*When Fortune Magazine estimated that 70% of all strategies fail, it also noted that most of these strategies were basically sound, but could not be executed. The central premise of Strategic Project Management Made Simple is that most projects and strategies never get off the ground because of adhoc, haphazard, and obsolete methods used to turn their ideas into coherent and actionable plans. Strategic Project Management Made Simple is the first book to couple a step-by-step process with an interactive thinking tool that takes a strategic approach to designing projects and action initiatives. Strategic Project Management Made Simple builds a solid platform upon four critical questions that are vital for teams to intelligently answer in order to create their own strong, strategic foundation. These questions are: 1. What are we trying to accomplish and why? 2. How will we measure success? 3. What other conditions must exist? 4. How do we get there? This fresh approach begins with clearly understanding the what and why of a project - comprehending the bigger picture goals that are often given only lip service or cursory reviews. The second and third questions clarify success measures and identify the risky assumptions that can later cause pain if not spotted early. The how questions - what are the activities, budgets, and schedules - comes last in our four-question system. By contrast, most project approaches prematurely concentrate on the how without first adequately addressing the three other questions. These four questions guide readers into fleshing out a simple, yet sophisticated, mental workbench called "the Logical Framework" - a Systems Thinking paradigm that lays out one's own project strategy in an easily accessible, interactive 4x4 matrix. The inclusion of memorable features and concepts (four critical questions, LogFrame matrix, If-then thinking, and Implementation Equation) make this book unique. This no-nonsense guide to social intelligence for project managers gives you a step-by-step process for building a bulletproof project team—no matter what gaps exist in personality, geography, culture, or communication style. High-performing teams don't happen by magic. You need processes that are designed in a socially intelligent way if your team is going to overcome the modern world's tough challenges with coordination. To be a star project manager, you have to communicate with people in their individual learning styles, provide accountability in ways that won't be demotivating, and run meetings and minutes that people won't tune out. Your processes must be constructed in ways that respect the complex realities of social dynamics step by step. You have to know your team before you can motivate them, and you have to motivate them before you can manage them. In this book are foolproof techniques to make sure your team connects with you, each other, and everyone they need to get the job done. After all, a team should be more than the sum of its parts—and it's up to the project manager to provide the glue that holds it all together.*

**#1 NEW YORK TIMES BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you're running an entire company or in your first management job. "A must-read for anyone who cares about business."—The New York Times When Execution was first published, it changed the way we**

*did our jobs by focusing on the critical importance of “the discipline of execution”: the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future:*

- Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge.*
- Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management.*
- Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation.*
- Risk management will become a top priority for every leader. Execution gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. Execution shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a “vision” and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.*

Today's project manager has more to manage than just project scope, deliverables, communications and teams. They are also expected to manage large volumes of project-related data. And the expectation goes beyond just managing the data. It extends into creating great visualizations that allow stakeholders to fully digest that large volume of data in a manner that is quick, effective and clear. They are also expected to serve as facilitators in the use of visual thinking tools as a method for working through project issues, risks and problems. These new expectations require new skills. The era of multi-page, text-based project status reporting is over. The era of visual project management is here. Time to "skill up!"
