business community. A recent survey conducted in the UK suggests that only 40% of firms are even aware of the new law and their responsibilities to maintain compliance. low down on how they're being fleeced of their retirement money—and what they can do about it Every month our financial statements arrive, and every month we glance at them, trying to understand, hoping that we'll come out ahead. But most of us have no idea what's really going on or the costs involved. According to Bobby Monks—who has been a banker and borrower, investor and entrepreneur—financial firms and money managers have complicated the investing process to keep us in the dark, profiting from our ignorance. Having dealt

with the financial sector throughout his career, Monks has seen it all. In *Uninvested*, he reveals how, when, and why the relationship between us and our money managers became corrupted—and what we can do to fix it. Monks shows how the system works not only against us as individuals but also against society at large. Without our knowledge or approval, our money is diverted into the pockets of CEOs and misappropriated, promoting business practices that contribute to economic inequality, political dysfunction, and

environmental woe. Monks' experiences give him a unique perspective on how we got to this point. Drawing on original research and interviews with key figures such as Vanguard founder Jack Bogle, legendary investor Carl Icahn, and former congressman Barney Frank of the Dodd-Frank Act, Monks teaches us how to take back ownership and control of our money. As he writes: Even in the decades preceding the most recent downturn, very few investors enjoyed financial success equal to that of their money managers. Given this, I have

long wondered why investors don't pull their money out of the system en masse. I suspect that it is because most feel powerless. Unaware of the implications of their investments and unable to penetrate the excruciating complexity of the system that facilitates them, many seem to seek refuge in their money managers' aura of sophistication, pretense of competence, and projection of certainty. It seems to me that most investors are simply sleepwalking through the investing process. They have become uninvested. When

we outsource our investing, we sacrifice control—but not responsibility. My goal in writing this book is to convince you that the best (and only) way to fix this broken system is to awaken a critical mass of engaged investors and recruit them to participate more fully in the investing process.

As the power and sophistication of of 'big data' and predictive analytics has continued to expand, so too has policy and public concern about the use of algorithms in contemporary life. This is

hardly surprising given our increasing reliance on algorithms in daily life, touching policy sectors from healthcare, transport, finance, consumer retail, manufacturing education, and employment through to public service provision and the operation of the criminal justice system. This has prompted concerns about the need and importance of holding algorithmic power to account, yet it is far from clear that existing legal and other oversight

mechanisms are up to the task. This collection of essays, edited by two leading regulatory governance scholars, offers a critical exploration of 'algorithmic regulation', understood both as a means for co-ordinating and regulating social action and decision-making, as well as the need for institutional mechanisms through which the power of algorithms and algorithmic systems might themselves be regulated. It offers a unique perspective that is
